Salesforce AP-202 Training Solutions | AP-202 Valid Exam Guide

Our web-based practice exam software is an online version of the AP-202 practice test. It is also quite useful for instances when you have internet access and spare time for study. To study and pass the certification exam on the first attempt, our web-based Salesforce AP-202 Practice Test software is your best option. You will go through B2B Commerce for Developers Accredited Professional mock exams and will see for yourself the difference in your preparation.

Salesforce B2B Commerce for Developers Accredited Professional Sample Questions (Q101-Q106):

NEW QUESTION # 101
A developer needs to bulk export all of the Product data from an org and does not have access to Data Loader or Workbench. However, the Command Line Interface (CLI) is available. Which command allows the developer to accomplish this task?

- A. sfdx force:data:treeiexport -q <path to file containing soql query> -x export-demo -d /tmp/sfdx-out -p
- B. sfdx force:data:tree:export -Product2 -all
- C. sfdxforce:data:tree:export -h
- D. sfdx force:data:tree:export -o Product?

Answer: A

Explanation:
The Salesforce CLI commandsfdx force:data:tree:exportis used to export data from an org into one or more JSON files1.The-qflag s used to specify the path to a file containing a SOQL query,-xis used to specify the name of the exported file,-disusd to specify the directory where the exported file will be saved, and-pis usd to indicate that all records returned by the SOQL query should be exported12.This ommand allows developers to bulk export data from an org without needing access to Data Loader or Workbench12. Therefore, option A is the correct answer. Please note that the actual SOQL query and the directory path would need to be replaced with the appropriate values for the specific use case.

NEW QUESTION # 102

A user wants to have a Contact Us page in the storefront. This page will be a web-to-lead form and it should have the header and footer, essentially the same look and feel as all the pages in the application. How can this requirement be fulfilled?

- A. Page Include
- B. Subscriber Page (CC Page)
- C. Body Include Begin
- D. Subscriber Template

Answer: B

Explanation:

To have a Contact Us page in the storefront that is a web-to-lead form and has the same look and feel as all the pages in the application, the requirement can be fulfilled by creating a Subscriber Page (CC Page). This is a custom Visualforce page that can be added to the storefront and use the standard header and footer components. The page can also include a web-to-lead form that submits data to Salesforce as leads. Salesforce B2B Commerce and D2C Commerce Developer Guide,Subscriber Pages

NEW QUESTION # 103

Which two event settings are required for a custom event called CustomEvent to fire from the Lightning web component and propagate up to the DOM?

- A. bubbles: true
- B. cancelable: true
- C. composed: true
- D. composed: false

Answer: A,C

Explanation:

To fire a custom event called CustomEvent from the Lightning web component and propagate it up to the DOM, the developer must set two event settings: bubbles and composed. The bubbles setting determines whether the event bubbles up through the component's ancestors in the DOM tree. The composed setting determines whether the event crosses the shadow boundary and reaches the light DOM. Setting both bubbles and composed to true allows the event to be handled by any element in the DOM that listens for it. The cancelable setting is not required for firing or propagating the event, as it only determines whether the event can be canceled by calling preventDefault() on it. Setting composed to false would prevent the event from reaching the light DOM and limit its propagation to the shadow DOM. Salesforce Lightning Web Components Developer Guide: Create and Dispatch Events,Lightning Web Components Developer Guide: Event Propagation

NEW QUESTION # 104

Which three are considered code units, or discrete units of work within a transaction in the debug logs?

- A. Web service invocation
- B. Lightning component load
- C. Workflow invocations
- D. Apex class
- E. Validation rule

Answer: A,C,D

Explanation:

In the context of Salesforce debug logs, code units represent discrete units of work within a transaction. Apex classes (B), Web service invocations (C), and Workflow invocations (E) are considered code units as they encapsulate specific operations or sets of logic that can be executed as part of a transaction. Validation rules (A) and the loading of Lightning components (D) are not considered discrete units of work in the same way, as they are part of the declarative interface and front-end framework, respectively. For more details on how Salesforce handles transactions and debug logs, refer to the Salesforce Developer Documentation: Salesforce Developer Documentation on Transactions and Debug Logs.

NEW QUESTION # 105
A developer has just deployed a new Lightning Web Component to an authorized org. What should the developer do next to use the new component on apage?

- A. Go to the page, edit it, and drag the new component onto the page.
- B. Create a Metadata API (MDAPI) conversion file with the Command Line interface (CLI) then go to the page and adjust the positioning.
- C. Navigate 3 to the Page, Click on the "Custom Component Editor,' Click "Publish" on the new component in the list and adjust the positioning.
- D. Go to "Deploy LWC" in Setup.

Answer: A

Explanation:
After deploying a new Lightning Web Component (LWC) to an org, the typical next step to use the component on a page involves navigating to that page, entering the edit mode (usually through App Builder or a similar interface), and then dragging the new component from the components palette onto the desired location on the page. This process is consistent with Salesforce's modular design approach, allowing for easy integration and configuration of components within the Salesforce ecosystem.

NEW QUESTION # 106
......

No matter how the surrounding environment changes, you can easily deal with it wiht our AP-202 exam questions. Do you want to be abandoned by others or have the right to pick someone else? Our AP-202 simulating exam make you more outstanding and become the owner of your own life! Maybe you need to know more about our AP-202 training prep to make a decision. Then you can free download the demos of our AP-202 study guide, and you can have a experience on them before you pay for them.
