Free PDF Quiz 3V0-21.23 - High Hit-Rate New VMware vSphere 8.x Advanced Design Test Tutorial

Services like quick downloading within five minutes, convenient and safe payment channels made for your convenience. Even newbies will be tricky about this process. Unlike product from stores, quick browse of our 3V0-21.23 practice materials can give you the professional impression wholly. So, they are both efficient in practicing and downloading process. By the way, we also have free demo of 3V0-21.23 practice materials as freebies for your reference to make your purchase more effective.

PassTorrent is a convenient website to provide training resources for 3V0-21.23 professionals to participate in the certification exam. PassTorrent have different training methods and training courses for different candidates. With these PassTorrent's targeted training, the candidates can pass the exam much easier. A lot of people who participate in the 3V0-21.23 professional certification exam was to use PassTorrent's practice questions and answers to pass the exam, so PassTorrent got a high reputation in the 3V0-21.23 industry.

>> New 3V0-21.23 Test Tutorial <<

2026 New 3V0-21.23 Test Tutorial 100% Pass | Trustable VMware Valid VMware vSphere 8.x Advanced Design Test Syllabus Pass for sure

These VMware 3V0-21.23 questions will give you an accurate foresight of the VMware 3V0-21.23 examination format. This VMware 3V0-21.23 is easily downloadable and even printable, this way you can also pursue paper study if that is your preferred method. The portability of this material makes it handier since you can access it on any smart device such as smart phones, laptops, tablets, etc. These VMware 3V0-21.23 features make this prep method the most comfortable one.

VMware vSphere 8.x Advanced Design Sample Questions (Q18-Q23):

NEW QUESTION # 18
An architect is designing a new vSphere architecture and notes the following information during the design workshops:
vSphere distributed switches (VDS) will be used for all vSphere clusters. Switch naming will be based on cluster name, resource

type function and switch number.

Port group naming will be based on function, role and VLAN number range.

Each host has two physical network cards each with two NIC ports:

- Card A aligns to vmnic0 and vmnic1

- Card B aligns to vmnic2 and vmnic3

The architecture must provide resilient network connections.

Management Services will use VLAN ID 43.

Virtual machines access VLAN ID 100.

The vSphere infrastructure will use a hyper-converged storage architecture.

How should the architect document the VDS physical design based on the noted information?

- A. vSwitch Prod_DVS_01 will have 4 uplinksPort group name "pg_mgmt_43"- uplink = vmnic0, vmnic2- teaming policy = active/passivePort group name "pg_VM_100"- uplink = vmnic1, vmnic3- teaming policy = active/passive
- B. vSwitch Prod_DVS_01 will have 4 uplinksPort group name "pg_mgmt"- uplink = vmnic0, vmnic2- teaming policy = active/passivePort group name "pg_VM"- uplink = vmnic1, vmnic3- teaming policy = active/passive
- C. vSwitch Prod_DVS_01 will have 4 uplinks Port group name "pg_mgmt_43"- uplink = vmnic0, vmnic1- teaming policy = active/passivePort group name "pg_VM_100"- uplink = vmnic2, vmnic3- teaming policy = active/passive
- D. vSwitch Prod_DVS_01 will have 2 uplinksPort group name "pg_mgmt_43"- uplink = vmnic0- teaming policy = active/passivePort group name "pg_VM_100"- uplink = vmnic1- teaming policy = active
/passive

Answer: A

NEW QUESTION # 19

An architect is tasked with planning the design of a new vSphere environment. When commissioned, this environment will be used to migrate an existing set of virtual machines.

An inventory of the existing infrastructure, including configured vCPU, RAM and storage sizes has been provided.

In order for each virtual machine to be migrated, which two data sources with peak and average utilization data are required for sizing- (Choose two.)

- A. %Ready
- B. Ballooned memory
- C. Disk Write latency
- D. IOPS
- E. CPU

Answer: D,E

Explanation:

For each system, capture peak and average utilization for the following items:

- CPU

- RAM

- IOPS

- Network utilization

https://sysarticles.com/vmware-vsphere-analyzing-the-current-state/

NEW QUESTION # 20

An architect is designing a solution for an environment with two types of resource profiles that must be virtualized. The first type consists of Tier 1 virtual machines that are disk I/O intensive, but do NOT require high CPU or memory. The second type consists of Tier 2 virtual machines that require a lower CPU and memory allocation and have minimal disk I/O.

Which design recommendation should the architect make for distributing the resource profiles?

- A. Run both resource profiles on the same cluster with the same host hardware platform.
- B. Run both resource profiles on the same cluster with host hardware that has fast CPU, large amounts of memory, and the fastest storage platform.
- C. Separate the two resource profiles into two clusters. The Tier 2 cluster will have faster CPU and more memory while the Tier 1 cluster will have slower CPU and less memory but more disk space.
- D. Separate the two resource profiles into two clusters. The Tier 1 cluster will have fast storage while the Tier 2 cluster will not.

Answer: A

Explanation:
Both resource profiles DO NOT require high CPU or memory, only a different level of disk IOPS.
We can use vSAN here to apply a storage policy to the the different tier VM's.

NEW QUESTION # 21
What is the main difference between workload and management clusters in vSphere design?

- A. Workload clusters are used for running virtual machines, while management clusters are used for vCenter Server and other management components.
- B. Workload clusters are deployed in multiple data centers, while management clusters are only used in a single data center.
- C. Workload clusters handle resource management, while management clusters focus on security and compliance.
- D. Workload clusters are only used for development environments, while management clusters are used for production environments.

Answer: A

NEW QUESTION # 22
Which feature enables live migration of a running virtual machine from one ESXi host to another with zero downtime?

- A. vMotion
- B. vSphere Fault Tolerance (FT)
- C. vSphere HA
- D. Storage vMotion

Answer: A

NEW QUESTION # 23
......

PassTorrent's braindumps provide you the gist of the entire syllabus in a specific set of questions and answers. These study questions are most likely to appear in the actual 3V0-21.23 exam. The Certification exams are actually set randomly from the database of 3V0-21.23. Thus most of the questions are repeated in exams and our experts after studying the previous exam have sorted out the most important questions and prepared dumps out of them. Hence 3V0-21.23 Dumps are a special feast for all the exam takers and sure to bring them not only 3V0-21.23 exam success but also maximum score.
