Realistic Braindump CIPT Free, CIPT Customized Lab Simulation

The CIPT practice exam we offered is designed with the real questions that will help you in enhancing your knowledge about the CIPT certification exam. Our online test engine will improve your ability to solve the difficulty of CIPT Real Questions and get used to the atmosphere of the formal test. Our experts created the valid CIPT study guide for most of candidates to help them get good result with less time and money.

IAPP Certified Information Privacy Technologist (CIPT) Sample Questions (Q238-Q243):

NEW QUESTION # 238

SCENARIO - Please use the following to answer the next question:

It should be the most secure location housing data in all of Europe, if not the world. The Global Finance Data Collective (GFDC) stores financial information and other types of client data from large banks, insurance companies, multinational corporations and governmental agencies. After a long climb on a mountain road that leads only to the facility, you arrive at the security booth. Your credentials are checked and checked again by the guard to visually verify that you are the person pictured on your passport and national identification card.

You are led down a long corridor with server rooms on each side, secured by combination locks built into the doors. You climb a flight of stairs and are led into an office that is lighted brilliantly by skylights where the GFDC Director of Security, Dr. Monique Batch, greets you. On the far wall you notice a bank of video screens showing different rooms in the facility. At the far end, several screens show different sections of the road up the mountain.

Dr. Batch explains once again your mission. As a data security auditor and consultant, it is a dream assignment: The GFDC does not want simply adequate controls, but the best and most effective security that current technologies allow.

"We were hacked twice last year," Dr. Batch says, "and although only a small number of records were stolen, the bad press impacted our business. Our clients count on us to provide security that is nothing short of impenetrable and to do so quietly. We hope to never make the news again." She notes that it is also essential that the facility is in compliance with all relevant security regulations and standards.

You have been asked to verify compliance as well as to evaluate all current security controls and security measures, including data encryption methods, authentication controls and the safest methods for transferring data into and out of the facility. As you prepare to begin your analysis, you find yourself considering an intriguing question: Can these people be sure that I am who I say I am?

You are shown to the office made available to you and are provided with system login information, including the name of the wireless network and a wireless key. Still pondering, you attempt to pull up the facility's wireless network, but no networks appear in the wireless list. When you search for the wireless network by name, however it is readily found. Why would you recommend that GFC use record encryption rather than disk, file or table encryption?

- **A. Record encryption is asymmetric, a stronger control measure.**
- B. Record encryption allows for encryption of personal data only.
- C. Record encryption involves tag masking, so its metadata cannot be decrypted.
- D. Record encryption is granular, limiting the damage of potential breaches.

Answer: A

NEW QUESTION # 239

What element is most conducive to fostering a sound privacy by design culture in an organization?

- **A. Gaining advocacy from senior management.**
- B. Frequent privacy and security awareness training for employees.
- C. Ensuring all employees acknowledge and understood the privacy policy.
- D. Monthly reviews of organizational privacy principles.

Answer: A

Explanation:

A strong privacy by design culture within an organization is best fostered when senior management advocates for and supports privacy initiatives. The IAPP documentation underscores that leadership commitment is crucial for establishing and maintaining a robust privacy program. Senior management advocacy ensures that privacy considerations are prioritized across the organization, leading to more effective implementation of privacy by design principles and a stronger overall privacy culture.

NEW QUESTION # 240

A retail store originally collected customer data in its app to provide coupons and special offers to those customers. The store now

wants to sell the customer data to product distributors in exchange for better wholesale pricing on its products. What is the best way for the store to proceed?

- A. Use an app pop-up to inform the user of the new use and obtain their consent before selling the data.
- B. Require the distributor to notify the customer of the data sale via email.
- C. Update the privacy notice in the app that allows the store to sell the customer data.
- D. Create an option in the app that allows the customer to opt-out of the data sale.

Answer: A

Explanation:

CIPT emphasizes purpose limitation and notice + consent when an organization wants to introduce a new, incompatible purpose for personal data.

In this scenario:

- * Original purpose: providing coupons/offers
- * New purpose: selling customer data to distributors
- * These purposes are not compatible under privacy principles
- * This triggers a requirement for fresh, explicit consent

CIPT, GDPR, OECD, NIST PF all emphasize:

A new or expanded use that materially changes the expectation of the user requires active, informed consent at the point of change.

Thus, the correct approach is:

- * Give just-in-time notice (pop-up)
- * Explain the new purpose (data sale)
- * Request explicit opt-in consent
- * Do not proceed without it

Why the other options are incorrect:

- * A: Shifts responsibility to the distributor - does not satisfy transparency or consent requirements.
- * B: Opt-out is insufficient for a new, high-risk use like selling personal data. Opt-in is required.
- * C: Updating the privacy notice alone is not enough - users must actively consent to a new purpose.

Correct: D

NEW QUESTION # 241

SCENARIO

Kyle is a new security compliance manager who will be responsible for coordinating and executing controls to ensure compliance with the company's information security policy and industry standards. Kyle is also new to the company, where collaboration is a core value. On his first day of new-hire orientation, Kyle's schedule included participating in meetings and observing work in the IT and compliance departments.

Kyle spent the morning in the IT department, where the CIO welcomed him and explained that her department was responsible for IT governance. The CIO and Kyle engaged in a conversation about the importance of identifying meaningful IT governance metrics. Following their conversation, the CIO introduced Kyle to Ted and Barney. Ted is implementing a plan to encrypt data at the transportation level of the organization's wireless network. Kyle would need to get up to speed on the project and suggest ways to monitor effectiveness once the implementation was complete. Barney explained that his short-term goals are to establish rules governing where data can be placed and to minimize the use of offline data storage.

Kyle spent the afternoon with Jill, a compliance specialist, and learned that she was exploring an initiative for a compliance program to follow self-regulatory privacy principles. Thanks to a recent internship, Kyle had some experience in this area and knew where Jill could find some support. Jill also shared results of the company's privacy risk assessment, noting that the secondary use of personal information was considered a high risk.

By the end of the day, Kyle was very excited about his new job and his new company. In fact, he learned about an open position for someone with strong qualifications and experience with access privileges, project standards board approval processes, and application-level obligations, and couldn't wait to recommend his friend Ben who would be perfect for the job.

Which data practice is Barney most likely focused on improving?

- A. Sharing
- B. Retention.
- C. Deletion
- D. Inventory.

Answer: B

NEW QUESTION # 242

SCENARIO

Looking back at your first two years as the Director of Personal Information Protection and Compliance for the Berry Country Regional Medical Center in Thorn Bay, Ontario, Canada, you see a parade of accomplishments, from developing state-of-the-art simulation based training for employees on privacy protection to establishing an interactive medical records system that is accessible by patients as well as by the medical personnel. Now, however, a question you have put off looms large: how do we manage all the data-not only records produced recently, but those still on hand from years ago? A data flow diagram generated last year shows multiple servers, databases, and work stations, many of which hold files that have not yet been incorporated into the new records system. While most of this data is encrypted, its persistence may pose security and compliance concerns. The situation is further complicated by several long-term studies being conducted by the medical staff using patient information. Having recently reviewed the major Canadian privacy regulations, you want to make certain that the medical center is observing them. You also recall a recent visit to the Records Storage Section, often termed "The Dungeon" in the basement of the old hospital next to the modern facility, where you noticed a multitude of paper records. Some of these were in crates marked by years, medical condition or alphabetically by patient name, while others were in undifferentiated bundles on shelves and on the floor. The back shelves of the section housed data tapes and old hard drives that were often unlabeled but appeared to be years old. On your way out of the dungeon, you noticed just ahead of you a small man in a lab coat who you did not recognize. He carried a batch of folders under his arm, apparently records he had removed from storage.

Which regulation most likely applies to the data stored by Berry Country Regional Medical Center?

- A. Personal Information Protection and Electronic Documents Act
- B. The Health Records Act 2001
- C. Health Insurance Portability and Accountability Act
- D. The European Union Directive 95/46/EC

Answer: A

NEW QUESTION # 243

.....

You have seen VCETorrent's IAPP CIPT Exam Training materials, it is time to make a choice. You can choose other products, but you have to know that VCETorrent can bring you infinite interests. Only VCETorrent can guarantee you 100% success. VCETorrent allows you to have a bright future. And allows you to work in the field of information technology with high efficiency.
