Adobe Journey Optimizer Business Practitioner Professional Sample Questions (Q16-Q21):

NEW QUESTION # 16

An email developer is building a data-driven email that must render a list of recommended products for a customer. The product data (name, image URL, price) is available as a `listString` (an array of objects) on the customer's profile.

When the developer tries to use the simple personalization picker to insert the product name, the field is disabled.

Why is this happening and what must be done?

- A. The field is disabled because the email template does not support list rendering.
- B. The field is disabled because lists cannot be used for personalization. The data must be flattened into separate attributes first.
- C. The field is disabled because the developer does not have the correct permissions to use list-type fields.
- **D. The field is disabled because `listString` fields can only be used in the advanced expression editor and require a "for each" loop to iterate through the items.**

Answer: D

NEW QUESTION # 17

An e-commerce manager is setting up the company's first real-time "abandoned cart" journey.
