Practice tests (desktop and web-based) are simulations of actual CompTIA 220-1101 PDF Questions designed to help individuals prepare and improve their performance for the CompTIA 220-1101 certification test. ITExamDownload facilitates the customers with customizable practice tests which means they can adjust the number of questions and set the time of the test according to themselves which will help them in order to feel the real-based exam pressure and control it.

CompTIA A+ Certification Exam: Core 1 Sample Questions (Q814-Q819):

NEW QUESTION # 814

A user reports that a software application functioned as expected the previous day, but this morning, the user is unable to launch the application. Which of the following describes what the technician should do next?

- A. Determine which steps need to be performed.
- B. Research the symptoms.
- C. Identify any changes the user has made.
- D. Check the vendor's website for guidance.

Answer: C

NEW QUESTION # 815

A technician is diagnosing several device issues reported by employees.

INSTRUCTIONS

Click on each device to review the issue. Then select the appropriate issue and solution from the drop-down menu. Each option may be used more than once.

☐

Answer:

Explanation:

☐

Explanation:

☐

NEW QUESTION # 816

A technician goes to a classroom to troubleshoot a projector that occasionally powers off. The technician recreates the issue and notices the projector will not power back on until approximately 15 minutes have passed. After 15 minutes of being powered on, the projector shuts off again. Which of the following should the technician perform NEXT to resolve the issue?

- A. Clean the filter.
- B. Replace the bulb.
- C. Check the power cable connection.
- D. Adjust the standby timeout.

Answer: A

Explanation:

Explanation

Based on the given information, it seems that the projector is experiencing issues with overheating or a faulty power supply. The fact that it shuts off and cannot be turned back on until it has cooled down for 15 minutes suggests that the projector is overheating or there is a problem with the power supply. Therefore, the next logical step would be to clean the filter to ensure proper ventilation and airflow, as a dirty filter can cause overheating.

NEW QUESTION # 817

A laser printer, which is located in a large office, has a leaky toner cartridge. Some toner spilled into the printer when the cartridge was removed. Which of the following is the best way to clean up the toner?

- A. Magnetic duster
- B. Compressed air
- C. ESD-safe vacuum
- D. Damp cloth

Answer: C

Explanation:

An ESD-safe vacuum is a special type of vacuum that has a filter that traps toner particles and prevents them from escaping into the air. An ESD-safe vacuum also has a grounding wire that prevents static electricity from building up and damaging the printer's components. Toner is electrically conductive and can cause short circuits or sparks if it contacts sensitive parts of the printer.

NEW QUESTION # 818

Which of the following should a technician use to terminate an RJ45 port?

- A. Punchdown tool
- B. Cable stripper
- C. Toner probe
- D. Cable tester

Answer: A

Explanation:

To terminate an RJ45 port, a technician should use a punchdown tool. This tool is specifically designed to insert and cut (terminate) the wires into a patch panel, keystone jack, or a network surface mount box. The punchdown tool ensures that the wire is properly seated in the terminal block and that the connection is secure.

It also trims the excess wire during the termination process, which is not a function that cable testers, toner probes, or cable strippers are designed to perform.
