## ATlassian Managing Jira Cloud Projects Sample Questions (Q56-Q61):

### NEW QUESTION # 56

The UX team uses a custom issue type named Design in your team-managed project. You want them to start entering the number of days spent and remaining on each of their issues. What field must you add to the Design issue type?

- A. Time stamp
- B. Date
- C. Date Time Picker
- **D. Time tracking**
- E. Estimation Statistic

**Answer: D**

Explanation:

The Time tracking field is required to allow users to enter the number of days (or time) spent and the remaining estimate on issues. Adding this field to the Design issue type enables tracking of effort in terms of logged and remaining time.

### NEW QUESTION # 57

You manage two team-managed Scrum projects. You want to create a single board that displays the progress of the active sprints in both projects and their burndown. Identify the correct board type to use.

- A. team-managed Kanban board
- B. team-managed Scrum board
- **C. company-managed Scrum board**
- D. company-managed Kanban board

**Answer: C**

Explanation:

A company-managed Scrum board can pull issues from multiple team-managed projects, allowing you to view and track the progress of active sprints and display a combined burndown. Team-managed boards are limited to a single project, so a company-managed board is required for cross-project visibility.

### NEW QUESTION # 58

Which of the following are false about the archived version? (Choose three.)

- **A. Issues in the archived version will be hidden from the Jira board.**
- **B. The archived issues can be released.**
- C. Users can directly move issues to the archived version.
- **D. Issues in the archived version will be hidden from the JQL search.**
- E. The archived version will be hidden from the Version Report.
- F. The archived version can be merged with other versions.

**Answer: A,B,D**

### NEW QUESTION # 59

Project administrators need the ability to send customized emails to various groups during workflow transitions. Which action can they perform in Jira?

- A. install Marketplace apps
- **B. build automation rules**
- C. update workflow configurations
- D. update notification schemes
- E. perform Edit Issues bulk operations

**Answer: B**

Explanation:

Project administrators can use automation rules to send customized emails during workflow transitions. This allows targeted communication to various groups without needing global admin rights, which are required for modifying notification schemes or installing apps.

### NEW QUESTION # 60

Your team uses a company-managed Kanban project and needs a way to categorize issues as follows:

# group issues by the project phase in which work will be started

# assign a fixed start date and end date to each phase

# move unresolved issues to the next phase

# view reports of resolved issues by phase

Which product feature should be used to categorize the issues?

- **A. versions**
- B. sprints
- C. components
- D. labels
- E. categories

**Answer: A**

Explanation:

Versions in a company-managed project are designed to represent project phases with fixed start and end dates, allow tracking of resolved and unresolved issues, and automatically move unresolved issues to the next version. They also support reporting by version, making them the best fit for this use case.

### NEW QUESTION # 61

.....
