## DA0-002 Related Certifications - Minimum DA0-002 Pass Score

The PDF4Test is committed to providing the best possible study material to succeed in the CompTIA Data+ Exam (DA0-002) exam. With actual PDF questions, customizable practice exams, and 24/7 support, customers can be confident that they are getting the best possible prep material. The PDF4Test DA0-002 is an excellent choice for anyone looking to advance their career with the certification. Buy Now.

## CompTIA Data+ Exam Sample Questions (Q39-Q44):

### NEW QUESTION # 39

A sales manager wants to understand how sales are trending year over year. Which of the following chart types is the most appropriate to display the information?

- A. Hierarchy
- B. Donut
- C. Bubble
- D. Line

**Answer: D**

Explanation:

This question falls under the Visualization and Reporting domain, focusing on selecting the appropriate visualization for a specific data trend. The task is to show sales trends over time (year over year).

\* Line (Option A): Line charts are ideal for displaying trends over time, such as year-over-year sales, as they clearly show changes and patterns across a continuous time axis.

\* Donut (Option B): Donut charts show proportions or percentages of a whole, not suitable for time-based trends.

\* Bubble (Option C): Bubble charts display three dimensions of data (e.g., size, x-axis, y-axis), not ideal for simple time trends.

\* Hierarchy (Option D): Hierarchy charts (e.g., treemaps) show nested relationships, not time-based trends.

The DA0-002 Visualization and Reporting domain emphasizes "translating business requirements to form the appropriate visualization," and a line chart is best for time-series trends.

### NEW QUESTION # 40

A data analyst encounters an issue with new software and a code that they are using. The analyst includes print statements in the code to try to identify the issue, without success. An informal peer review of the code also produces the same result. The analyst confirms that the software is updated to the latest version and compatible with the code. Which of the following troubleshooting steps should the analyst take next?

- A. Escalate to the department manager and ask for assistance.
- B. Use the old software and preexisting code, since both were functional.

- C. Research the issue online and see if a solution is available.
- D. Contact the IT department and inform them that the software has a bug.

**Answer: C**

#### NEW QUESTION # 41

Which of the following data repositories should a company use when structured data about the whole company needs to be stored in a predefined data structure?

- A. Data mart
- B. Data lake
- C. Data warehouse
- D. Data silo

**Answer: C**

Explanation:

A data warehouse is designed to store structured data from across an entire organization in a predefined schema. It integrates data from multiple sources, supports enterprise-wide reporting and analytics, and provides a consistent view of business information.

#### NEW QUESTION # 42

A data company needs a visualization that shows the availability zones from the last ten years and any future availability zones that the company will be using in the next five years. Which of the following is the most appropriate visualization to display this information?

- A. Map
- B. Mosaic plot
- C. Pie chart
- D. Bar chart

**Answer: A**

Explanation:

This question falls under the Visualization and Reporting domain of CompTIA Data+ DA0-002, focusing on selecting the appropriate visualization for a specific dataset. The task is to show availability zones over a 15- year period (past and future), which involves a geographical element since availability zones are typically location-based.

\* Bar chart (Option A): Bar charts are good for comparing categorical data but don't effectively show geographical locations or time-based trends across zones.

\* Mosaic plot (Option B): Mosaic plots display relationships between categorical variables, not suitable for geographical or time-series data.

\* Map (Option C): A map can display availability zones geographically, with annotations or layers to show changes over time (past 10 years and future 5 years), making it the most appropriate visualization.

\* Pie chart (Option D): Pie charts show proportions of a whole, not suitable for geographical or time- based data.

The DA0-002 Visualization and Reporting domain emphasizes "translating business requirements to form the appropriate visualization," and a map is the best choice for displaying geographical availability zones over time.

#### NEW QUESTION # 43

A data analyst is evaluating all conditions in a query. Which of the following is the best logical function to accomplish this task?

- A. OR
- B. AND
- C. IF
- D. NOT

**Answer: B**

Explanation:
