

2V0-16.25 Torrent Vce - 2V0-16.25 Certking Pdf & 2V0-16.25 Free Questions

With the number of people who take the exam increasing, the 2V0-16.25 exam has become more and more difficult for many people. A growing number of people have had difficulty in preparing for the 2V0-16.25 exam, and they have a tendency to turn to the study materials. However, a lot of people do not know how to choose the suitable study materials. We are willing to recommend the 2V0-16.25 Study Materials from our company to you.

VMware 2V0-16.25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Deploy, Configure, and Operate VMware vSphere Foundation (VVF): This section of the exam measures the expertise of Data Center Administrators and emphasizes hands-on skills in deploying and configuring VMware vSphere Foundation environments. Candidates must understand the components of a VVF deployment, configure Supervisors within clusters, and manage identity, access control, licensing, and certificate management. The objectives also extend to lifecycle management within the vSphere Foundation. Furthermore, it explores operational tasks including monitoring and analyzing logs, configuring alerting, managing dashboards, and integrating with VMware Cloud Foundation (VCF) Operations. Candidates will also be tested on cost and pricing configuration, compliance monitoring, and security hardening practices. Finally, automation skills are validated through deploying services with Supervisors, running Kubernetes workloads, using VM services, and integrating VCF Operations Orchestrator to support enterprise automation.
Topic 2	<ul style="list-style-type: none">• IT Architectures, Technologies, Standards: This section of the exam measures the understanding of IT Infrastructure Architects and covers foundational concepts of architectures, emerging technologies, and industry standards. Although no testable objectives are listed here, it establishes the baseline knowledge needed to interpret and design VMware-related environments effectively.

Topic 3	<ul style="list-style-type: none"> • Troubleshoot and Optimize the VMware Solution: This section of the exam measures the ability of Systems Engineers to troubleshoot and optimize VMware-based environments. While no explicit testable objectives are listed, candidates are expected to apply their problem-solving skills to diagnose, resolve, and enhance VMware solutions for improved reliability and performance.
Topic 4	<ul style="list-style-type: none"> • VMware vSphere Foundation Fundamentals: This section of the exam measures the skills of Virtualization Engineers and focuses on the essentials of virtualization technology. It introduces the principles of virtualization, explores use cases, and highlights the value it brings to businesses. Candidates are expected to demonstrate knowledge of VMware compute components such as vCenter and ESX, cluster configuration, and lifecycle management of virtual machines. It also covers secure workload operations, encryption, and managing resources with content libraries. In addition, storage fundamentals are examined through configuring vSphere storage, deploying VMware vSAN clusters, defining storage policies, and ensuring data availability. Networking fundamentals are also introduced, requiring the ability to differentiate between VMware vSphere networking components.
Topic 5	<ul style="list-style-type: none"> • Plan and Design the VMware by Broadcom Solution: This section of the exam measures the ability of VMware Solution Architects to plan and design solutions. While there are no specific testable objectives included, the focus is on preparing professionals to design VMware-based solutions that align with organizational goals and best practices.

Latest 2V0-16.25 Braindumps Pdf | 2V0-16.25 Reliable Exam Papers

Our VMware 2V0-16.25 exam guide has not equivocal content that may confuse exam candidates. All question points of our VMware vSphere Foundation 9.0 Administrator 2V0-16.25 study quiz can dispel your doubts clearly. Get our VMware vSphere Foundation 9.0 Administrator 2V0-16.25 Certification actual exam and just make sure that you fully understand it and study every single question in it by heart.

VMware vSphere Foundation 9.0 Administrator Sample Questions (Q22-Q27):

NEW QUESTION # 22

An administrator needs to enable the enhanced capabilities of Storage Operations for vSAN 9.0 in VMware Cloud Foundation (VCF) Operations.

What three prerequisite steps must be completed in order to enable the advanced Diagnostic Troubleshooting, Benchmarking and Optimizing?

(Choose three.)

- A. Assign the VCF Operations Service Account administrative rights to vSAN Objects.
- **B. Configure a vSAN account for the vCenter Integration Instance.**
- **C. Assign the credentials configured in the vCenter Integration instance have access to vSAN objects.**
- **D. Enable and start the vSAN Performance service in the target vCenter.**
- E. No configuration required, Run New Diagnostics is enabled automatically.
- F. Open port 5989 on each VCF Operations node on which the vSAN adapter exists.

Answer: B,C,D

Explanation:

To enable enhanced capabilities of Storage Operations for vSAN 9.0 in VCF Operations (Diagnostic Troubleshooting, Benchmarking, and Optimizing), administrators must complete several prerequisites that ensure vSAN health, performance, and permissions are properly set up.

- * Enable and start the vSAN Performance service in the target vCenter (B):
- * The vSAN Performance Service must be enabled for cluster-level monitoring.
- * This provides the telemetry data needed for diagnostic and benchmarking capabilities in VCF Operations.
- * Without enabling this service, no performance metrics can be collected.
- * Configure a vSAN account for the vCenter Integration Instance (C):

- * A dedicated vSAN service account must be configured so that VCF Operations can communicate with vCenter for vSAN data collection.
- * This ensures secure and role-specific access for monitoring operations.
- * Assign the credentials configured in the vCenter Integration instance to have access to vSAN objects (E):
- * The credentials used in the vCenter integration must have the required privileges to access vSAN objects (such as datastore, cluster objects, and health checks).
- * This ensures that VCF Operations can run diagnostics, benchmarking, and optimization functions without permission errors.

Why the other options are incorrect:

- * A. No configuration required, Run New Diagnostics is enabled automatically:#Incorrect. Configuration is required before these advanced features can be enabled.
- * D. Assign the VCF Operations Service Account administrative rights to vSAN Objects:#Too broad and not a best practice. Instead, specific rights via the vCenter integration account (option E) are recommended.
- * F. Open port 5989 on each VCF Operations node on which the vSAN adapter exists:#Not required for enabling vSAN advanced diagnostics in VCF 9.0. vSAN operations rely on vCenter connectivity, not direct port 5989.

NEW QUESTION # 23

An administrator is tasked to create a new view in VMware Cloud Foundation (VCF) Operations to monitor CPU demand on ESX hosts, including the historical and forecast data.

Which view type is appropriate to display such information?

- A. Table
- B. Text
- C. Distribution
- **D. Trend**

Answer: D

Explanation:

In VCF Operations, when monitoring metrics like CPU demand across ESX hosts, including historical usage and forecast data, the best visualization is a Trend view.

- * Trend views display data over time, showing both past and predicted future behavior.
- * This makes them ideal for capacity planning, performance forecasting, and demand analysis.
- * Table (A) # Shows raw values but lacks predictive visualization.
- * Distribution (B) # Useful for comparing values across objects but not for time-based or forecasted trends.
- * Text (C) # Displays static values or metrics, not historical/forecasting data.

VMware Cloud Foundation 9.0 Operations Guide -Creating Views (Trend, Distribution, Table, Text) VMware Docs: vRealize Operations - Creating Views

NEW QUESTION # 24

An administrator is tasked with developing an automated, repeatable process to:

- * Connect to the corporate Active Directory and create a Windows computer object in a defined Organizational Unit.
- * Connect to the target vCenter and create a Windows VM from a template.
- * Power on the VM and join it to the corporate domain.

Which VMware vSphere Foundation (VVF) component is best suited for this task?

- **A. VCF Operations Orchestrator**
- B. vSphere Supervisor
- C. VCF CLI
- D. VCF Operations

Answer: A

Explanation:

The scenario describes an automated, repeatable workflow:

- * Create an AD computer object.

- * Deploy a VM from a template.
- * Power on the VM and join domain.

The correct tool is VCF Operations Orchestrator (formerly vRealize Orchestrator), which:

- * Provides automation and integration with Active Directory and vCenter APIs.
- * Can execute workflows for VM provisioning and domain joining.

Other options:

- * A. vSphere Supervisor# Kubernetes workload management, not AD/VM automation.
- * B. VCF Operations# Monitoring and analytics, not workflow automation.
- * C. VCF CLI# Useful for manual scripting but not suited for automated workflows.

NEW QUESTION # 25

An administrator is tasked to deploy a large-scale VDI environment on a VMware vSAN Original Storage Architecture (OSA) cluster.

Which vSAN feature is required to achieve maximum storage space reduction in this cluster?

- A. Object space reservation.
- **B. Deduplication and Compression.**
- C. Compression only.
- D. Disable Object Checksum.

Answer: B

Explanation:

In vSAN Original Storage Architecture (OSA) cluster, the feature that provides the maximum storage space reduction is Deduplication and Compression.

- * Deduplication removes duplicate blocks across the cluster.
- * Compression further reduces the space used by unique blocks.
- * These are applied at the disk group level and are essential in VDI environments where identical VM images consume space.

Why others are incorrect:

- * A. Disable Object Checksum# Only reduces CPU overhead, not storage space.
- * C. Object space reservation# Controls reserved capacity, not reduction.
- * D. Compression only# Reduces space, but less than Deduplication + Compression combined.

NEW QUESTION # 26

An administrator has successfully deployed the VMware Cloud Foundation (VCF) Installer appliance to begin a new VMware vSphere Foundation (VVF) deployment. The VMware ESX hosts are powered on and meet all hardware and connectivity prerequisites.

What is the next step to begin deploying vSphere Foundation?

- **A. Launch the VCF Installer deployment wizard.**
- B. Manually deploy the vCenter Server Appliance.
- C. Install SDDC Manager using the VCF Installer.
- D. Enable SSH on all ESX hosts.

Answer: A

Explanation:

After successfully deploying the VCF Installer appliance, and ensuring ESXi hosts are powered on and meet prerequisites, the next steps to:

- * Launch the VCF Installer deployment wizard, which guides administrators through host onboarding, vCenter deployment, and cluster setup for vSphere Foundation.

Other options:

- * A. Enable SSH on all ESX hosts# Not required unless troubleshooting.

- * C. Install SDDC Manager using VCF Installer# Only applies to full Cloud Foundation, not vSphere Foundation deployment.
- * D. Manually deploy vCenter Server Appliance# The Installer wizard automates this.
