Salesforce Certified Identity and Access Management Architect Sample Questions (Q238-Q243):

NEW QUESTION # 238

Northern Trail Outfitters (NTO) wants to improve its engagement with existing customers to boost customer loyalty. To get a better understanding of its customers, NTO establishes a single customer view including their buying behaviors, channel preferences and purchasing history. All of this information exists but is spread across different systems and formats.

NTO has decided to use Salesforce as the platform to build a 360 degree view. The company already uses Microsoft Active Directory (AD) to manage its users and company assets.

What should an Identity Architect do to provision, deprovision and authenticate users?

- A. Salesforce Identity is included in the Salesforce licenses so it does not need to be considered separately.
- **B. A Salesforce Identity can be included but NTO will require Identity Connect.**
- C. Salesforce Identity can be included but NTO will be required to build a custom integration with Microsoft AD.
- D. Salesforce Identity is not needed since NTO uses Microsoft AD.

Answer: B

Explanation:

Explanation

Identity Connect is a Salesforce product that integrates Microsoft Active Directory with Salesforce user records. It allows provisioning, deprovisioning, and authentication of users based on AD data. The other options are either incorrect or irrelevant for this use case. References: Get to Know Identity Connect, Identity Connect

NEW QUESTION # 239

After a recent audit, universal containers was advised to implement Two-factor Authentication for all of their critical systems, including salesforce. Which two actions should UC consider to meet this requirement?

Choose 2 answers

- A. Require users to supply their email and phone number, which gets validated.
- **B. Require users to provide their RSA token along with their credentials.**
- **C. Require users to use a biometric reader as well as their password**
- D. Require users to enter a second password after the first Authentication

Answer: B,C

NEW QUESTION # 240

Universal Containers (UC) has decided to replace the homegrown customer portal with Salesforce Experience Cloud. UC will continue to use its third-party single sign-on (SSO) solution that stores all of its customer and partner credentials.

The first time a customer logs in to the Experience Cloud site through SSO, a user record needs to be created automatically. Which solution should an identity architect recommend in order to automatically provision users in Salesforce upon login?

- **A. Just-in-Time (JIT) provisioning**
- B. Third-party AppExchange solution
- C. Custom login flow and Apex handler
- D. Custom middleware and web services

Answer: A

Explanation:

Explanation

Just-in-Time (JIT) provisioning is a feature that allows Salesforce to create or update user records on the fly when users log in through an external identity provider. This eliminates the need for manual or batch user provisioning in Salesforce. References: Just-in-Time Provisioning for SAML and OpenID Connect, Identity

101: Design Patterns for Access Management

NEW QUESTION # 241

The CIO of universal containers(UC) wants to start takingadvantage of the refresh token capability for the UC applications that utilize Oauth 2.0. UC has listed an architect to analyze all of the applications that use Oauth flows to. See where refresh Tokens canbe applied. Which two OAuth flows should the architect consider in their evaluation? Choose 2 answers

- **A. User-Agent**
- B. Jwt bearer token
- **C. Web server**
- D. Username-password

Answer: A,C

Explanation:

The two OAuth flows that support refresh tokens are Web server and User-Agent. According to the Salesforce documentation2, "The webserver authentication flow and user-agent flow both provide a refresh token that can be used to get a new access token." Therefore, option A and C are the correct answers.
