

JN0-336 Training Tools | Exam JN0-336 Prep

The latest JN0-336 exam torrent covers all the qualification exam simulation questions in recent years, including the corresponding matching materials at the same time. Do not have enough valid JN0-336 practice materials, can bring inconvenience to the user, such as the delay progress, learning efficiency and to reduce the learning outcome was not significant, these are not conducive to the user persistent finish learning goals. Therefore, to solve these problems, the JN0-336 test material is specially designed for you to pass the JN0-336 exam.

As long as you study with our JN0-336 exam braindumps, the benefits are more than you can consider, you are bound to pass the JN0-336 exam, let along various opportunities like getting promotion, being respected by surrounding people on your profession's perspective. All those beneficial outcomes come from your decision of our JN0-336 simulating questions. We are willing to be your side offering whatever you need compared to other exam materials that malfunctioning in the market.

Exam JN0-336 Prep | JN0-336 Exam Vce

Preparing for Security, Specialist (JNCIS-SEC) (JN0-336) exam can be a challenging task, especially when you're already juggling multiple responsibilities. People who don't study with updated Juniper JN0-336 practice questions fail the test and lose their resources. If you don't want to end up in this unfortunate situation, you must prepare with actual and Updated JN0-336 Dumps of Real4exams. At Real4exams, we believe that one size does not fit all when it comes to Juniper JN0-336 exam preparation.

Juniper Security, Specialist (JNCIS-SEC) Sample Questions (Q90-Q95):

NEW QUESTION # 90

Exhibit

Exhibit

```

(primary:node0)
user@node0> show chassis cluster status
...
Cluster ID: 1
Node    Priority Status          Preempt Manual  Monitor-failures

Redundancy group: 0 , Failover count: 1
node0  200      primary          no      no      None
node1   0       lost            n/a     n/a     n/a

Redundancy group: 1 , Failover count: 1
node0   0       primary          no      no      None
node1   0       lost            n/a     n/a     n/a

(primary:node1)
user@node1> show chassis cluster status
...
Cluster ID: 1
Node    Priority Status          Preempt Manual  Monitor-failures

Redundancy group: 0 , Failover count: 1
node0   0       lost            n/a     n/a     n/a
node1   1       primary         no      no      None

Redundancy group: 1 , Failover count: 5
node0   0       lost            n/a     n/a     n/a
node1   1       primary         no      no      None

```

Referring to the exhibit, what do you determine about the status of the cluster.

- A. There are no issues with the cluster.
- B. Both nodes determine that they are in a primary state.
- C. Node 2 is down.
- **D. Node 1 is down**

Answer: D

NEW QUESTION # 91

Which two statements are true about application identification? (Choose two.)

- **A. Application identification can identify nested applications that are within Layer 7.**
- B. Application signatures are the same as IDP signatures.
- C. Application identification cannot identify nested applications that are within Layer 7.
- **D. Application signatures are not the same as IDP signatures.**

Answer: A,D

Explanation:

Application identification is a feature that enables SRX Series devices to identify and classify network traffic based on application signatures or custom rules. Application identification can enhance security, visibility, and control over network applications.

Two statements that are true about application identification are:

Application identification can identify nested applications that are within Layer 7: Nested applications are applications that run within another application protocol, such as HTTP or SSL. For example, Facebook or YouTube are nested applications within HTTP. Application identification can identify nested applications by inspecting the application payload and matching it against predefined or custom signatures.

Application signatures are not the same as IDP signatures: Application signatures are patterns of bytes or strings that uniquely identify an application protocol or a nested application. IDP signatures are patterns of bytes or strings that indicate an attack or an exploit against a vulnerability. Application signatures are used for application identification and classification, while IDP signatures are used for intrusion detection and prevention.

NEW QUESTION # 92

Your manager asks you to provide firewall and NAT services in a private cloud. Which two solutions will fulfill the minimum requirements for this deployment? (Choose two.)

- A. a vSRX for firewall services and a separate vSRX for NAT services
- B. a cSRX for firewall services and a separate cSRX for NAT services
- C. a single cSRX
- D. a single vSRX

Answer: C,D

Explanation:

A single vSRX instance is capable of handling both firewall and NAT services simultaneously. This solution provides a streamlined and resource-efficient way to secure and manage network traffic within a private cloud environment.

Similar to the vSRX, a single cSRX can also provide both firewall and NAT services. The cSRX, being a containerized version of the SRX, is particularly suited for environments where high density and microservices architectures are used, offering high performance in a compact form factor.

NEW QUESTION # 93

Which solution enables you to create security policies that include user and group information?

- A. ATP Appliance
- B. Network Director
- C. JIMS
- D. NETCONF

Answer: C

Explanation:

The solution that enables you to create security policies that include user and group information is JIMS (Juniper Identity Management Service). JIMS collects and maintains a large database of user, device, and group information from Active Directory domains or syslog sources, and enables SRX Series devices to rapidly identify thousands of users in a large, distributed enterprise. With JIMS, you can create security policies that include user and group information, and enforce user-based access control policies to protect network resources.

NEW QUESTION # 94

You want to control when cluster failovers occur.

In this scenario, which two specific parameters would you configure on an SRX Series device? (Choose two.)

- A. heartbeat-address
- B. heartbeat-threshold
- C. heartbeat-interval
- D. heartbeat-cos

Answer: B,C

Explanation:

To control when cluster failovers occur, you need to configure two specific parameters on an SRX Series device: heartbeat-interval and heartbeat-threshold. These parameters determine how often the nodes in a cluster exchange heartbeat messages and how many consecutive heartbeats can be missed before a failover is triggered. The heartbeat-interval specifies the time interval in seconds between each heartbeat message. The default value is 1 second and the range is from 0.1 to 10 seconds. The heartbeat-threshold specifies the number of consecutive heartbeats that must be missed before a failover occurs.

The default value is 3 and the range is from 2 to 255.

NEW QUESTION # 95

.....

Our Security, Specialist (JNCIS-SEC) (JN0-336) practice exam simulator mirrors the Security, Specialist (JNCIS-SEC) (JN0-336) exam experience, so you know what to anticipate on Security, Specialist (JNCIS-SEC) (JN0-336) certification exam day. Our Security, Specialist (JNCIS-SEC) (JN0-336) practice test software features various question styles and levels, so you can customize your Juniper JN0-336 exam questions preparation to meet your needs.

Exam JN0-336 Prep: https://www.real4exams.com/JN0-336_braindumps.html

If there is any update of JN0-336 exam pdf, we will notify you by mail, We are always working on updating the latest JN0-336 questions and providing the correct JN0-336 answers to all of our users, Our JN0-336 exam questions have helped a large number of candidates pass the JN0-336 exam yet, So we prepared top JN0-336 pdf torrent including the valid questions and answers written by our certified professionals for you.

Furthermore, when you are comfortable enough to trade, you need JN0-336 to have patience to do the trading itself, In other cases it is used to fix exposure and lighting problems on the set.

If there is any update of JN0-336 Exam PDF, we will notify you by mail, We are always working on updating the latest JN0-336 questions and providing the correct JN0-336 answers to all of our users.

JN0-336 Training Tools Pass Certify | Reliable Exam JN0-336 Prep: Security, Specialist (JNCIS-SEC)

Our JN0-336 exam questions have helped a large number of candidates pass the JN0-336 exam yet, So we prepared top JN0-336 pdf torrent including the valid questions and answers written by our certified professionals for you.

We strongly believe that our JN0-336 practice quiz will conquer you.
