SAP C_ACT_2403 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Transition Path “System Conversion” and “Selective Data Transition”: This section of the exam measures skills of Implementation Consultants and deals with converting existing SAP systems to S• 4HANA or migrating selected data. It tests knowledge of conversion strategies, migration tools, and how to handle legacy data while minimizing disruption.
Topic 2	<ul style="list-style-type: none">• Workstreams Overview: This section of the exam measures skills of Implementation Consultants and gives an overview of the key workstreams in a SAP Activate project. It presents how different streams such as configuration, integration, testing, and governance interact across the project lifecycle.
Topic 3	<ul style="list-style-type: none">• Transition Path “New Implementation SAP S• 4HANA Cloud, public edition”: This section of the exam measures skills of Implementation Consultants and lays out the approach for new cloud-based S• 4HANA projects. It focuses on tasks, activities, and strategies specific to deploying S• 4HANA in a public cloud environment using Activate.
Topic 4	<ul style="list-style-type: none">• Transition Path “New Implementation SAP S• 4HANA On Premise”: This section of the exam measures skills of SAP Project Managers and covers the transition path for on-premise deployments. It describes how to apply Activate principles for a fresh install on the organization’s own infrastructure, considering constraints and configurations.
Topic 5	<ul style="list-style-type: none">• Transition Path Private and Public Cloud: This section of the exam measures skills of SAP Project Managers and covers hybrid and pure cloud deployment options. It compares and contrasts strategies for private and public cloud paths and how to choose the right one given business, technical, and operational requirements.

SAP Certified Associate - Project Manager - SAP Activate Sample Questions (Q52-Q57):

NEW QUESTION # 52

You are implementing SAP S/4HANA Cloud, public edition for your customer. How are your customer systems activated?

- A. Via the Central Business Configuration System
- B. Via the SAP Contact Center
- C. Via the SAP Cloud ALM
- D. Via the SAP Business Technology Platform

Answer: A

Explanation:

* C is correct because the Central Business Configuration System (CBC) is a tool that enables customers to activate their SAP S/4HANA Cloud, public edition systems by following guided steps and entering configuration data. Verified References:

* : Central Business Configuration Overview

NEW QUESTION # 53

Which of the following is the customer's responsibility in both on-premise and private cloud scenarios?

- A. Servers
- B. Middleware
- C. Database
- D. Operating system

Answer: A

Explanation:

In both on-premise and private cloud environments, customers are responsible for maintaining physical or virtual servers. While cloud providers may manage other infrastructure components, server maintenance is generally a customer responsibility in private cloud or on-premise settings.

NEW QUESTION # 54

What can you find in the SAP Fiori apps reference library? Note: There are 3 correct answers to this question.

- A. Related app recommendations based on your usage profile
- B. Shortcut to the Maintenance Planner tool to establish the technical update path
- C. Shortcut to the Quicksizer tool to estimate hardware requirements
- D. Installation and configuration requirements for selected apps
- E. Related app-specific solution design guidelines

Answer: A,D,E

Explanation:

The SAP Fiori apps reference library provides app recommendations, installation and configuration requirements, and solution design guidelines. It serves as a comprehensive resource for information about SAP Fiori apps to support implementation and customization.

NEW QUESTION # 55

What criteria does the product owner use to sequence the backlog? Note: There are 2 correct answers to this question.

- A. Complexity of the story
- **B. Technical dependencies**
- C. Release planning schedule
- **D. Business priority**

Answer: B,D

Explanation:

* A is correct because technical dependencies are one of the criteria that the product owner uses to sequence the backlog.

Technical dependencies are the relationships between user stories that affect their order of implementation. For example, some user stories may require other user stories to be completed first, or some user stories may have a common prerequisite or constraint.

* C is correct because business priority are one of the criteria that the product owner uses to sequence the backlog. Business priority is the measure of how important and valuable a user story is for the customer and the stakeholders. The product owner decides which user stories are more urgent and beneficial, and places them higher in the backlog. Verified References:

* : Product Backlog

NEW QUESTION # 56

Which of the following capabilities does SAP Solution Manager Test Suite support? Note: There are 2 correct answers to this question.

- A. Load and volume testing
- B. Multi-technology change impact analysis
- **C. Manual and automated functional tests**
- **D. Tests for SAP and non-SAP solutions**

Answer: C,D

Explanation:

* B is correct because tests for SAP and non-SAP solutions are one of the capabilities that SAP Solution Manager Test Suite supports. The Test Suite allows customers to create and execute manual and automated tests for both SAP and non-SAP solutions using a single tool. The Test Suite integrates with various testing tools from SAP and partners to support different types of testing scenarios.

* C is correct because manual and automated functional tests are one of the capabilities that SAP Solution Manager Test Suite supports. The Test Suite enables customers to perform manual testing based on test case descriptions or automated testing using test scripts. The Test Suite supports various test automation frameworks such as Component Based Test Automation (CBTA), Tricentis Test Automation (TTA), eCATTs, HP QuickTest Professional (QTP), Worksoft Certify, IBM Rational Functional Tester (RFT), Selenium WebDriver, etc. Verified References:

* : Test Suite

* : Test Management
