Exam N10-009 Training - 100% Pass Quiz 2026 N10-009: First-grade Reliable CompTIA Network+ Certification Exam Test Topics

You may urgently need to attend N10-009 certificate exam and get the certificate to prove you are qualified for the job in some area. If you buy our N10-009 study materials you will pass the test almost without any problems. Our N10-009 study materials boost high passing rate and hit rate so that you needn't worry that you can't pass the test too much. To further understand the merits and features of our N10-009 Practice Engine you could look at the introduction of our product in detail.

CompTIA Network+ Certification Exam Sample Questions (Q363-Q368):**NEW QUESTION # 363**

Which of the following is most likely responsible for the security and handling of personal data in Europe?

- A. SCADA
- **B. GDPR**
- C. PCI DSS
- D. SAML

Answer: B

Explanation:

Definition of GDPR:

General Data Protection Regulation (GDPR) is a regulation in EU law on data protection and privacy for all individuals within the European Union and the European Economic Area. It also addresses the transfer of personal data outside the EU and EEA areas.

Scope and Objectives:

GDPR aims to give individuals control over their personal data and to simplify the regulatory environment for international business by unifying the regulation within the EU.

It enforces rules about data protection, requiring companies to protect the personal data and privacy of EU citizens for transactions that occur within EU member states.

NEW QUESTION # 364

A technician is troubleshooting a computer issue for a user who works in a new annex of an office building.

The user is reporting slow speeds and intermittent connectivity. The computer is connected via a Cat 6 cable to a distribution switch that is 492ft (150m) away. Which of the following should the technician implement to correct the issue?

- A. Run a Cat 7 cable from the computer to the distribution switch.
- B. Enable the computer to support jumbo frames.
- C. Increase the bandwidth allocation to the computer.
- **D. Install an access switch in the annex and run fiber to the distribution switch.**

Answer: D

Explanation:

The maximum recommended length for Ethernet cable runs is 100 meters (328 feet). At 150 meters, the Cat 6 cable is too long, causing signal degradation and connectivity issues. Running fiber from the distribution switch to an access switch in the annex will allow for reliable connectivity over longer distances, as fiber can cover greater distances without signal loss. (Reference: CompTIA Network+ Study Guide, Chapter on Network Cable Standards)

NEW QUESTION # 365

A technician is troubleshooting a computer issue for a user who works in a new annex of an office building. The user is reporting slow speeds and intermittent connectivity. The computer is connected via a Cat 6 cable to a distribution switch that is 492ft (150m)

away. Which of the following should the technician implement to correct the issue?

- A. Run a Cat 7 cable from the computer to the distribution switch.
- B. Enable the computer to support jumbo frames.
- C. Increase the bandwidth allocation to the computer.
- **D. Install an access switch in the annex and run fiber to the distribution switch.**

Answer: D

Explanation:

The maximum recommended length for Ethernet cable runs is 100 meters (328 feet). At 150 meters, the Cat 6 cable is too long, causing signal degradation and connectivity issues. Running fiber from the distribution switch to an access switch in the annex will allow for reliable connectivity over longer distances, as fiber can cover greater distances without signal loss.

NEW QUESTION # 366

A network engineer is completing a new VoIP installation, but the phones cannot find the TFTP server to download the configuration files. Which of the following DHCP features would help the phone reach the TFTP server?

- A. Exclusions
- B. Scope
- C. Lease time
- **D. Options**

Answer: D

Explanation:

DHCP Options: DHCP options allow additional configuration parameters, such as the address of a TFTP server, to be provided to clients during the DHCP lease process. This is essential for VoIP phones to locate the server for configuration files.

Exclusions (A): Prevents certain IP addresses from being assigned by DHCP but does not direct devices to servers.

Lease time (B): Determines how long an IP address is assigned but does not impact TFTP settings.

Scope (D): Defines a range of IP addresses but does not include additional server information.

Reference: CompTIA Network+ Official Study Guide, Domain 1.3 (DHCP Configuration).

NEW QUESTION # 367

SIMULATION

You have been tasked with setting up a wireless network in an office. The network will consist of 3 Access Points and a single switch. The network must meet the following parameters:

The SSIDs need to be configured as CorpNet with a key of S3cr3t!

The wireless signals should not interfere with each other

The subnet the Access Points and switch are on should only support 30 devices maximum The Access Points should be configured to only support TKIP clients at a maximum speed INSTRUCTIONS Click on the wireless devices and review their information and adjust the settings of the access points to meet the given requirements.

If at any time you would like to bring back the initial state of the simulation, please click the Reset All button.
