Using the 312-85 Exam Questions to get pass

BONUS!!! Download part of Dumpleader 312-85 dumps for free: https://drive.google.com/open?id=1MjcFI6PSLrP-ZteIT9SN6bt2x1SPH0A9

If you have a faith, then go to defend it. Gorky once said that faith is a great emotion, a creative force. My dream is to become a top IT expert. I think that for me is nowhere in sight. But to succeed you can have a shortcut, as long as you make the right choice. I took advantage of Dumpleader's ECCouncil 312-85 exam training materials, and passed the ECCouncil 312-85 Exam. Dumpleader ECCouncil 312-85 exam training materials is the best training materials. If you're also have an IT dream. Then go to buy Dumpleader's ECCouncil 312-85 exam training materials, it will help you achieve your dreams.

Might it be said that you are enthused about drifting through the Certified Threat Intelligence Analyst on the chief endeavor? Then, you are at the ideal locale for ECCouncil 312-85 exam. ECCouncil 312-85 Dumps gives you the most recent review material that has been figured out for you to pass the ECCouncil 312-85 on the key endeavor. Dumpleader is moving these days and is essential to finding a tremendous compensation calling. Different promising beginners stand around inactively and cash due to including an invalid prep material for the ECCouncil 312-85 exam.

312-85 Practice Exam Materials: Certified Threat Intelligence Analyst and 312-85 Study Guide - Dumpleader

We provide three versions of 312-85 study materials to the client and they include PDF version, PC version and APP online version. Different version boosts own advantages and using methods. The content of 312-85 exam torrent is the same but different version is suitable for different client. For example, the PC version of 312-85 Study Materials supports the computer with Windows system and its advantages includes that it simulates real operation 312-85 exam environment and it can simulates the exam and you can attend time-limited exam on it. Most candidates liked and passed with this version.

ECCouncil Certified Threat Intelligence Analyst Sample Questions (Q52-Q57):

NEW QUESTION # 52
Sam works as an analyst in an organization named InfoTech Security. He was asked to collect information from various threat intelligence sources. In meeting the deadline, he forgot to verify the threat intelligence sources and used data from an open-source data provider, who offered it at a very low cost. Through it was beneficial at the initial stage but relying on such data providers can produce unreliable data and noise putting the organization network into risk.
What mistake Sam did that led to this situation?

- A. Sam used unreliable intelligence sources.
- B. Sam did not use the proper technology to use or consume the information.
- C. Sam did not use the proper standardization formats for representing threat data.
- D. Sam used data without context.

Answer: B

NEW QUESTION # 53
Jack is a professional hacker who wants to perform remote exploitation on the target system of an organization. He established a two-way communication channel between the victim's system and his server.
He used encryption techniques to hide the presence of a communication channel on a victim's system and further applied privilege escalation techniques to exploit the system.
What phase of the cyber kill chain methodology is Jack currently in?

- A. Weaponization
- B. Delivery
- C. Command and Control
- D. Reconnaissance

Answer: C

Explanation:
In the Cyber Kill Chain model, the Command and Control (C2) phase refers to the stage where the attacker establishes a communication channel between the compromised system and their own server to maintain remote control, issue commands, and exfiltrate data.
In the given scenario, Jack has already compromised the system and set up a two-way communication link, which is encrypted to avoid detection. This activity is characteristic of the Command and Control phase.
Key Characteristics of the Command and Control Phase:
* The attacker establishes remote communication with the compromised host.
* Encryption or obfuscation methods are used to hide the channel.
* The attacker uses this channel to send further commands, escalate privileges, and execute malicious actions.
* Typical tools: Remote Access Trojans (RATs), backdoors, and tunneling techniques.
Why the Other Options Are Incorrect:
* B. Weaponization:This phase involves creating or configuring the malicious payload or exploit (e.g., binding malware to a document or executable). It occurs before the attack delivery.
* C. Reconnaissance:The attacker gathers information about the target (network structure, vulnerabilities) before launching an attack.
* D. Delivery:This phase involves transmitting the weaponized payload to the target through methods such as email attachments, infected links, or USB drives.
Conclusion:
By establishing an encrypted communication channel and controlling the victim's system remotely, Jack is in the Command and Control phase of the Cyber Kill Chain.
Final Answer: A. Command and Control
Explanation Reference (Based on CTIA Study Concepts):
As defined in CTIA materials under "Adversary Tactics, Techniques, and Procedures (TTPs)" and "Cyber Kill Chain Stages," the

Command and Control phase involves creating and maintaining communication between compromised hosts and attacker infrastructure for persistent access and control.

NEW QUESTION # 54

Tyrion, a professional hacker, is targeting an organization to steal confidential information. He wants to perform website footprinting to obtain the following information, which is hidden in the web page header.
Connection status and content type
Accept-ranges and last-modified information
X-powered-by information
Web server in use and its version
Which of the following tools should the Tyrion use to view header content?

- A. Burp suite
- B. Vanguard enforcer
- C. Hydra
- D. AutoShun

Answer: A

Explanation:
Burp Suite is a comprehensive tool used for web application security testing, which includes functionality for viewing and manipulating the HTTP/HTTPS headers of web page requests and responses. This makes it an ideal tool for someone like Tyrion, who is looking to perform website footprinting to gather information hidden in the web page header, such as connection status, content type, server information, and other metadata that can reveal details about the web server and its configuration. Burp Suite allows users to intercept, analyze, and modify traffic between the browser and the web server, which is crucial for uncovering such hidden information.References:

NEW QUESTION # 55

Tracy works as a CISO in a large multinational company. She consumes threat intelligence to understand the changing trends of cyber security. She requires intelligence to understand the current business trends and make appropriate decisions regarding new technologies, security budget, improvement of processes, and staff.
The intelligence helps her in minimizing business risks and protecting the new technology and business initiatives.
Identify the type of threat intelligence consumer is Tracy.

- A. Technical users
- B. Operational users
- C. Strategic users
- D. Tactical users

Answer: C

Explanation:
Tracy, as a Chief Information Security Officer (CISO), requires intelligence that aids in understanding broader business and cybersecurity trends, making informed decisions regarding new technologies, security budgets, process improvements, and staffing. This need aligns with the role of a strategic user of threat intelligence. Strategic users leverage intelligence to guide long-term planning and decision-making, focusing on minimizing business risks and safeguarding against emerging threats to new technology and business initiatives. This type of intelligence is less about the technical specifics of individual threats and more about understanding the overall threat landscape, regulatory environment, and industry trends to inform high-level strategy and policy.

NEW QUESTION # 56

An organization suffered many major attacks and lost critical information, such as employee records, and financial information.

Therefore, the management decides to hire a threat analyst to extract the strategic threat intelligence that provides high-level information regarding current cyber-security posture, threats, details on the financial impact of various cyber-activities, and so on. Which of the following sources will help the analyst to collect the required intelligence?

- A. Active campaigns, attacks on other organizations, data feeds from external third parties
- B. OSINT, CTI vendors, ISAO/ISACs
- C. Campaign reports, malware, incident reports, attack group reports, human intelligence
- D. Human, social media, chat rooms

Answer: B

NEW QUESTION # 57

......

The former customers who bought ECCouncil 312-85 training materials in our company all are impressed by the help as well as our after-sales services. That is true. We offer the most considerate after-sales services on our ECCouncil 312-85 Exam Questions for you 24/7 with the help of patient staff and employees. They are all professional and enthusiastic to offer help.
