Our Salesforce Certified Agentforce Specialist (Agentforce-Specialist) practice test software is suitable for computer users with a Windows operating system.

Salesforce Certified Agentforce Specialist Sample Questions (Q230-Q235):

NEW QUESTION # 230

What is the correct process to leverage Prompt Builder in a Salesforce org?

- A. Select the appropriate prompt template type to use, select one of Salesforce's standard prompts, determine the object to associate the prompt, select a record to validate against, and associate the prompt to an action.
- **B. Select the appropriate prompt template type to use, develop the prompt within the prompt workspace, select resources to dynamically insert CRM-derived grounding data, pick the model to use, and test and validate the generated responses.**
- C. Enable the target object for generative prompting, develop the prompt within the prompt workspace, select records to fine-tune and ground the response, enable the Trust Layer, and associate the prompt to an action.

Answer: B

Explanation:

When using Prompt Builder in a Salesforce org, the correct process involves several important steps:

Select the appropriate prompt template type based on the use case.

Develop the prompt within the prompt workspace, where the template is created and customized.

Select CRM-derived grounding data to be dynamically inserted into the prompt, ensuring that the AI-generated responses are

based on accurate and relevant data.

Pick the model to use for generating responses, either using Salesforce's built-in models or custom ones.

Test and validate the generated responses to ensure accuracy and effectiveness.

Option B is correct as it follows the proper steps for using Prompt Builder.

Option A and Option C do not capture the full process correctly.

NEW QUESTION # 231

The marketing team at Universal Containers is looking for a way to personalize emails based on customer behavior, preferences, and purchase history.

Why should the team use Agent as the solution?

- A. To generate relevant content when engaging with each customer
- B. To send automated emails to all customers
- C. To analyze past campaign performance

Answer: A

Explanation:

Agent is designed to assist in generating personalized, AI-driven content based on customer data such as behavior, preferences, and purchase history. For the marketing team at Universal Containers, this is the perfect solution to create dynamic and relevant email content. By leveraging Agent, they can ensure that each customer receives tailored communications, improving engagement and conversion rates.

* Option A is correct as Agent helps generate real-time, personalized content based on comprehensive data about the customer.

* Option B refers more to Einstein Analytics or

* Marketing Cloud Intelligence, and Option C deals with automation, which isn't the primary focus of Agent.

NEW QUESTION # 232

Choose 1 option.

What is an Agentforce Specialist able to do when the 'Enrich event logs with conversation data' setting in the Agentforce configuration is enabled?

- A. Generate detailed reports on all agent conversations over any time period.
- B. View the user click path that led to each agent action.
- C. View session data including user input and agent responses for sessions.

Answer: C

Explanation:

The AgentForce Event and Logging Configuration Guide states that enabling "Enrich event logs with conversation data" allows administrators to capture session-level details, including both user inputs and agent responses. The documentation explains: "When this setting is enabled, conversation transcripts, user messages, and agent responses are appended to the event logs for improved visibility and troubleshooting." This provides a comprehensive record for analytics, training, and quality review. It does not, however, track user click paths (Option A) or generate aggregated historical reports across all time periods automatically (Option C).

Therefore, Option B is correct, as it directly reflects the documented functionality of the conversation data enrichment feature within AgentForce configuration.

References (AgentForce Documents / Study Guide):

* AgentForce Configuration and Monitoring Guide: "Enrich Event Logs with Conversation Data"

* AgentForce Data and Analytics Study Notes

* AgentForce Implementation Handbook: "Session and Conversation Log Management"

NEW QUESTION # 233

Coral Cloud Resorts wants visibility into credit usage associated with testing.

Which feature supports this?

- A. B. Digital Wallet
- **B. Testing Center**
- C. Agentforce Analytics

Answer: B

Explanation:

The AgentForce Testing Center Guide specifies that all testing activity-including prompt tests, structured batch runs, and evaluation sessions-consumes AI credits, which can be monitored directly through the Testing Center interface. The documentation states: "Testing Center provides visibility into testing performance, outcomes, and credit usage. Administrators can view test credit consumption metrics to understand resource utilization across agents and environments." Agentforce Analytics (Option A) provides insights into performance, engagement, and operational metrics but does not directly track credit consumption tied to testing. Digital Wallet (Option B) manages AI credit balances across orgs but does not offer test-specific tracking. Therefore, Testing Center is the correct answer since it explicitly supports monitoring credit usage during agent testing activities.

References (AgentForce Documents / Study Guide):

- * AgentForce Testing Center Guide: "Monitoring Credit Consumption During Testing"
- * AgentForce Admin Handbook: "Tracking Usage and Test Costs"
- * AgentForce Study Guide: "Testing Resource Visibility and Credit Management"

NEW QUESTION # 234

Northern Trail Outfitters (NTO) wants to configure Einstein Trust Layer in its production org but is unable to see the option on the Setup page.

After provisioning Data Cloud, which step must an AI Specialist take to make this option available to NTO?

- A. Turn on Agent.
- **B. Turn on Einstein Generative AI.**
- C. Turn on Prompt Builder.

Answer: B

Explanation:

For Northern Trail Outfitters (NTO) to configure the Einstein Trust Layer, the Einstein Generative AI feature must be enabled. The Einstein Trust Layer is closely tied to generative AI capabilities, ensuring that AI-generated content complies with data privacy, security, and trust standards.

* Option A (Turning on Agent) is unrelated to the setup of the Einstein Trust Layer, which focuses more on generative AI interactions and data handling.

* Option C (Turning on Prompt Builder) is used for configuring and building AI-driven prompts, but it does not enable the Einstein Trust Layer.
