MikroTik Certified Network Associate Exam Sample Questions (Q153-Q158):

NEW QUESTION # 153

When using routing option 'check-gateway=ping' after how many timeouts is gateway considered unreachable:

- A. 0
- B. 1
- C. 2

- D. 3

Answer: A

NEW QUESTION # 154

Which firewall chain would be used to block a client's MSN traffic on a router?

- A. static
- B. input
- C. output
- D. forward

Answer: D

NEW QUESTION # 155

Router A and B are both running as PPPoE servers on different broadcast domains of your network. It is possible to set Router A to use "/ppp secret" accounts from Router B to authenticate PPPoE customers.

- A. false
- B. true

Answer: A

NEW QUESTION # 156

Netinstall can be used to

- A. Install package for different hardware architecture
- B. Install different software version (upgrade or downgrade)
- C. Reinstall software without losing licence
- D. Keep configuration, but reset a lost admin password

Answer: B,C

Explanation:

Netinstall is a MikroTik utility used to reinstall or repair RouterOS on RouterBOARD devices. It can be used to:

- * Reinstall RouterOS while preserving the existing license (#B)
- * Install a different version of RouterOS - either older or newer (#C)

Limitations:

- * A.#Incorrect - Netinstall will erase the configuration; it cannot recover a lost admin password without wiping the device.
- * D.#Incorrect - You can only install software meant for the specific hardware architecture of the RouterBOARD.

Extract from Official MTCNA Course Material - Netinstall Tool:

"Netinstall can be used to reinstall RouterOS and change its version. It does not erase the license key." Extract from Rene Meneses MTCNA Study Guide - Recovery Tools:

"Netinstall allows you to load any RouterOS version compatible with your device. It does not delete the license." Extract from MikroTik Wiki - Netinstall Overview:

"Netinstall reinstalls the OS, can change versions, and retains license. It cannot recover configuration or passwords."

NEW QUESTION # 157

Mark all features that are compatible with Nstreme

- A. WDS between a device in ap-bridge mode with a device in station-wds mode
- B. Bridging a device in station mode with a device in ap-bridge mode
- C. WDS between a device in station-wds mode and a device in station-wds mode
- D. Encryption

Answer: A

NEW QUESTION # 158
