H12-821_V1.0 exam braindumps: HCIP-Datacom-Core Technology V1.0 & H12-821_V1.0 study guide

We would like to benefit our customers from different countries who decide to choose our H12-821_V1.0 study guide in the long run, so we cooperation with the leading experts in the field to renew and update our H12-821_V1.0 study materials. We can assure you that you will get the latest version of our H12-821_V1.0 Training Materials for free from our company in the whole year after payment. Do not miss the opportunity to buy the best H12-821_V1.0 preparation questions in the international market which will also help you to advance with the times.

Huawei HCIP-Datacom-Core Technology V1.0 Sample Questions (Q612-Q617):

NEW QUESTION # 612

ACLs are a common matching tool in routing policies. An ACL can be configured on a router to match routes.

- A. FALSE
- B. TRUE

Answer: B

Explanation:

ACL in Routing Policies

ACLs are frequently used in routing policies to match specific routes based on criteria such as source IP, destination IP, and more. This allows ACLs to influence route redistribution, filtering, and forwarding decisions.

NEW QUESTION # 613

Which of the following descriptions about BGP are correct? (Multiple choice)

- A. When BGP establishes a neighbor relationship, the necessary parameters are negotiated through Notification messages.
- B. BGP uses Keepalive messages to keep the TCP connection valid. The default Keepalive sending period is 60 seconds.
- C. When BGP establishes a neighbor relationship, it must first complete the TCP three-way handshake. Otherwise, the neighbor relationship cannot be established.
- D. BGP uses TCP port 179 for communication.

Answer: B,C,D

NEW QUESTION # 614

Route summarization can effectively reduce the number of BGP routes. However, many parameters need to be properly set when configuring BGP route summarization. Otherwise, problems such as routing loops may occur.

Which of the following statements is false about BGP route summarization?

- A. If the summary automatic command is run on a device, the device summarizes subnet routes based on natural network segments.
- B. If the aggregate command is run on a device, the device advertises both specific and summary routes.
- C. If the aggregate command with detail-suppressed specified is run on a device, the device advertises only the summary route.
- D. If the aggregate command with suppress-policy specified is run on a device, the device advertises only the specific routes that match the given routing policy.

Answer: B

Explanation:

Option B is false. By default, when the aggregate command is used without any options, BGP generates a summary route, and suppresses the specific routes that fall under that summary. To advertise both specific and summary routes, you must explicitly configure the detail-suppressed option to control whether specifics are suppressed or not.

Explanation of the other options:

A is correct: When suppress-policy is specified, only specific routes matching the policy are advertised; others are suppressed.

C is correct: The summary automatic command causes summarization based on classful boundaries, which is a legacy behavior.

D is correct: With detail-suppressed, only the summary route is advertised, not specific prefixes.

Reference from Huawei HCIP-Datacom-Core Technology Study Guide:

"The aggregate command suppresses specific routes by default unless explicitly configured otherwise. Use of suppress-policy or detail-suppressed allows control over which routes are advertised." (Chapter: BGP Advanced Features - Section: Route Aggregation)

NEW QUESTION # 615

When the service VLAN has set the VLAN Pool to a dual-stack address pool, STA will successfully obtain an IPv4 address and an IPv6 address.

- A. FALSE
- B. TRUE

Answer: B

NEW QUESTION # 616

By default, which of the following is the MED attribute value in BGP of Huawei equipment?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: A

NEW QUESTION # 617

.....

Real4Prep has one of the most comprehensive and top-notch Huawei H12-821_V1.0 Exam Questions. We eliminated the filler and simplified the HCIP-Datacom-Core Technology V1.0 exam preparation process so you can ace the Huawei certification exam on your first try. Our Huawei H12-821_V1.0 Questions include real-world examples to help you learn the fundamentals of the subject not only for the Huawei exam but also for your future job.
