NEW QUESTION 27

Universal Containers (UC) is both a Salesforce and Google Apps customer. The UC IT team would like to manage the users for both systems in a single place to reduce administrative burden. Which two optimal ways can the IT team provision users and allow Single Sign-on between Salesforce and Google Apps? Choose 2 answers

- A. Build a custom app running on Heroku as the Identity Provider that can sync user information between Salesforce and Google Apps.
- B. Use a third-party product as the Identity Provider for both Salesforce and Google Apps and manage the provisioning from there.
- C. Use Identity Connect as the Identity Provider for both Salesforce and Google Apps and manage the provisioning from there.
- D. Use Salesforce as the Identity Provider and Google Apps as a Service Provider and configure User Provisioning for Connected Apps.

Salesforce Certified Identity and Access Management Architect Sample Questions (Q102-Q107):

NEW QUESTION # 102

An Identity architect works for a multinational, multi-brand organization. As they work with the organization to understand their Customer Identity and Access Management requirements, the identity architect learns that the brand experience is different for each of the customer's sub-brands and each of these branded experiences must be carried through the login experience depending on which sub-brand the user is logging into.

Which solution should the architect recommend to support scalability and reduce maintenance costs, if the organization has more than 150 sub-brands?

- A. Use Audiences to customize the login experience for each sub-brand and pass an audience ID to the community during the OAuth and Security Assertion Markup Language (SAML) flows.
- B. Create a separate Salesforce org for each sub-brand so that each sub-brand has complete control over the user experience.
- C. Create a community subdomain for each sub-brand and customize the look and feel of the Login page for each community subdomain to match the brand.
- D. Assign each sub-brand a unique Experience ID and use the Experience ID to dynamically brand the login experience.

Answer: D

NEW QUESTION # 103

Universal Containers (UC) has an existing web application that it would like to access from Salesforce without requiring users to re-authenticate. The web application is owned UC and the UC team that is responsible for it is willing to add new javascript code and/or libraries to the application. What implementation should an Architect recommend to UC?

- A. Add the web application as a ConnectedApp using OAuth User-Agent flow.
- B. Configure the web application as an item in the Salesforce App Launcher.
- C. Rewrite the web application as a set of Visualforce pages and Apex code.
- D. Create a Canvas app and use Signed Requests to authenticate the users.

Answer: D

NEW QUESTION # 104

A public sector agency is setting up an identity solution for its citizens using a Community built on Experience Cloud and requires the new user registration functionality to capture first name, last name, and phone number.

The phone number will be used for identity verification.

Which feature should an identity architect recommend to meet the requirements?

- A. Use Login Discovery
- B. Integrate with social websites (Facebook, LinkedIn, Twitter)
- C. Create a custom Lightning Web Component
- D. Use an external Identity Provider

Answer: A

Explanation:
Explanation

Login Discovery allows the administrator to configure a custom login page that collects additional information from users, such as phone number, and use it for identity verification. Login Discovery can also be used to route users to different identity providers based on their input. References: Login Discovery, Customize Your Experience Cloud Site Login Process

NEW QUESTION # 105

Northern Trail Outfitters (NTO) wants to improve its engagement with existing customers to boost customer loyalty. To get a better understanding of its customers, NTO establishes a single customer view including their buying behaviors, channel preferences and purchasing history. All of this information exists but is spread across different systems and formats.

NTO has decided to use Salesforce as the platform to build a 360 degree view. The company already uses Microsoft Active Directory (AD) to manage its users and company assets.

What should an Identity Architect do to provision, deprovision and authenticate users?

- A. Salesforce Identity is included in the Salesforce licenses so it does not need to be considered separately.
- **B. A Salesforce Identity can be included but NTO will require Identity Connect.**
- C. Salesforce Identity is not needed since NTO uses Microsoft AD.
- D. Salesforce Identity can be included but NTO will be required to build a custom integration with Microsoft AD.

Answer: B

Explanation:

Identity Connect is a Salesforce product that integrates Microsoft Active Directory with Salesforce user records. It allows provisioning, deprovisioning, and authentication of users based on AD data. The other options are either incorrect or irrelevant for this use case. References: Get to Know Identity Connect, Identity Connect

NEW QUESTION # 106

Universal Containers (UC) is planning to add Wi-Fi enabled GPS tracking devices to its shipping containers so that the GPS coordinates data can be sent from the tracking device to its Salesforce production org via a custom API. The GPS devices have no direct user input or output capabilities.

Which OAuth flow should the identity architect recommend to meet the requirement?

- A. OAuth 2.0 JWT Bearer Flow for Server-to-Server Integration
- **B. OAuth 2.0 Asset Token Flow for Securing Connected Devices**
- C. OAuth 2.0 WebServer Flow for Web App Integration
- D. OAuth 2.0 Username-Password Flow for Special Scenarios

Answer: B

Explanation:

OAuth 2.0 Asset Token Flow is the flow that allows connected devices to request an asset token from Salesforce. The device obtains an access token and an actor token, and uses them to create an asset token. This flow enables efficient token exchange and automatic linking of devices to Service Cloud Asset records.

References: OAuth 2.0 AssetToken Flow for Securing Connected Devices, OAuth Authorization Flows

NEW QUESTION # 107

.....

Our website offer considerate 24/7 services with non-stopping care for you.
