Also, you can send your problem by email, we will give you answer as quickly as we can.

Scrum SAFe Product Owner/Product Manager POPM (6.0) Sample Questions (Q13-Q18):

NEW QUESTION # 13

What is one purpose of the System Demo?

- A. To plan the Inspect and Adapt (I and A) event
- B. To demonstrate a team' s build
- C. To demonstrate the full Solution in a production-like context
- D. To visualize flow, dependencies, and risks

Answer: C

Explanation:

The SAFe POPM workbook explains that the System Demo demonstrates progress from the full system and should be run from a staging environment that resembles production as much as possible. The PI System Demo also demonstrates the current state of the Solution to appropriate stakeholders. This aligns with demonstrating the full Solution in a production-like context , not merely a single team's build.

NEW QUESTION # 14

Which role ensures that the ART has the Vision and Backlog needed to engage in PI Planning successfully?

- A. Product Owner
- B. Lean-Agile Center of Excellence
- C. Release Train Engineer
- **D. Product Management**

Answer: D

Explanation:

Explanation

Product Management is the role that ensures that the Agile Release Train (ART) has the Vision and Backlog needed to engage in PI Planning successfully. Product Management is responsible for defining and communicating the Vision, which describes the future state of the solution and its features¹. Product Management also develops and maintains the Program Backlog, which contains the features and enablers that the ART will implement in the upcoming Program Increments (PIs)². Product Management collaborates with stakeholders, customers, architects, and other roles to discover, prioritize, and refine the backlog items and present them to the ART during PI Planning³.

NEW QUESTION # 15

What is enabled by the Continuous Delivery Pipeline?

- A. A predictable release cadence
- **B. New functionality delivered more frequently**
- C. Transparent measurements
- D. End-to-end testing

Answer: B

Explanation:

Explanation

The Continuous Delivery Pipeline enables the delivery of new functionality to customers more frequently by streamlining and automating the workflows, activities, and feedback loops from ideation to release¹. The Continuous Delivery Pipeline consists of four aspects: Continuous Exploration, Continuous Integration, Continuous Deployment, and Release on Demand². These aspects work together to support the delivery of small batches of new functionality, which can be released to the market based on the customer demand and business needs³.

NEW QUESTION # 16

What makes value available when it's needed?

- **A. Release on Demand**
- B. Infrastructure
- C. DevOps
- D. Continuous Deployment

Answer: A

Explanation:

Explanation

Release on Demand is the process that makes value available to customers when it's needed. It is the final aspect of the Continuous Delivery Pipeline, which represents the workflows, activities, and automation needed to guide new functionality from ideation to an

on-demand release of value¹. Release on Demand allows the business to release the solution to the end users or customers in a controlled or staggered manner, based on the market and business needs². Release on Demand enables the enterprise to respond quickly to customer feedback, optimize the timing and frequency of releases, and reduce the risk associated with each release³.

NEW QUESTION # 17

What is one question that helps Product Management create a Vision?

- A. How many Features have been released to the Customer?
- B. What Features must be de-scoped?
- C. What problem(s) will the Solution solve?
- D. Which themes are on the Roadmap?

Answer: C

Explanation:

Explanation

One of the questions that helps Product Management create a Vision is what problem(s) will the Solution solve for the customers and stakeholders. The Vision is a description of the future state of the Solution under development, and it reflects the needs and expectations of the customers and stakeholders¹. The Vision also provides the context and purpose for the features and capabilities of the Solution². Therefore, Product Management needs to understand the problem(s) that the Solution aims to address, and how it will deliver value and benefits to the customers and stakeholders³.
