

Reliable JN0-683 Braindumps Ppt | Exam JN0-683 Cost

What's more, part of that ExamcollectionPass JN0-683 dumps now are free: <https://drive.google.com/open?id=1S4QltvqTWTG01T-vnrkrx8kfdXKSNmo>

If you face any hitch while using the Juniper JN0-683 practice exam software of ExamcollectionPass, contact our customer support. Our team is available for the assistance of Juniper JN0-683 updated exam dumps users. Many candidates of the JN0-683 examination pay extra money because Juniper weaks the content of the test.

Juniper JN0-683 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• EVPN-VXLAN Signaling: This section assesses an understanding of Ethernet VPN (EVPN) concepts, including route types, multicast handling, and Multiprotocol BGP (MBGP). It also covers EVPN architectures like CRB and ERB, MAC learning, and symmetric routing.
Topic 2	<ul style="list-style-type: none">• VXLAN: This part requires knowledge of VXLAN, particularly how the control plane manages communication between devices, while the data plane handles traffic flow. Demonstrate knowledge of how to configure, Monitor, or Troubleshoot VXLAN.
Topic 3	<ul style="list-style-type: none">• Data Center Multitenancy and Security: This section tests knowledge of single-tenant and multitenant data center setups. Candidates such as Data Center Professionals are evaluated on ensuring tenant traffic isolation at both Layer 2 and Layer 3 levels in shared infrastructure environments.
Topic 4	<ul style="list-style-type: none">• Data Center Deployment and Management: This section assesses the expertise of data center networking professionals like architects and engineers, focusing on key deployment concepts. Topics include Zero-touch provisioning (ZTP), which automates device setup in data centers without manual input.
Topic 5	<ul style="list-style-type: none">• Layer 3 Fabrics: This section measures the knowledge of professionals managing IP-based networks in data centers. It covers IP fabric architecture and routing, ensuring candidates understand how the network is structured for scalability and how traffic is routed efficiently.

100% Pass JN0-683 - High-quality Reliable Data Center, Professional (JNCIP-DC) Braindumps Ppt

JN0-683 Guide Torrent compiled by our company is definitely will be the most sensible choice for you. In this website, you can find three different versions of our JN0-683 guide torrent which are prepared in order to cater to the different tastes of different people from different countries in the world since we are selling our Data Center, Professional (JNCIP-DC) test torrent in the international market. Most notably, the simulation test is available in our software version. With the simulation test, all of our customers will have an access to get accustomed to the Data Center, Professional (JNCIP-DC) exam atmosphere and get over all of bad habits which may influence your performance in the real Data Center, Professional (JNCIP-DC) exam.

Juniper Data Center, Professional (JNCIP-DC) Sample Questions (Q57-Q62):

NEW QUESTION # 57

Click the Exhibit button.

```
user@Leaf-1> show configuration switch-options
service-id 1;
route-distinguisher 192.168.100.51:1;
vrf-target target:65000:55;
user@Leaf-2> show configuration switch-options
vtep-source-interface lo0.0;
route-distinguisher 192.168.100.51:2;
vrf-target target:65000:54;
```

Connections between hosts connected to Leaf-1 and Leaf-2 are not working correctly.

Referring to the exhibit, which two configuration changes are required to solve the problem? (Choose two.)

- A. Configure the set switch-options vtep-source-interface lo0.0 parameter on Leaf-1.
- B. Configure the set switch-options vrf-target target:65000:55 parameter on Leaf-2.
- C. Configure the set switch-options service-id 1 parameter on Leaf-2.
- D. Configure the set switch-options route-distinguisher 192.168.100.51:2 parameter on Leaf-1.

Answer: A,B

NEW QUESTION # 58

Exhibit.

```
user@spine1# show protocols bgp group underlay
type external;
export Export-Directs;
local-as 65101;
multipath {
  multiple-as;
}
neighbor 172.16.1.1 {
  peer-as 65201;
}
neighbor 172.16.1.5 {
  peer-as 65203;
}
neighbor 172.16.1.3 {
  peer-as 65202;
}
user@spine1# show policy-options
policy-statement Export-Directs {
  term loopback {
    from {
      protocol direct;
      route-filter 192.168.100.0/24 orlonger;
    }
    then accept;
  }
}
```

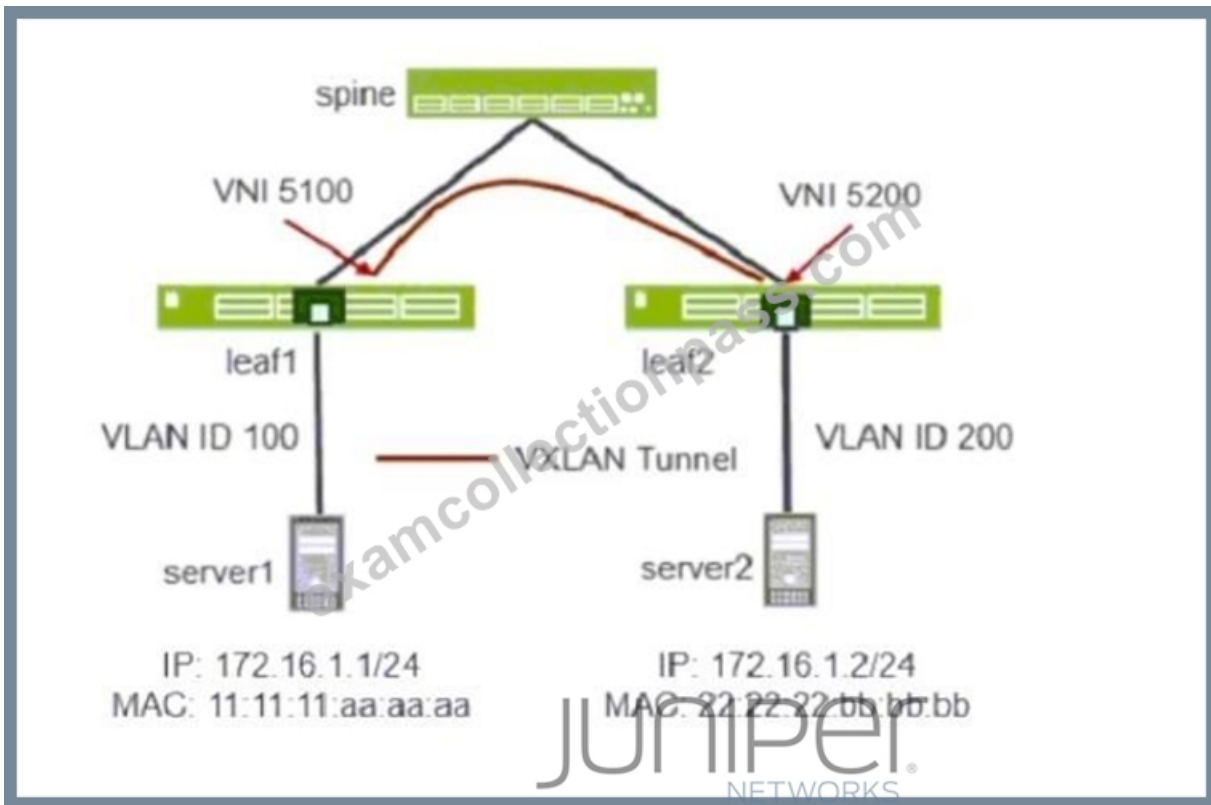

Referring to the exhibit, the spine1 device has an underlay BGP group that is configured to peer with its neighbors' directly connected interfaces. Which two statements are true in this scenario? (Choose two.)

- A. The **multihop** statement is required to establish the underlay BGP sessions.
- B. The **multihop** statement is not required to establish the underlay BGP sessions.
- C. Load balancing for the underlay is not configured correctly.
- D. Load balancing for the underlay is configured correctly.

Answer: A,D

NEW QUESTION # 59

Click the Exhibit button. A VXLAN tunnel has been created between leaf1 and leaf2 in your data center.

Referring to the exhibit, which statement is correct?

- A. Traffic sent from server1 to server2 will be tagged with VLAN ID 200 on leaf2 and forwarded to server2.
- **B. Traffic sent from server1 to server2 will be dropped on leaf1.**
- C. Traffic sent from server1 to server2 will be dropped on leaf2.
- D. Traffic sent from server1 to server2 will be tagged with VLAN ID 100 on leaf2 and forwarded to server2.

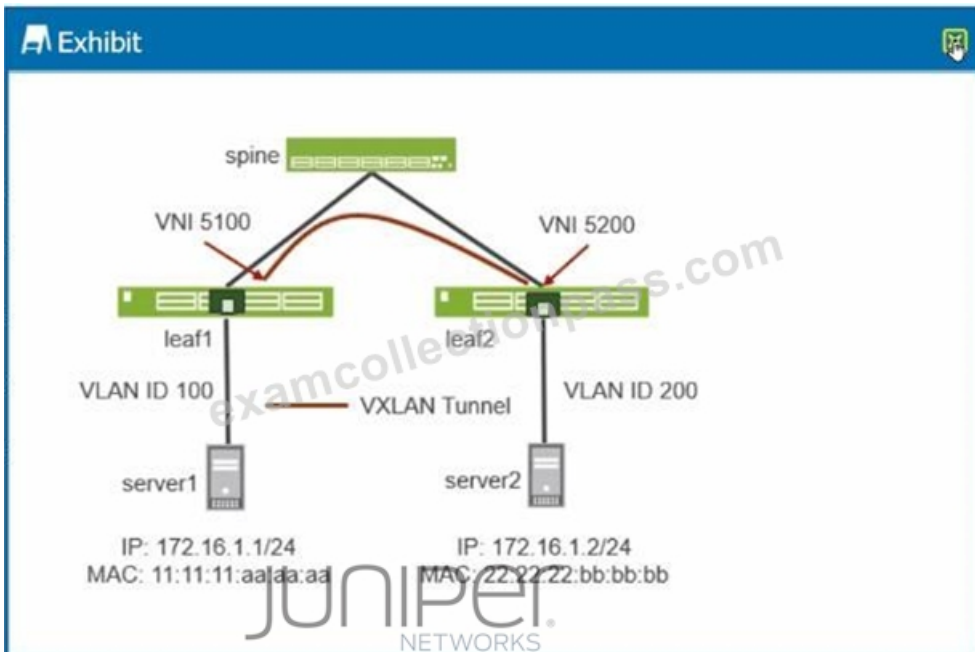

Answer: B

Explanation:

D is correct because leaf1, the ingress switch, drops the traffic due to lack of EVPN L2 forwarding entry for destination MAC in a different VNI.

NEW QUESTION # 60

Exhibit.

A VXLAN tunnel has been created between leaf1 and leaf2 in your data center. Referring to the exhibit, which statement is correct?

- A. Traffic sent from server1 to server2 will be tagged with VLAN ID 200 on leaf2 and forwarded to server2.
- **B. Traffic sent from server1 to server2 will be dropped on leaf1.**
- C. Traffic sent from server1 to server2 will be dropped on leaf2.
- D. Traffic sent from server1 to server2 will be tagged with VLAN ID 100 on leaf2 and forwarded to server2.

Answer: B

NEW QUESTION # 61

In your EVPN-VXAN environment, you want to prevent a multihomed server from receiving multiple copies of BUM traffic in active/active scenarios. Which EVPN route type would satisfy this requirement?

- **A. Type 4**
- B. Type 8
- C. Type 5
- D. Type 7

Answer: A

Explanation:

In an EVPN-VXLAN environment with active-active multihoming, a multihomed server connected to multiple leaf switches can receive duplicate copies of BUM (Broadcast, Unknown Unicast, and Multicast) traffic. To prevent this, Type 4 (Ethernet Segment Route) is used.

EVPN Type 4 routes are responsible for DF (Designated Forwarder) election, which ensures that only one leaf switch forwards BUM traffic to the multihomed server. This prevents duplicate frames and optimizes network efficiency.

NEW QUESTION # 62

.....

These practice tools are developed by professionals who work in fields impacting Juniper certification, giving them a foundation of knowledge and actual competence. Our Juniper JN0-683 Exam Questions are created and curated by industry specialists. ExamcollectionPass Is Here To Provide Top-Notch Juniper JN0-683 Exam Questions
