## Download Latest Exam SC-401 Demo and Pass SC-401 Exam

Even though our SC-401 training materials have received quick sale all around the world, in order to help as many candidates for the exam as possible to pass the SC-401 exam, we still keep the most favorable price for our best SC-401 test prep. In addition, if you

keep a close eye on our website you will find that we will provide discount in some important festivals, we can assure you that you can use the least amount of money to buy the best product in here. We aim at providing the best SC-401 Exam Engine for our customers and at trying our best to get your satisfaction.

## Microsoft SC-401 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Implement Information Protection: This section measures the skills of Information Security Analysts in classifying and protecting data. It covers identifying and managing sensitive information, creating and applying sensitivity labels, and implementing protection for Windows, file shares, and Exchange. Candidates must also configure document fingerprinting, trainable classifiers, and encryption strategies using Microsoft Purview.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Manage Risks, Alerts, and Activities: This section assesses Security Operations Analysts on insider risk management, monitoring alerts, and investigating security activities. It covers configuring risk policies, handling forensic evidence, and responding to alerts using Microsoft Purview and Defender tools. Candidates must also analyze audit logs and manage security workflows.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Protect Data Used by AI Services: This section evaluates AI Governance Specialists on securing data in AI-driven environments. It includes implementing controls for Microsoft Purview, configuring Data Security Posture Management (DSPM) for AI, and monitoring AI-related security risks to ensure compliance and protection.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>Implement Data Loss Prevention and Retention: This section evaluates Data Protection Officers on designing and managing data loss prevention (DLP) policies and retention strategies. It includes setting policies for data security, configuring Endpoint DLP, and managing retention labels and policies. Candidates must understand adaptive scopes, policy precedence, and data recovery within Microsoft 365.</li></ul>

## Microsoft Administering Information Security in Microsoft 365 Sample Questions (Q53-Q58):

### NEW QUESTION # 53

You have a Microsoft 365 E5 subscription that uses Microsoft Defender for Cloud Apps.

You need to ensure that you receive an alert when a user uploads a document to a third-party cloud storage service.

What should you use?

- A. a sensitivity label
- B. a file policy
- C. an insider risk policy
- D. an activity policy

**Answer: D**

Explanation:

Activity Policy (MCAS): Monitors and alerts on specific user actions such as uploading files, downloads, or logins to cloud apps. Perfect for detecting "upload to third-party storage".

Sensitivity label: Used for classifying and protecting content, not generating alerts.

File policy (MCAS): Inspects and governs files already stored in sanctioned apps, not upload activity.

Insider risk policy: Focuses on risky behavior like data exfiltration or security violations, not direct activity alerts in cloud apps.

answer: A. an activity policy

Reference: Defender for Cloud Apps activity policies

### NEW QUESTION # 54

Hotspot Question

You have a new Microsoft 365 E5 tenant.

You need to create a custom trainable classifier that will detect product order forms. The solution must use the principle of least

privilege.

What should you do first? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation:

The opt-in can't be performed by the Compliance Administrator, the GA is required:

"To access classifiers in the UI:

the Global admin needs to opt in for the tenant to create custom classifiers.

Compliance Administrator role is required to train a classifier."

<https://learn.microsoft.com/en-us/microsoft-365/compliance/classifier-get-started-with?view=o365-worldwide>

**NEW QUESTION # 55**

Hotspot Question

You have a Microsoft 365 E5 subscription.

You receive the data loss prevention (DLP) alert shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation:

Box 1: The DLP policy matched and an alert was generated, but the user (Megan Bowen) overrode the policy. Since the override justification was "Manager approved," the system allowed the email to be sent. This means the email was delivered immediately instead of being quarantined or sent for further approval.

Box 2: The "Override justification text" states "Manager approved," indicating that a manager explicitly approved the email through a workflow-based override process. If the manager was uninvolved, the justification would either be missing or state "User justified." The manager did not override Rule1 directly, but rather approved the email via workflow.

**NEW QUESTION # 56**

Hotspot Question

You have a Microsoft 365 tenant.

You need to create a new sensitive info type for items that contain the following:

- An employee ID number that consists of the hire date of the employee

followed by a three digit number

- The words "Employee", "ID", or "Identification" within 300 characters of the employee ID number

What should you use for the primary and secondary elements? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation:

Box 1: Functions

Need to include use a date function for the primary element.

Note: Create custom sensitive information types

The primary element can be a Regular expression with an optional validator, a Keyword list, a Keyword dictionary, or one of the pre-configured Functions.

Box 2: A keyword list

Use a keyword list which includes the words "Employee", "ID", or "Identification".

Reference:

<https://learn.microsoft.com/en-us/purview/sit-learn-about-exact-data-match-based-sits>

You have a Microsoft 365 E5 subscription.

```
*web1.contoso.com
```

\*web2.contoso.com

To what should you set the Service domains setting for Endpoint DLP?

- Answer: C**

The Service domains setting in Microsoft 365 Endpoint Data Loss Prevention (Endpoint DLP) allows administrators to block or allow specific domains for file uploads. The goal is to prevent users from uploading DLP-protected documents to web1.contoso.com and web2.contoso.com.
