EMEA-Advanced-Support Test Questions: Fortinet EMEA Advanced Support Exam & EMEA-Advanced-Support Actual Test & EMEA-Advanced-Support Exam Simulation

The format name of Channel Partner Program EMEA-Advanced-Support practice test questions is Fortinet PDF Questions file, desktop practice test software, and web-based practice test software. Choose the nay type of Channel Partner Program Fortinet EMEA Advanced Support Exam EMEA-Advanced-Support Practice Exam Questions that fit your Fortinet EMEA-Advanced-Support exam preparation requirement and budget and start preparation without wasting further time.

Fortinet EMEA Advanced Support Exam Sample Questions (Q27-Q32):

NEW QUESTION # 27

Which FortiGate feature supports load balancing across multiple WAN links?

- A. Multi-Path Routing
- B. Virtual Routing
- C. Link Aggregation
- D. SD-WAN

Answer: D

Explanation:

FortiGate's SD-WAN feature enables load balancing and intelligent traffic steering across multiple WAN links based on criteria like bandwidth, latency, or application. Link Aggregation (B) bonds interfaces, Virtual Routing (C) is VRF, and Multi-Path Routing (D) is not a standard term. Exact extract: "SD-WAN enables load balancing and traffic steering across multiple WAN links, optimizing performance and reliability based on configured rules and metrics."

NEW QUESTION # 28

What is the role of the FortiGate 'set srcintf' command in a firewall policy?

- A. Specifies the source interface for traffic matching
- B. Configures the source NAT interface
- C. Defines the destination interface for traffic
- D. Sets the source IP address range

Answer: A

Explanation:

The 'set srcintf' command in a FortiGate firewall policy specifies the source interface from which traffic originates, helping define the policy's scope. It does not set the destination interface (B), source IP range (C), or NAT interface (D). Exact extract: "The 'set srcintf' command in a firewall policy specifies the source interface for incoming traffic, allowing FortiGate to match packets based on their entry interface."

NEW QUESTION # 29

Which of the following is a network monitoring protocol?

- A. SSH
- B. SNMP
- C. Telnet
- D. RDP

Answer: B

Explanation:

SNMP (Simple Network Management Protocol) is specifically designed for monitoring and managing network devices, allowing administrators to query device status, performance metrics, and configure alerts for issues. It operates by using agents on devices that report to a central manager. In contrast, RDP is for remote desktop access, Telnet for unsecure remote command-line access, and SSH for secure remote access. SNMP is the standard protocol for network monitoring in Fortinet products like FortiGate, FortiSwitch, etc. Exact extract: SNMP enables administrators to monitor how devices are performing and make changes to network devices so that data moves through the network more efficiently. Simple Network Management Protocol (SNMP) enables you to monitor hardware on your network. The FortiSwitch SNMP implementation is read- only. Monitoring FortiAP with SNMP. You can enable SNMP directly on FortiAP by implementing a SNMPD daemon/subagent on the FortiAP side. The Simple Network Management Protocol (SNMP) allows you to monitor hardware on your network. You can configure the hardware, such as the FortiProxy SNMP agent.

NEW QUESTION # 30

Which FortiGate feature allows inspection of encrypted SSL/TLS traffic?

- A. Application Control
- B. Web Filtering
- C. SSL Inspection
- D. Deep Packet Inspection

Answer: C

Explanation:

FortiGate's SSL Inspection feature decrypts and inspects SSL/TLS traffic to detect threats or enforce policies, using techniques like full SSL inspection or certificate inspection. Deep Packet Inspection (A) is a broader term, Application Control (C) identifies apps, and Web Filtering (D) blocks URLs, not specific to SSL. Exact extract: "SSL Inspection allows FortiGate to decrypt and inspect SSL/TLS traffic to detect hidden threats or enforce security policies, supporting full or certificate-based inspection."

NEW QUESTION # 31

Which of the following are classful addresses? (Select all that apply below)

- A. 172.16.0.0/24
- B. 172.16.0.0/16
- C. 10.225.30.0/8
- D. 10.225.30.0/16

Answer: B,C

Explanation:

Classful addressing follows the original IP address classes: Class A (/8), Class B (/16), and Class C (/24).

Option A (10.225.30.0/8) is a Class A address, and C (172.16.0.0/16) is a Class B address. Option B (10.225.30.0/16) and D (172.16.0.0/24) use non-standard masks for their respective ranges, making them classless (CIDR). The original document incorrectly lists only A. Fortinet routing supports both classful and classless addressing. Exact extract: "Classful addressing uses fixed subnet masks: Class A (/8), Class B (/16), and Class C (/24)... Addresses like 10.0.0.0/8 and 172.16.0.0/16 are classful, while non-standard masks indicate classless addressing."

NEW QUESTION # 32

.....

The EMEA-Advanced-Support prep torrent we provide will cost you less time and energy. You only need relatively little time to review and prepare. After all, many people who prepare for the EMEA-Advanced-Support exam, either the office workers or the students, are all busy. The office workers are both busy in their jobs and their family life and the students must learn or do other things. But the EMEA-Advanced-Support Test Prep we provide are compiled elaborately and it makes you use less time and energy to learn and provide the study materials of high quality and seizes the focus the exam. It lets you master the most information and costs you the least time and energy.

EMEA-Advanced-Support Exam Questions And Answers: https://www.realvce.com/EMEA-Advanced-Support_free-dumps.html

Fortinet Exam EMEA-Advanced-Support Exercise It is impossible for everyone to concentrate on one thing for a long time, because as time goes by, people's attention will gradually decrease, Get a life you always dreamt of with RealVCE EMEA-Advanced-Support Exam Questions And Answers EMEA-Advanced-Support Exam Questions And Answers - Fortinet EMEA Advanced Support Exam Fortinet EMEA-Advanced-Support Exam Questions And Answers, EMEA-Advanced-Support exam materials are high-quality, because we have professional team to compile and verify them.

If you want to stand out, gaining a popular certificate EMEA-Advanced-Support 100% Accuracy is unavoidable, Nadhem is a senior security solution architect working for Cisco Systems, It is impossible for everyone to concentrate on EMEA-Advanced-Support one thing for a long time, because as time goes by, people's attention will gradually decrease.

Providing You High Hit Rate Exam EMEA-Advanced-Support Exercise with 100% Passing Guarantee

Get a life you always dreamt of with RealVCE Fortinet EMEA Advanced Support Exam Fortinet, EMEA-Advanced-Support exam materials are high-quality, because we have professional team to compile and verify them.

It is human nature that everyone wants to have a successful career and make some achievements, Almost all examinees pass exam with our products if they really trust our EMEA-Advanced-Support training materials and master the questions and answers.
