New 156-836 Test Fee, Valid 156-836 Test Materials

If you are already determined to obtain an international certificate, you must immediately purchase our 156-836 exam practice. Our products have been certified as the highest quality products in the industry. If you know 156-836 Training Materials through acquaintance introduction, then you must also know the advantages of 156-836. We are both perfect on the quality and the price of the 156-836 study brandumps.

CheckPoint Check Point Certified Maestro Expert - R81 (CCME) Sample Questions (Q65-Q70):

NEW QUESTION # 65

Which command do you use to find bottlenecks in the system that are affecting performance, even functionality in some cases?

- A. asg diag verify
- **B. asg perf -v**
- C. asg stat -v
- D. asg monitor

Answer: B

Explanation:

The `asg perf -v` command is used to find bottlenecks in the system that are affecting performance, even functionality in some cases. The `asg perf -v` command displays the performance statistics of the Security Group Modules (SGMs) in the Security Group, such as throughput, packet rate, CPU utilization, memory usage, and more. The `asg perf -v` command also shows the distribution mode and the correction rate of each SGM, which can indicate potential issues with asymmetric routing or load balancing. The `asg perf -v` command can help identify which SGMs are overloaded, underutilized, or misconfigured, and provide insights for troubleshooting and optimization.

NEW QUESTION # 66

What cannot be learned from the output of `asg monitor` command?

- A. Port status
- B. Uptime
- C. Appliances cluster status
- D. Security Policy status

Answer: C

NEW QUESTION # 67

What is one benefit of a Dual MHO environment?

- A. Dual MHOs provide redundancy to the Maestro environment by increasing throughput by at least 50 percent.
- B. Dual MHOs allow better synchronization to occur between SGMs.
- C. Dual MHOs allow additional SGMs to be added to the SG.
- D. Dual MHOs can be used to achieve increased scalability and redundancy..

Answer: D

Explanation:

One of the benefits of a Dual MHO environment is that it can provide both scalability and redundancy to the Maestro system. Scalability means that the system can handle more traffic and SGMs as the demand grows, and redundancy means that the system can survive the failure of one or more components without losing functionality or performance. Dual MHOs can achieve these benefits by distributing the load and the management tasks among two orchestrators, and by providing backup and failover mechanisms for each other.

NEW QUESTION # 68

Logs without a dedicated log file can be found in

- A. `$RTDIR/log/junk.log`
- B. `/var/log/junk.log.dbg`
- C. `/var/log/messages`
- D. `$FWDIR/log/fw.log`

Answer: C

Explanation:

The /var/log/messages file is a general system log file that contains information about various system events, such as booting, shutdown, cron jobs, kernel messages, and other system services. Logs without a dedicated log file can be found in this file, as well as some Maestro Gaia Clish commands that are not saved in the /var/log/command_logger.log file.

NEW QUESTION # 69

What will happen in case of NAT of the traffic passing through Management network?

- A. This traffic will not pass correction, since it will be dropped
- **B. Orchestrator will disable NAT and traffic will pass with no issue**
- C. Since Management traffic is always going to SMO, it will take a care for Correction Layer and will re- distribute traffic to other Appliances
- D. This traffic will pass with no inspection

Answer: B

Explanation:

According to the Check Point MAESTRO R80.20SP Administration Manual1, NAT is not supported on the management network. If you configure NAT on the management network, the Orchestrator will disable NAT and allow the traffic to pass without translation. This is to ensure that the management traffic can reach the Security Group members and the SmartConsole without any issues.
