Valid HP Most HPE7-A03 Reliable Questions and Excellent HPE7-A03 Latest Test Cost

DOWNLOAD the newest DumpsQuestion HPE7-A03 PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=142zlktjDhJAE68Mcc62JbIGB42s_b1jt

We are aware that taking the HP HPE7-A03 certification exam may be quite expensive. To save you money, we provide you with up to 1 year of free HPE7-A03 exam questions updates. Moreover, you can check out the features of our DumpsQuestion's HPE7-A03 practice exam material by downloading a free demo. We provide you with a Free HPE7-A03 Exam Questions demo to assist you in making a decision that is well-informed. We are sure that by preparing with updated our HP HPE7-A03 exam questions you can get success and save both time and money.

Iif you still spend a lot of time studying and waiting for HPE7-A03 qualification examination, then you need our HPE7-A03 test prep, which can help solve all of the above problems. I can guarantee that our study materials will be your best choice. Our HPE7-A03 valid practice questions have three different versions, including the PDF version, the software version and the online version, to meet the different needs, our HPE7-A03 Study Materials have many advantages, and you can free download the demo of our HPE7-A03 exam questios to have a check.

HPE7-A03 Latest Test Cost, HPE7-A03 PDF Download

Creativity is coming from the passion and love of knowledge. Every day there are many different new things turning up. So a wise and diligent person should absorb more knowledge when they are still young. At present, our HPE7-A03 study prep has gained wide popularity among different age groups. Most of the real exam questions come from the adaption of our HPE7-A03 test question. In fact, we get used to investigate the real test every year. The similarity between our study materials and official test is very amazing. In a word, your satisfaction and demands of the HPE7-A03 Exam braindump is our long lasting pursuit. Hesitation will not generate good results. Action always speaks louder than words. Our HPE7-A03 study prep will not disappoint you. So just click to pay for it.

HP HPE7-A03 Exam Syllabus Topics:

Topic	Details
Topic 1	• Architect the Solution: It measures your knowledge about identifying the solution options, designing high-level topologies, selecting the correct products, and determining the suitable overlay and underlay design. Additionally, the topic discusses how to verify that the design meets the original requirements.

Topic 2	• Analyze Requirements: It focuses on determining possible high-level solutions. The topic also discusses mapping the needs into technical solutions and evaluating the proposed solution against project objectives and dependencies. Moreover, it also focuses on documenting assumptions.
Topic 3	• Propose the Solution: The focal point of this topic is creating the design documentation and the final design. Moreover, the topic also focuses on presenting the solution.
Topic 4	• Discover Requirements: This topic defines the goals and identifies the current environment and the objectives. Lastly, it also focuses on collecting information.

HP Aruba Certified Campus Access Architect Exam Sample Questions (Q50-Q55):

NEW QUESTION # 50
The customer recently found out that Aruba OS-CX switches are capable of Application Recognition. What requirements should be fulfilled in order to do this? (Select two.)

- A. 8360 with Aruba CX Advanced License
- B. 6300F/M with Aruba CX Advanced License
- C. 6200F/M with Aruba CX Advanced License
- D. 6400 with Aruba CX Advanced License

Answer: D

Explanation:
Aruba OS-CX switches, specifically the Aruba 6400 and 6300F/M models, are designed to support advanced networking features, including Application Recognition, with the Aruba CX Advanced License. The Advanced License enables enhanced capabilities such as deeper visibility into application flows, advanced routing features, and improved network analytics. Application Recognition allows these switches to identify and classify applications running on the network, enabling more intelligent and dynamic network policies and improving overall network performance and security. The requirement for an Aruba CX Advanced License on these specific models ensures that the necessary software features and support are available to leverage Application Recognition capabilities effectively.

NEW QUESTION # 51
Drag and Drop Question
What should be Included in an Executive Summary? (Place the correct Items into the let at the right Order is no: Important Not all cottons win be used)
□

Answer:

Explanation:
□

NEW QUESTION # 52
A large multinational financial institution has contracted you to design a new full-stack wired and wireless network for their new 6-story regional office building. The bottom two floors of this facility will be retail space for a large banking branch. The upper floors will be carpeted office space for corporate users, each floor being approximately 100,000 sq ft (9290 sq m). Data centers are all offsite and will be out of scope for this project. The customer is underserved by its existing L2- based network infrastructure and would like to take advantage of modern best practices in the new design. The network should be fully resilient and fault-tolerant, with dynamic segmentation at the edge.
The retail space will include public guest Wi-Fi access. Retail associates will have corporate tablets for customer service, and there will be a mix of wired and wireless devices throughout the retail floors. The corporate users will primarily use wireless for connectivity, but several wired clients, printers, and hard VoIP phones will be in use.
The customer is also planning on renovating the corporate office space in order to take advantage of 'smart office' technology. These improvements will drive blue-dot wayfinding, presence analytics, and other location-based services.
The client would like to ensure redundant RADIUS resources in each of their three geographical regions (AMER, EMEA, and

APAC). A large office location is available in each region with sufficient VMware resources available.
- Each region has 5,000 clients, all of which will need to do either 802.1x wired or wireless authentications as well as 802.1x authentication for a single personal device on Wi-Fi.
- All of the non-personal devices will also need to validate health with a local agent.
- A total of 500 guests are expected to be connected on average with a maximum of 700 simultaneous connections making use of Guest Portal for access to the Internet.
- TACACS authentication will also be configured for a total of 1,200 evenly dispersed NADs.
In order to support virtual IPs and server redundancy in each region how many Virtual Policy Manager Licenses will be needed?

- A. three licenses, C3000V
- B. six licenses, C3000V
- C. six licenses, C2000V
- D. three licenses, C2000V

Answer: B

Explanation:
In a scenario requiring redundant RADIUS resources across three geographical regions, with the scale of operations as described, opting for six C3000V Virtual Policy Manager licenses would ensure adequate capacity and redundancy. The C3000V model is designed to cater to larger deployments, offering high-capacity RADIUS services suitable for environments with thousands of clients and devices requiring authentication and health validation. By deploying two C3000V instances in each region (AMER, EMEA, and APAC), the financial institution can achieve both high availability and load balancing, ensuring that authentication services remain uninterrupted and efficient, even in the event of a server failure or during maintenance periods. This approach aligns with best practices for enterprise network design, emphasizing resilience and reliability in critical infrastructure components like authentication services.

NEW QUESTION # 53
'Don't Buy at Us' is a US-based retail company that is expanding Into Europe. They are expanding into EMEA with a regional headquarters called HQ2 inside The Netherlands.
Their US-based headquarters HQ1 was refreshed last year based on the Aruba ESP architecture. You have treated the design for HQ? based on the same design as HQ1. a two-tier architecture. The high level is shown below.
Switch BOM for this project based on Two Tier:
Collapsed Core: 2 x Aruba 8360-16Y2C in VSX (ISL 2» ICOG0E DAC)
Access Slack: 10 x Slack of Aruba 6200F 48G Class4 PoE 4SFP- 740W each stack has A members. VSF with 10GbE VSF links) 12 x 10GbE uplink pet stack) During the presentation of your design to the CTO of "Don't Buy at Us" you were informed about the changes they want you to incorporate into the updated design
1. HQ2 will include the EMEA regional distribution center (EMEA-OISTR) next to the HQ2.
2. Only two pairs of 0S1 are available between HQ2 and EMEA-DlSTR.
3. The uplinks from all access stacks need to increase to 2 x 25GbE. the fiber in HQ2 and EMEA-DI5TRI is certified for 25GbE.
4. EMEA-DlSTR needs at least 7 x stack of Aruba 48 ports switches (each stack has 4 members).
Whichanswer based on best practice is presenting the correct Switch BOM tor the updated design?

- A. □
- B. □
- C. □
- D. □

Answer: C

Explanation:
Based on the requirements provided by "Don't Buy at Us," the updated design needs to accommodate 25GbE uplinks and a minimum of 7 stacks of 48-port Aruba switches for the EMEA-DISTR. Option C is the most suitable based on best practices, as it proposes:
* A core configuration consisting of two Aruba 8360-12C in VSX for the collapsed core with ISL of 2x100GbE DAC, which will provide robust core networking with high-speed interconnects, suitable for the demands of a regional distribution center and headquarters.
* Aggregation with two stacks, each with 2 Aruba 8360-12C in VSX (ISL 2x100GbE DAC), accommodating the uplink capacity requirements.
* Access stacks with a total of 17 stacks of Aruba 6300F 48-port 1GbE Class 4 PoE with 4-port SFP56 (each stack has 4 members, VSF with 50GbE VSF links, 2 x 25GbE uplinks per stack), which exceeds the minimum requirement of 7 stacks and

provides the necessary uplink bandwidth.
This configuration supports the 25GbE uplink speeds, satisfies the required number of switch stacks for the EMEA distribution center, and is compatible with the existing 25GbE-certified fiber infrastructure at HQ2 and EMEA-DISTR.

NEW QUESTION # 54

A large multinational financial institution has contracted you to design a new full-stack wired and wireless network for their new 6-story regional office building. The bottom two floors of this facility will be retail space for a large banking branch. The upper floors will be carpeted office space for corporate users, each floor being approximately 100.000 sq ft (9290 sqm). Data centers are all off site and will be out of scope for this project. The customer is underserved by its existing L2-based network infrastructure and would like to take advantage of modern best practices in the new design. The network should be fully resilient and fault-tolerant, with dynamic segmentation at the edge.

The retail space will include public guest Wi-Fi access. Retail associates will have corporate tablets for customer service, and there will be a mix of wired and wireless devices throughout the retail floors. The corporate users will primarily use wireless for connectivity, but several wired clients, printers, and hard VoIP phones will be in use.

The customer is also planning on renovating the corporate office space in order to take advantage of "smart office' technology. These improvements will drive blue-dot wayfinding. presence analytics, and other location- based services The client decided that they would like to manage two wiring closets as a single stack with a total of 10 switches and a minimum transport speed or 25Gbps over OM4 MM fiber They would also like to keep the stacking cabling cost to a minimum.

Which stacking components would be required to meet the customer's requirements in the most cost-effective way if the closets were 190 m (620 ft) apart? (Select two.)

- A. 50GDAC cables
- B. SFP28 transceivers
- C. 25GDAC cables
- D. SFP56 transceivers

Answer: B,D

Explanation:
To meet the customer's requirement of managing two wiring closets as a single stack with a minimum transport speed of 25Gbps over OM4 MM fiber, especially when the closets are 190m apart, the most cost- effective solution would involve using SFP transceivers. SFP28 transceivers can support speeds up to 25Gbps, aligning with the customer's minimum speed requirement. For higher speeds or future-proofing, SFP56 transceivers, which can support speeds up to 50Gbps, could also be considered. Both types are compatible with OM4 multimode fiber, which is capable of supporting these high speeds over the distance specified. DAC (Direct Attach Cable) solutions like options A and C would not be feasible due to the 190m distance between the closets, as DAC cables are typically used for much shorter distances.

NEW QUESTION # 55

......

The second form is Aruba Certified Campus Access Architect Exam (HPE7-A03) web-based practice test. It can be attempted through online browsing, and you can prepare via the internet. The HPE7-A03 web-based practice test can be taken from Firefox, Microsoft Edge, Google Chrome, and Safari. You don't need to install or use any plugins or software to take the HPE7-A03 web-based practice exam. Furthermore, you can take this online mock test via any operating system.
