

# Certification DevOps-Foundation Dumps & Exam

## DevOps-Foundation Duration

BTW, DOWNLOAD part of Prep4cram DevOps-Foundation dumps from Cloud Storage: <https://drive.google.com/open?id=1J5hyc0Mm5dT24SuHCj-G8tyOeD9l8-ky>

A PeopleCert DevOps Foundationv3.6Exam (DevOps-Foundation) practice questions is a helpful, proven strategy to crack the PeopleCert DevOps Foundationv3.6Exam (DevOps-Foundation) exam successfully. It helps candidates to know their weaknesses and overall performance. Prep4cram software has hundreds of PeopleCert DevOps Foundationv3.6Exam (DevOps-Foundation) exam dumps that are useful to practice in real-time.

### Peoplecert DevOps-Foundation Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Exploring DevOps: This section of the exam measures the skills of DevOps engineers and covers the foundations of DevOps, including its emergence as a critical discipline in the digital era. It introduces learners to the basic purpose, evolution, and significance of DevOps in modern software and infrastructure environments.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Automation, Architecting DevOps Toolchains: This section of the exam measures the skills of IT operations specialists and covers key automation principles within the DevOps toolchain. It focuses on CI</li><li>CD pipelines, Infrastructure as Code, containerisation, cloud-native architecture, platform engineering, and emerging technologies like Machine Learning and Generative AI in DevOps contexts.</li></ul>

Topic 3	<ul style="list-style-type: none"> <li>Business and Technology Frameworks: This section of the exam measures the skills of IT operations specialists and covers various supporting frameworks that intersect with DevOps. These include Agile and Lean, IT Service Management, Value Stream Management, Site Reliability Engineering, Safety Culture, Learning Organisations, and Continuous Funding models that enable long-term adaptability.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Culture, Behaviours, Operating Models: This section of the exam measures the skills of DevOps engineers and covers how to assess and evolve organisational culture in relation to DevOps transformation. It includes concepts such as Cultural Debt, Behavioural Models, and Organisational Maturity, helping professionals understand team dynamics and readiness for change.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Measurement, Metrics, and Reporting: This section of the exam measures the skills of DevOps engineers and covers metrics that help monitor and evaluate the performance of DevOps practices. Topics include speed, quality, culture, change lead time, cycle time, and the use of dashboards, value-driven metrics, and AIOps in reporting and decision-making.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>Core DevOps Principles: This section of the exam measures the skills of IT operations specialists and covers essential DevOps principles such as the Three Ways, the Theory of Constraints, and Chaos Engineering. It also introduces the concept of learning organisations, showing how systemic thinking supports continuous improvement.</li> </ul>

## Latest PeopleCert DevOps Foundationv3.6Exam real exams, DevOps-Foundation vce dumps

If you are remain an optimistic mind all the time when you are preparing for the DevOps-Foundation exam, we deeply believe that it will be very easy for you to successfully pass the DevOps-Foundation exam, and get the related DevOps-Foundation certification in the near future. Of course, we also know that how to keep an optimistic mind is a question that is very difficult for a lot of people to answer. As is known to us, where there is a will, there is a way. We believe you will get wonderful results with the help of our DevOps-Foundation Exam Questions as we have been professional in this field.

## Peoplecert PeopleCert DevOps Foundationv3.6Exam Sample Questions (Q59-Q64):

### NEW QUESTION # 59

Which of the following is NOT a characteristic of DevOps?

- A. World-class stability, reliability, availability and security
- B. Ensuring overall organizational success
- C. Fast flow of unplanned work into production**
- D. Working towards a common goal

**Answer: C**

Explanation:

A fast flow of unplanned work into production is not a characteristic of DevOps. In fact, DevOps practices strive to minimize unplanned work (like emergency changes or outages) through automation, testing, collaboration, and rigorous change control. The other options—ensuring organizational success, working toward a common goal, and world-class stability/reliability—are all key DevOps characteristics.

Reference: DevOps Foundation v3.6 syllabus section 1.4; State of DevOps Report.

### NEW QUESTION # 60

What does the Theory of Constraints recognise?

- A. Every process has at least one constraint that affects its ability to meet its goal

- B. A process will only meet the capacity of its constraints
- **C. All of the Above**
- D. Improving constraints is the fastest way to improve the entire system

**Answer: C**

Explanation:

The Theory of Constraints (ToC), as referenced in PeopleCert DevOps Foundation, states:

- \* A: Every system has at least one limiting factor (constraint) that determines overall performance.
- \* B: System throughput is limited by the capacity of the constraint; improving non-constraints has minimal impact.
- \* C: Focusing improvement efforts on the constraint is the most effective way to improve the performance of the entire system.

In DevOps, constraints may appear in testing, change approvals, environment provisioning, or deployment.

By identifying and alleviating these bottlenecks, organizations improve flow and reduce lead time.

Since all three statements (A, B, C) are accurate representations of ToC, the correct answer is D - All of the Above.

Eliyahu M. Goldratt - The Goal

**NEW QUESTION # 61**

An organization is considering introducing Continuous Integration to their software development. What would be the PRIMARY benefit of this approach?

- **A. Commits can be tested together in order to detect and remediate errors before they go into production**
- B. Continuous integration will require the creation of a version control repository
- C. Continuous integration will push more changes into real-time quickly
- D. Continuous integration allows more developers to work on the same product simultaneously

**Answer: A**

Explanation:

Continuous Integration (CI) is the practice of frequently merging small code changes into a shared repository, followed by automated builds and tests. The primary benefit is early detection and resolution of integration issues. When commits are tested together continuously, defects are caught soon after introduction, reducing the cost and complexity of fixing them.

While B (more developers can work together) is a side effect, it is not the primary goal. C (pushing changes quickly) is more related to Continuous Delivery or Continuous Deployment. D (version control) is a prerequisite for CI, not the main benefit.

Therefore, A correctly captures the primary benefit - finding and fixing issues early before they reach production.

**NEW QUESTION # 62**

IT Operations have created a set of centralized platforms and tooling services that any dev team can use to be more productive using guidance from The DevOps Handbook.

Which of the following key characteristics does it have?

- A. A shared version control repository with pre-blessed security libraries
- B. Deploys applications into known good environments with production monitoring
- C. A deployment pipeline that automatically runs code quality and security scanning tools
- **D. All of the above**

**Answer: D**

Explanation:

A centralized platform in DevOps provides standardized, reusable services to development teams, improving productivity and reducing duplication. Characteristics include:

\* A: Centralized version control with approved security libraries promotes consistent and secure coding practices.

\* B: Automated pipelines that include quality and security scans ensure compliance and quality are built-in, not bolted on.

\* C: Deployment to validated environments with monitoring enables quick detection and resolution of issues. Since all three characteristics (A, B, C) are described in PeopleCert and The DevOps Handbook as best practices, D-All of the above is correct.

### NEW QUESTION # 63

Which of the following MOST accurately describes DevOps?

- A. A standard
- B. A team
- **C. A cultural and professional movement**
- D. A methodology

**Answer: C**

Explanation:

DevOps is not simply a team, methodology, or standard. The PeopleCert DevOps Foundation v3.6 materials define DevOps as a "cultural and professional movement" that stresses communication, collaboration, integration, and automation to improve workflow between software developers and IT operations professionals. The cultural transformation is fundamental, emphasizing shared responsibilities, breaking down silos, and fostering continuous improvement.
