It explains the foundational role virtualization plays in creating isolated computing environments.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>List a few use cases of cloud computing: This topic presents practical applications and scenarios where cloud computing is implemented across different industries. It demonstrates real-world examples of how organizations utilize cloud services to solve business problems.</li> </ul>

## Huawei HCIA-Cloud Computing V5.5 Sample Questions (Q54-Q59):

### NEW QUESTION # 54

In Huawei FusionCompute, DVS not only supports configuring static routing, but also supports multiple dynamic routing.

- A. False
- B. True

Answer: A

### NEW QUESTION # 55

Which of the following FusionAccess components does not have backup data?

- A. License
- B. WI
- C. vAG
- D. VLB

Answer: A

Explanation:

Comprehensive and Detailed Explanation (HCIA-Cloud Computing aligned):

FusionAccess consists of multiple components, each with different roles and data persistence requirements.

\* WI (Web Interface) stores configuration and user access information and supports backup.

\* VLB (Virtual Load Balancer) maintains configuration data that can be backed up.

\* vAG (Virtual Access Gateway) also stores configuration-related data that supports backup and recovery.

The License component, however, is not backed up as configuration or system data. Licensing information is typically re-imported or reactivated during recovery rather than restored from backup.
