적중율 좋은 Sales-Admn-202시험대비 최신 덤프모음집 인증자료

ExamPassdump의 덤프선택으로 Salesforce Sales-Admn-202인증시험에 응시한다는 것 즉 성공과 멀지 않았습니다. 여러분의 성공을 빕니다.

최신 Salesforce Administrator Sales-Admn-202 무료샘플문제 (Q135-Q140):

질문 # 135

Universal Containers (UC) has asked their admin to add a new product selection rule to their flagship bundle. In their flagship bundle, there is a nested bundle "Warranty" that contains three warranty options: Gold, Platinum, and Diamond. By default, there is no warranty option selected. If a user has not set a warranty option and selects the product option "Premium Container" in the flagship bundle, the Diamond warranty option should automatically be selected in the child bundle. How should the UC admin set the configuration rule?

- A. Set the configuration rule Child Bundle Condition Level to None, set the Child Bundle Action Level to None.
- B. Set the configuration rule Child Bundle Condition Level to None, set the Child Bundle Action Level to 2,
- C. Set the configuration rule Child Bundle Condition Level to 1, set the Child Bundle Action Level to 1.
- **D. Set the configuration rule Child Bundle Condition Level to 1, set the Child Bundle Action Level to None.**

정답: D

설명:

Scenario:

* Automatically select the Diamond Warranty Option in the child bundle if Premium Container is selected in the parent bundle and no warranty is selected.

Solution:

* Child Bundle Condition Level = 1: Ensures the condition applies at the child bundle level.

* Child Bundle Action Level = None: Prevents overwriting user-selected options but enables automatic defaulting when none are selected.

Why Other Options Are Incorrect:

* B & C: Setting inappropriate levels may lead to overwriting user selections or incorrect rule execution.

* D: Setting both levels to None results in no action or condition enforcement.

Salesforce CPQ Reference:

* Configuration rules and child bundle handling are outlined in CPQ Bundle Configuration Guidelines

질문 # 136

The admin at Universal Containers has a group of Price Rules with Lookup Queries that references a new Rental Rates object. After testing to confirm the Price Rules produce the expected behavior, the Price Rules are ready to be deployed to Production. In which order should the admin deploy Price Rules with Lookup Queries to align with best practices?

- A. Price Rules, Price Conditions, Rental Rates, Lookup Queries, Price Actions
- **B. Rental Rates, Price Rules, Price Conditions, Lookup Queries, Price Actions**
- C. Price Rules, Rental Rates, Lookup Queries, Price Actions, Price Conditions
- D. Rental Rates, Lookup Queries, Price Rules, Price Conditions, Price Actions

정답: B

설명:

Requirement:

* Deploy Price Rules with Lookup Queries that reference a new Rental Rates object.

Best Practices for Deployment Order:

* Step 1: Rental Rates: Deploy the object and data it references first to ensure lookup data is available.

* Step 2: Price Rules: Deploy Price Rules to establish the logic governing pricing calculations.

* Step 3: Price Conditions: These evaluate criteria for the rules to execute.

* Step 4: Lookup Queries: Queries must reference both the object and conditions, so deploy them after both.

* Step 5: Price Actions: Set last to ensure that the actions triggered by the rules execute correctly.

Why Other Options Are Incorrect:

* A, B, D: Deploying Lookup Queries or Price Actions before Rental Rates or Price Rules may cause execution errors due to missing references.

Salesforce CPQ Reference:

* Best practices for deploying CPQ Price Rules and Lookup Queries are detailed in Salesforce documentation.

질문 # 137

An admin is working on a Primary Quote attached to an Opportunity. The Price Book and Currency on the Quote and Opportunity match. However, only some of the Products from the Quote are being synced to the Opportunity, and error messages are displayed.

Which three reasons explain why these Products failed to create Opportunity Products?

Choose 3 answers

- A. Only Products with an Effective Quantity greater than or less than zero sync to the Opportunity.
- B. Exclude from Opportunity is checked on the Product record.
- C. Validation Rules on the Opportunity Product object may silently block the sync process if they are not met.
- D. Only Products with a price greater than zero sync to the Opportunity.
- E. Some Products are missing Price Book Entries.

정답: A,B,C

설명:

Issue Analysis:

* Products not syncing to Opportunity Products is usually caused by specific CPQ conditions or rules.

Reasons for Failure:

* B: Products with an Effective Quantity of zero are excluded from syncing.

* C: Validation Rules on the Opportunity Product object may silently block the sync process if they are not met.

* D: Products with a price of zero do not sync by default.

Why Other Options Are Incorrect:

* A: Missing Price Book Entries prevent quoting entirely, not syncing issues.

* E: The Exclude from Opportunity checkbox applies to the Product Option, not the syncing process.

Salesforce CPQ Reference:

* CPQ guidelines for syncing Quote Lines to Opportunity Products .

질문 # 138

Universal Containers (UC) sells a Product that is only sold as part of a bundle. UC wants to remove this item from the Product search screen.

How can the admin configure the Product to meet this requirement?

- A. Set the Asset Conversion field to One per unit.
- B. Select the Component checkbox on the Product.
- C. Set the Configuration Type field to Allowed.
- D. Select the Hidden checkbox on the Product.

정답: B

설명:

Requirement Overview:

* Universal Containers sells a Product exclusively as part of a bundle and does not want it to appear in the Product Selection screen.

Solution:

* The Component checkbox ensures the Product is only available as part of a bundle and is hidden from the general Product Selection screen.

Steps to Configure:

* Navigate to the Product Record for the item.

* Select the Component checkbox.

* Save the changes.

Validation:

* Confirm that the Product is not visible on the Product Selection screen but is available within its assigned bundles.

질문 # 139

Universal Containers has multiple sales teams that need to select from a subset of the product catalog on the Product Selection page. Which solution meets the business requirement without creating a separate Price Book?

- A. Create multiple bundles with validation Product Rules.
- B. Create a bundle with a Configuration Attribute.

- C. Create a Hidden Filter in Product Selection based on Profile.
- D. Create a Filter Product Rule.

정답: A

설명:

Requirement Overview:

* Each sales team needs access to a specific subset of products without requiring separate Price Books.

Solution:

* Use multiple bundles with validation Product Rules to restrict access to specific products based on user criteria (e.g., Profile or custom field).

* This avoids the need to create and manage separate Price Books for each team.

Steps to Configure:

* Create a bundle for each subset of products.

* Use Product Rules to validate and restrict access based on sales team criteria.

Validation:

* Test the Product Selection page to ensure that each sales team can access only their specific subset of products.

질문 # 140
