

300-620 Latest Exam Duration, Valid Dumps 300-620 Book

DOWNLOAD the newest LatestCram 300-620 PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=1zGeN_dZXzd7uhbHDGGxueuBaz_ChR8-p

We also provide timely and free update for you to get more 300-620 questions torrent and follow the latest trend. The 300-620 exam torrent is compiled by the experienced professionals and of great value. You can master them fast and easily. We provide varied versions for you to choose and you can find the most suitable version of 300-620 Exam Materials. So it is convenient for the learners to master the 300-620 questions torrent and pass the 300-620 exam in a short time.

Vital Exam Domains: A Detailed Overview

In order to deliver result-oriented learning, the content of 300-620 test assesses the candidates' knowledge with the help of six domains. They fabricate the entire exam structure and include minute concepts that are also disclosed below.

- **ACI Packet Forwarding**

This section checks the applicants' knowledge of endpoint learning and skills in the implementation of the bridge domain configuration. This includes the concepts such as Layer 2 unknown hardware proxy, unicast routing, and ARP flooding.

- **ACI Anywhere**

The last exam domain carries the least weightage. Yet it manages to impart a considerable amount of understanding about multipod and multisite specifics.

- **ACI Management**

The second last domain talks about the detailed understanding of out-of-band along with in-band deployment. Besides, it assesses that test-takers' abilities in utilizing syslog, snmp services, handling configuration back-up, performing AAA & RBAC implementation, and setting up an upgrade.

- **Integration**

Under this exam domain, the applicants will have a chance to demonstrate their knowledge of viable ways to deploy VMware vCenter DVS setup along with a service graph. This section also validates the understanding of resolution immediacy in VMM.

- **External Network Connectivity**

This module of the syllabus is all about the implementation of Layer 2 out, which requires candidates to be familiar with the STP/MCP basics and more. Other concepts like Layer 3 out and others are covered diligently as well.

Cisco is one of the most recognizable names in IT infrastructure and networking. They offer a range of products and services, including certification programs for IT professionals. One such certification program is the Cisco 300-620 (Implementing Cisco Application Centric Infrastructure) Certification Exam.

Valid Dumps 300-620 Book | New 300-620 Braindumps

By focusing on how to help you effectively, we encourage exam candidates to buy our 300-620 practice test with high passing rate up to 98 to 100 percent all these years. Our 300-620 exam dumps almost cover everything you need to know about the exam. As long as you practice our 300-620 test question, you can pass exam quickly and successfully. By using them, you can not only save your time and money, but also pass 300-620 Practice Exam without any stress. Before you place orders, you can download the free demos of 300-620 practice test as experimental acquaintance.

Cisco Implementing Cisco Application Centric Infrastructure Sample Questions (Q102-Q107):

NEW QUESTION # 102

Refer to the exhibit. A Cisco ACI fabric must allow any subnet to access the ACI fabric nodes.
Which set of actions meets this requirement?

- A. Provide OOB_CTR to ExtAccess_to_OOBMgmtNetwork.
Consume OOB_CTR from default EPG.
Add subnet 0.0.0.0/0 under default EPG.
- B. Provide OOB_CTR to ExtAccess_to_OOBMgmtNetwork.
Consume OOB_CTR from default EPG.
Add subnet 0.0.0.0/0 under ExtAccess to OOBMgmtNetwork.
- **C. Consume OOB_CTR from ExtAccess_to_OOBMgmtNetwork.
Provide OOB_CTR to default EPG.
Add subnet 0.0.0.0/0 under default EPG.**
- D. Consume OOB_CTR from ExtAccess_to_OOBMgmtNetwork.
Provide OOB_CTR to default EPG.
Add subnet 0.0.0.0/0 under ExtAccess_to_OOBMgmtNetwork.

Answer: C

Explanation:

Provide the OOB_CTR contract on the external-management EPG

(ExtAccess_to_OOBMgmtNetwork) so it offers node-management services.

Consume OOB_CTR on the default node-management EPG so the switches accept that contract.

Add 0.0.0.0/0 as the external-subnet under the ExtAccess_to_OOBMgmtNetwork EPG to allow any source to reach the fabric nodes.

NEW QUESTION # 103

Which ACI import mode processes each managed object individually and skips the invalid MO?

- A. atomic
- B. merge
- C. replace
- **D. best-effort**

Answer: D

Explanation:

The best-effort import mode processes each managed object independently and skips only the invalid MO, allowing the remainder of the configuration to be imported successfully.

NEW QUESTION # 104

In Cisco ACI, what enables inter-End Point Group communications?

- A. subcontracts
- B. community VLANs
- C. private VLANs
- **D. contracts**

Answer: D

NEW QUESTION # 105

An engineer configures two Cisco ACI leaf switches called Leaf1 and Leaf2 as VPC peers. The server called S1 is connected to Leaf1 with a port channel interface. How is S1 learned in the endpoint table of Leaf2?

- **A. on-peer endpoint**
- B. local endpoint
- C. bounce entry endpoint
- D. remote endpoint

Answer: A

NEW QUESTION # 106

An engineer must configure a Cisco ACI bridge domain to prevent flooding from unknown unicast frames. Which action must be configured in Cisco ACI to accomplish this goal?

- A. Configure Clear Remote MAC Entries in the bridge domain mode.
- B. Set Disable Remote EP Learn in the Fabric Wide Setting Policy.
- **C. Configure the bridge domain to operate in optimized mode.**
- D. Set the bridge domain option to Flood in Encapsulation.

Answer: C

Explanation:

A bridge domain can be set to operate in flood mode for unknown unicast frames or in an optimized mode that eliminates flooding for these frames. When operating in flood mode, Layer 2 unknown unicast traffic is flooded over the multicast tree of the bridge domain (GIPo). For the bridge domain to operate in optimized mode you should set it to hardware-proxy. In this case, Layer 2 unknown unicast frames are sent to the spine-proxy anycast VTEP address.
