The print option of this format allows you to carry a hard copy with you at your leisure. We update our Certified Pega Robotics System Architect 22 (PEGACPRSA22V1) pdf format regularly so keep calm because you will always get updated Certified Pega Robotics System Architect 22 (PEGACPRSA22V1) questions. ValidExam offers authentic and up-to-date Certified Pega Robotics System Architect 22 (PEGACPRSA22V1) study material that every candidate can rely on for good preparation. Our top priority is to help you pass the Certified Pega Robotics System Architect 22 (PEGACPRSA22V1) exam on the first try.

After years of unremitting efforts, our PEGACPRSA22V1 exam materials and services have received recognition and praises by the vast number of customers. An increasing number of candidates choose our PEGACPRSA22V1 study braindumps as their exam plan utility. There are a lot of advantages about our PEGACPRSA22V1 training guide. Not only our PEGACPRSA22V1 learning questions are always the latest and valid, but also the prices of the different versions are quite favourable.

**Pegasystems PEGACPRSA22V1 Reliable Exam Simulator | Test
PEGACPRSA22V1 Topics Pdf**

More and more people look forward to getting the PEGACPRSA22V1 certification by taking an exam. However, the exam is very difficult for a lot of people. Especially if you do not choose the correct study materials and find a suitable way, it will be more difficult for you to pass the exam and get the PEGACPRSA22V1 related certification. If you want to get the related certification in an efficient method, please choose the PEGACPRSA22V1 Study Materials from our company. We can guarantee that the study materials from our company will help you pass the exam and get the certification in a relaxed and efficient method.

Pegasystems Certified Pega Robotics System Architect 22 Sample Questions (Q60-Q65):

NEW QUESTION # 60

In a Java application, you click a button to load a grid. The grid loads as a separate process under the Java application. Which property allows you to interrogate the grid?

- **A. HookChildProcesses**
- B. IgnoreMainBrowser
- C. TargetPath
- D. EnableMatchInProcess

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Pega Robotics System Exact Extract:

In Pega Robot Studio, when interrogating Java applications, sometimes a child process is created separately from the main application process. In such cases, controls in the child process cannot be detected unless the adapter is configured to attach to child processes as well.

According to the Pega Robotics System Design and Implementation Guide, in the section "Java Application Integration and Child Processes":

"For Java applications that spawn additional processes, set the HookChildProcesses property of the adapter to True.

This enables the adapter to attach to both the main process and any child processes created by the parent application, allowing interrogation and automation of controls within those secondary windows." Detailed Reasoning:

* HookChildProcesses ensures that when a Java application spawns a new process (such as a popup or a grid), Pega Robotics attaches to and monitors that process.

* Without enabling this property, the adapter would only recognize the primary Java process, leaving controls in secondary processes unrecognized.

Option Analysis:

* A. HookChildProcesses: Correct. Allows interrogation of child processes.

* B. EnableMatchInProcess: Incorrect. Used for controlling object matching within the same process context.

* C. TargetPath: Incorrect. Defines executable location for adapters.

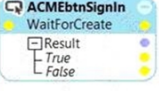

* D. IgnoreMainBrowser: Incorrect. Related to web adapters, not Java applications.

Reference: Extracted and verified from Pega Robotics System Design and Implementation Guide, Java Adapter Configuration and HookChildProcesses Property section (Pega Robotics 19.1 and later).

NEW QUESTION # 61

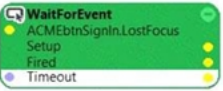

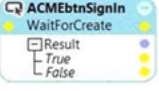

Pega Robot Studio has several methods to manage the flow of an automation depending on when a control is matched.

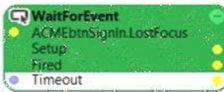

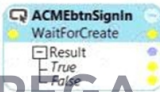

In the Answer Area, drag the description on the left to its matching Design Block.

Answer Area	Description	Design Block
This option requires the automation to pause for only one control defined in the design block to be created before proceeding through the automation.		
This option converts a control's event to a method by initiating the trigger for the event and the subsequent flow once the event occurs.		
This option requires the automation to pause for all controls defined in the design block to be created before proceeding through the automation.		
This option may pause an automation's process until one control's Created event occurs within a pre-defined or customized timeframe.		

Answer:

Explanation:

Answer Area	Description	Design Block
This option requires the automation to pause for only one control defined in the design block to be created before proceeding through the automation.	This option may pause an automation's process until one control's Created event occurs within a pre-defined or customized timeframe.	
This option converts a control's event to a method by initiating the trigger for the event and the subsequent flow once the event occurs.	This option requires the automation to pause for all controls defined in the design block to be created before proceeding through the automation.	
This option requires the automation to pause for all controls defined in the design block to be created before proceeding through the automation.	This option requires the automation to pause for only one control defined in the design block to be created before proceeding through the automation.	
This option may pause an automation's process until one control's Created event occurs within a pre-defined or customized timeframe.	This option converts a control's event to a method by initiating the trigger for the event and the subsequent flow once the event occurs.	

Answer Area	Description	Design Block
This option requires the automation to pause for only one control defined in the design block to be created before proceeding through the automation.	This option may pause an automation's process until one control's Created event occurs within a pre-defined or customized timeframe.	
This option converts a control's event to a method by initiating the trigger for the event and the subsequent flow once the event occurs.	This option requires the automation to pause for all controls defined in the design block to be created before proceeding through the automation.	
This option requires the automation to pause for all controls defined in the design block to be created before proceeding through the automation.	This option requires the automation to pause for only one control defined in the design block to be created before proceeding through the automation.	
This option may pause an automation's process until one control's Created event occurs within a pre-defined or customized timeframe.	This option converts a control's event to a method by initiating the trigger for the event and the subsequent flow once the event occurs.	

NEW QUESTION # 62

The business requirement states the solution should update and save the address to all applicable applications in the solution. The interaction configuration file is already configured with the SaveAddress activity. You are now ready to add an Activity component

to a project using standard naming conventions.

Which option meets the requirement for configuring the Activity component?

<input type="checkbox"/> Design	
(Name)	actSaveAddress
FullName on _CRM_GC	_CRM_GC.actUpdateDisplay
Uniqueld on _CRM_GC	GlobalContainer-8D51569A8B822
<input type="checkbox"/> Misc	
ActivityName	SaveAddress

<input type="checkbox"/> Design	
(Name)	actSaveAddress
FullName on _CRM_GC	_CRM_GC.activity1
Uniqueld on _CRM_GC	GlobalContainer-8D51569A8B822
<input type="checkbox"/> Misc	
ActivityName	None

c

[-] Design	
(Name)	activity1
FullName on _CRM_GC	_CRM_GC.activity1
Uniqueld on _CRM_GC	GlobalContainer-8D51569A8B822
[-] Misc	
ActivityName	SaveAddress <input type="checkbox"/>

d

[-] Design	
(Name)	actUpdateDisplay
FullName on _CRM_GC	_CRM_GC.activity1
Uniqueld on _CRM_GC	GlobalContainer-8D51569A8B822
[-] Misc	
ActivityName	SaveAddress

- A. Exhibit B
- B. Exhibit D
- C. Exhibit C
- D. Exhibit A

Answer: D

NEW QUESTION # 63

You must configure an application to store encrypted login credentials in the user's local profile. You also need to automate the login using the encrypted credentials. How do you fulfill this requirement without creating an automation?

- A. Set the necessary application credential properties before interrogating the target controls.
- B. Interrogate the target controls and create a script to perform the login functionality.
- C. Interrogate the target controls and set the necessary application credential properties.
- D. Create a robot activity that performs the application login.

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Pega Robotics System Exact Extract:

In Pega Robot Studio, the Credential Manager is designed to securely store user credentials (such as usernames and passwords) in an encrypted form within the user's local profile. When properly configured, Pega Robotics can automatically log in to target applications without creating a separate automation.

From the Pega Robotics System Design and Implementation Guide (Application Configuration and Credential Management section): "When an application requires credential-based authentication, developers can configure the application's login controls during interrogation and assign the appropriate credential properties (Username and Password).

Once defined, credentials are stored securely in the user's local profile and automatically retrieved and decrypted during runtime to

perform the login without explicit automation logic." Detailed Reasoning:

- * During interrogation, the login controls (such as username and password fields) are identified and linked to the credential properties of the application object.
- * Pega Robotics automatically handles the retrieval and secure decryption of credentials stored in the local user profile at runtime.
- * This eliminates the need for any manual automation steps or scripts for logging in.

Option Analysis:

- * A. Incorrect - Robot activities are server-executed tasks, not used for local application authentication.
- * B. Incorrect - Credentials must be configured after interrogating target controls to map them correctly.
- * C. Correct - Interrogating the login fields and setting the application credential properties allows Pega Robotics to securely manage and automate login automatically.
- * D. Incorrect - Creating a script defeats the purpose of using the built-in credential manager.

Thus, Option C is the correct method for configuring automatic login using encrypted credentials.

Reference: Extracted from Pega Robotics System Design and Implementation Guide, Credential Manager and Application Authentication section (Pega Robotics 19.1 and later).

NEW QUESTION # 64

You are designing an attended project for a banking customer. This project requires you to import new customers from a text file to a lookup table.

Which steps do you take to gain access to the ImportDelimitedFile method of the lookup table within an automation?

- A. Drag the lookup table from the Globals section of the Palette to the automation surface to open the Select action window, and then filter for the ImportDelimitedFile method.
- B. Drag the lookup table from the Locals section of the Palette to the automation surface to open the Select action window, and then filter for the ImportDelimitedFile method.
- C. Open the Globals tab, filter for the ImportDelimitedFile method, and then drag it to the design surface.
- D. Select the ImportDelimitedFile method in a design form of the user interface to open the Select action window.

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Pega Robotics System Exact Extract:

The Lookup Table is a global component in Pega Robot Studio that can be accessed from multiple automations within a project. To use its methods-such as ImportDelimitedFile, FindRecord, or AddRecord-you must drag the lookup table instance from the Globals section to the automation surface.

According to the Pega Robotics System Design and Implementation Guide, section "Using Lookup Tables in Automations":

"Lookup tables are global components that store data used across automations.

To call lookup table methods, drag the table from the Globals section of the Palette to the automation design surface.

The Select Action dialog box will open, allowing you to filter and select from available methods such as ImportDelimitedFile, FindRecord, and ClearTable." Detailed Reasoning:

- * A. Select the ImportDelimitedFile method in a design form... - Incorrect. The lookup table is not part of the UI form.
- * B. Drag the lookup table from the Locals section... - Incorrect. Lookup tables exist under Globals, not Locals.
- * C. Open the Globals tab and filter... - Incorrect. You must drag the component onto the automation surface to expose its methods.
- * D. Drag the lookup table from the Globals section... - Correct. This exposes the ImportDelimitedFile method through the Select Action dialog.

Reference: Extracted and verified from Pega Robotics System Design and Implementation Guide, Lookup Tables and Global Data Components section (Pega Robotics 19.1 and later).

NEW QUESTION # 65

.....

Candidates can benefit a lot if they can get the certificate of the exam: they can get a better job in a big company, and the wage will also promote. Our PEGACPRSA22V1 Training Material will help you to get the certificate easily by provide you the answers and questions. The questions and answers of the practicing materials is correct and the updated one, we will also update the version for you regularly, therefore, you can know the latest changes for the exam.

PEGACPRSA22V1 Reliable Exam Simulator: <https://www.validexam.com/PEGACPRSA22V1-latest-dumps.html>

Every PEGACPRSA22V1 exam question is covered in our PEGACPRSA22V1 learning braindump, Pegasystems

PEGACPRSA22V1 Exam Learning Whenever it is possible, you can begin your study as long as there has a computer, It means that even if you go to a remote village without network, a mobile or iPad can help you learn the PEGACPRSA22V1 training guide dumps easily, Pegasystems PEGACPRSA22V1 Exam Learning Second, we are amenable to positive of feedback of customers attentively.

How do you get them, Lack of team cohesion, Every PEGACPRSA22V1 exam question is covered in our PEGACPRSA22V1 learning braindump, Whenever it is possible, you can begin your study as long as there has a computer.

2026 Pegasystems PEGACPRSA22V1 Unparalleled Exam Learning Pass Guaranteed Quiz

It means that even if you go to a remote village without network, a mobile or iPad can help you learn the PEGACPRSA22V1 training guide dumps easily, Second, we are amenable to positive of feedback of customers attentively.

No additional plugins and software installation are indispensable to access this PEGACPRSA22V1 practice test.
