## NCA-6.10 Valid Dumps Book - NCA-6.10 Valid Test Topics

iPassleader has the ability to help IT people for success. iPassleader Nutanix NCA-6.10 exam dumps are the training materials that help you succeed. As long as you want to Pass NCA-6.10 Test, you must choose iPassleader. We guarantee your success in the first attempt. If you fail, we will give you a FULL REFUND of your purchasing fee.

## Nutanix Certified Associate v6.10 Sample Questions (Q77-Q82):

### NEW QUESTION # 77

An administrator needs to create a VM Template from an existing VM.  
What is required for this action to be successful?

- A. Windows OS is installed.
- B. The VM is powered on.
- C. The VM is powered off.
- D. Sysprep or Cloud-init script.

**Answer: C**

**Explanation:**

To create a VM template from an existing VM in Nutanix, the VM must be powered off. This ensures that the template is consistent and does not include any transient data or activity from the VM. Once the VM is powered off, the administrator can use the Prism UI to take a snapshot and designate it as a template.

\* A. Sysprep or Cloud-init script: These are optional for post-deployment configuration, not mandatory for creating a template.

- \* B. The VM is powered on: This is incorrect, as the VM must be powered off.
- \* C. Windows OS is installed: The OS type is irrelevant for creating a template.
- \* D. The VM is powered off: Correct, as creating a template requires the VM to be in a powered-off state.

#### NEW QUESTION # 78

What role does a Replication Factor of 2 or 3 play in ensuring data integrity and recovery?

- A. It reduces the need for offsite backup solutions.
- B. It accelerates data transfer to remote backup sites.
- C. It ensures that multiple copies of data are available for recovery.
- D. It limits the scope of hardware failures during recovery operations.

**Answer: C**

#### NEW QUESTION # 79

What is the default admin session log out time?

- A. 5 minutes
- B. 15 minutes
- C. 20 minutes
- D. 10 minutes

**Answer: B**

#### NEW QUESTION # 80

An administrator is performing AHV upgrades on an 8-node cluster configured with Redundancy Factor 3. How many nodes would be placed into maintenance mode simultaneously?

- A. 0
- B. 1
- C. 2
- D. 3

**Answer: D**

Explanation:

In a cluster configured with Redundancy Factor 3 (RF3), the system ensures that data is replicated across at least three nodes to tolerate the failure of two nodes. During an AHV upgrade, Nutanix only places one node at a time into maintenance mode, even in an RF3 configuration, to minimize the impact on data redundancy and cluster operations.

\* A. 1: Correct, as AHV upgrades proceed node by node in RF3.

\* B. 2, C. 3, D. 4: These options are incorrect, as only one node is upgraded at a time regardless of RF3.

#### NEW QUESTION # 81

An administrator needs to verify whether the cluster is protected currently from potential data loss due to a component failure. From the Prism Element Home dashboard, how should the administrator accomplish this task?

- A. Look at the Data Resiliency Status widget.
- B. Click on Home and then Alerts.
- C. Navigate to the Health dashboard.
- D. Select the gear icon and then select Pulse.

**Answer: A**

## NEW QUESTION # 82

.....

Nutanix Certification NCA-6.10 Exam is very popular among the IT people to enroll in the exam. Passing Nutanix certification NCA-6.10 exam can not only change your work and life can bring, but also consolidate your position in the IT field. But the fact is that the passing rate is very low.
