- B. Security zones will not work in firewall policy layer
- C. Security zones will not work in Automatic NAT rules
- D. Security zone will not work in Manual NAT rules

Automatic NAT rules are rules that automatically define how to translate the source and destination IP addresses and ports of each connection based on the network objects or groups properties. Automatic NAT rules support using Security Zones as objects. Security Zones can also work in firewall policy layer and network topology.[Security Zones Best Practices], [NAT Methods]
