## Salesforce Arch-303 Reliable Exam Questions | Arch-303 Reliable Braindumps Free

If you would like to create a second steady stream of income and get your business opportunity in front of more qualified people, please pay attention to Salesforce Arch-303 latest study dumps. Arch-303 useful exam torrents are valid and refined from the previous actual test. You will find the Braindumpsqa Arch-303 valid and reliable questions & answers are all the key questions, unlike other vendors offering the dumps with lots of useless questions, wasting the precious time of candidates. Braindumpsqa Salesforce free demo is available and you can download and have a try, then you can make decision to buy the Salesforce exam dumps. Do study plan according to the Salesforce exam study material, and arrange your time and energy reasonably. I believe that an efficiency and reasonable exam training can help you to pass the Arch-303 Exam successfully.

## Salesforce Certified B2C Commerce Architect Sample Questions (Q41-Q46):

NEW QUESTION # 41

A third party survey provider offers both an API endpoint for individual survey data and an SFTP server endpoint that can accept batch survey data. The initial implementation of the integration includes

1. Marking the order as requiring a survey before order placement
2. On the order confirmation page, the survey form is displayed for the customer to fill
3. The data is sent to the survey provider API, and the order is marked as not requiring a survey. Later it was identified that this solution is not fit for purpose as the following issues and additional requirements were identified:
  1. If the API call fails, the corresponding survey data is lost. The Business requires to avoid data loss.
  2. Some customers skipped the form. The Business requires sending a survey email to such customers.
  3. The Order Management System (OMS) uses a non-standard XML parser it did not manage to parse orders with the survey, until the survey attribute was manually removed from the XML.

How should the Architect address the issues and requirements described above?

- A. Create a custom session attribute when the survey is required. Send to the API endpoint in real-time. On failure, capture the survey data in the session and reprocess, use the session attribute to send emails for the cases when survey was skipped.
- B. Create a custom object to store the survey data. Send to the API endpoint using a job. On success, remove the custom object. On failure, send the survey data with API from the next execution of the same job. Use the custom object to send emails for the cases when the survey was skipped.
- C. Send the survey data to the API endpoint in real-time until the survey data is successfully captured. Instruct the OMS development team to update their XML parser, use the Order survey attribute to send emails for the cases when the survey was skipped.
- **D. Create a custom object when the survey is required. Send to the API endpoint in real-time. On success, remove the object. On failure, capture the survey data in the custom object and later reprocess with a job. Use the custom object to send emails for the cases when survey was skipped.**

**Answer: D**

Explanation:

This approach addresses all concerns: data retention, reattempt on failure, and follow-up communication. By storing survey data in a custom object, data is preserved even if the API call fails, allowing for reprocessing.

This method also facilitates sending follow-up emails by querying custom objects for surveys that were skipped, ensuring comprehensive coverage and reliability in data handling and customer engagement.

#### NEW QUESTION # 42

During code review, the Architect found that there is a service call on every visit of the product detail page (PDP).

What best practices should the Architect ensure are followed for the service configuration?

Choose 2 answers

- A. Service logging is disabled.
- B. Service timeout is set.
- C. Circuit breaker is enabled.
- **D. Service mock up call is configured.**

**Answer: D**

Explanation:

For logging practices in a complex LINK cartridge integration, the recommendation is:

\* Get logger for cartridge-specific category (C): This practice allows for more precise and relevant logging by focusing on the specific cartridge, making troubleshooting more efficient.

\* Report debug level message for the back-end asynchronous communication: This ensures that all detailed interactions are logged, providing valuable data for diagnosing issues.

\* Report all errors at error level message: This categorizes all critical issues under error logs, which is essential for quick identification and resolution of problems affecting the system's operations.

This structured logging strategy enhances the ability to monitor and troubleshoot the system effectively, especially in complex integrations where multiple components interact asynchronously.

#### NEW QUESTION # 43

Given a website launched to production, the Architect can rely on several SFCC Business Manager tools that provide an automatic notification feature.

Which three tools have such a feature and do not require to be monitored manually?

Choose 3 answers

- A. Quota Status
- B. Custom Log Settings
- C. Pipeline Profiler
- D. Job Schedules
- E. Analytics Conversion Reports

**Answer: A,C,D**

Explanation:

The Salesforce B2C Commerce Business Manager tools that feature automatic notifications are:

\* Option A (Job Schedules): Business Manager can send notifications based on job schedules, alerting users when a scheduled job has completed, failed, or met specific conditions. This feature helps in monitoring automated processes without manual oversight.

\* Option D (Pipeline Profiler): This tool provides automatic notifications regarding the performance of different pipelines, allowing architects and developers to monitor site performance and troubleshoot issues proactively.

\* Option E (Quota Status): Automatically notifies administrators when certain quotas are reached or exceeded, such as API call limits or data storage limits, which is crucial for maintaining site stability and performance.

These tools are essential for proactive site management, ensuring that administrators can address potential issues before they affect the site's operation.

#### NEW QUESTION # 44

An integration cartridge implements communication between the B2C Commerce Storefront and a third-party service provider. The cartridge contains the localServiceRegistry code:

How does this code sample accomplish authentication to the service provider?

- A. By Issuing a Basic Auth request to the service provider.
- B. By wrapping the authentication service call with Basic Auth.
- C. By disabling Basic Auth and executing the service authentication call.
- D. By performing a signed SOAP Auth request using a certificate.

**Answer: C**

Explanation:

The code sample shows the creation of a service request to a third-party service provider, where the authentication method is explicitly set to 'NONE' using the line `svc.setAuthentication("NONE");`. This configuration implies that the request does not use Basic Authentication or any embedded credentials like client ID and secret in the HTTP headers for authentication purposes. Instead, it builds the authentication details into the request body, which suggests that the service expects credentials as part of the payload rather than as part of the standard authentication headers, thus effectively disabling Basic Auth for this transaction.

#### NEW QUESTION # 45

A new version of the Page Show controller is required for implementation of Page Designer specific look. It requires implementation of a specific, cache period for Page Designer pages, which is not currently available in the base Storefront Reference Architecture (SFRA) cache.js module. What two steps should the Architect instruct the developer to implement?

Choose 2 answers

- A. Create new cache.js in client's cartridge. Extend cache.js from app\_storefront\_base and add a function for the Page Designer caching.
- B. Create new cache.js in client's cartridge. Copy cache.js from app\_storefront\_base and add a function for the Page Designer caching.
- C. Create new Page.js controller in client's cartridge. Extend the code from base and prepend the new cache middleware function to Page-Show route.
- D. Create new Page.js controller in client's cartridge. Copy code from base and modify the Page-Show route to include the new cache middleware function.

**Answer: A,D**

Explanation:

To implement a specific cache period for Page Designer pages in SFRA:

\* Option A involves creating a new Page.js controller in the client's cartridge, where the existing Page- Show route can be modified to include a custom caching logic. This ensures that the specific caching requirements for Page Designer pages are met without altering the base functionality for other pages.

\* Option D calls for extending the existing cache.js module in the client's cartridge to include a function specifically for Page Designer caching. This allows for reusing the existing caching logic while adding enhancements specific to the Page Designer pages, thus maintaining efficiency and clarity in the codebase.

Both options provide a clean, maintainable approach to customizing caching for specific requirements in SFRA, avoiding disruptions in other areas of the site functionality.

## NEW QUESTION # 46

.....

Braindumpsqa's Salesforce Arch-303 Exam Training materials allows candidates to learn in the case of mock examinations. You can control the kinds of questions and some of the problems and the time of each test. In the site of Braindumpsqa, you can prepare for the exam without stress and anxiety. At the same time, you also can avoid some common mistakes. So you will gain confidence and be able to repeat your experience in the actual test to help you to pass the exam successfully.

**Arch-303 Reliable Exam Questions:** [https://www.braindumpsqa.com/Arch-303\\_braindumps.html](https://www.braindumpsqa.com/Arch-303_braindumps.html)

Salesforce Arch-303 Exam Question 24/7 CUSTOMER ASSISTANCE, Our Arch-303 study material is the most popular examination question bank for candidates, And do you want to be such a fish to pass the competitive examination in the Salesforce Arch-303 Reliable Exam Questions field, Salesforce Arch-303 practice exam torrent is the most useful study material for your preparation, Salesforce Arch-303 Exam Question It will clean all obstacles on your way.
