IAPP Certified Information Privacy Manager (CIPM) Sample Questions (Q166-Q171):

NEW QUESTION # 166

Which will best assist you in quickly identifying weaknesses in your network and storage?

- A. Reviewing your role-based access controls.
- B. Reviewing your privacy program metrics.
- C. Establishing a complaint-monitoring process.
- **D. Running vulnerability scanning tools.**

Answer: D

NEW QUESTION # 167

What is the main purpose in notifying data subjects of a data breach?

- A. To avoid financial penalties and legal liability
- B. To enable regulators to understand trends and developments that may shape the law
- **C. To allow individuals to take any actions required to protect themselves from possible consequences**
- D. To ensure organizations have accountability for the sufficiency of their security measures

Answer: C

Explanation:

Explanation

The main purpose in notifying data subjects of a data breach is to allow individuals to take any actions required to protect themselves from possible consequences, such as identity theft, fraud, or discrimination.

This is consistent with the principle of transparency and the right to information under the GDPR. The other options are not the main purpose of notification, although they may be secondary effects or benefits of the process. References:

* Data protection impact assessments | ICO

* [Art. 34 GDPR - Communication of a personal data breach to the data subject - GDPR.eu]

NEW QUESTION # 168

As a Data Protection Officer, one of your roles entails monitoring changes in laws and regulations and updating policies accordingly. How would you most effectively execute this responsibility?

- A. Regularly engage regulators.
- **B. Subscribe to email list-serves that report on regulatory changes.**
- C. Consult an external lawyer.
- D. Attend workshops and interact with other professionals.

Answer: B

NEW QUESTION # 169

An organization's privacy officer was just notified by the benefits manager that she accidentally sent out the retirement enrollment report of all employees to a wrong vendor.

Which of the following actions should the privacy officer take first?

- **A. Perform a risk of harm analysis.**

- B. Contact the recipient to delete the email.
- C. Send firm-wide email notification to employees.
- D. Report the incident to law enforcement.

Answer: A

NEW QUESTION # 170

The theft of proprietary information could have best been prevented by?

- A. Escalating access requests for approval by the appropriate data custodian.
- B. Doing criminal background checks on all contractors.
- **C. Requiring multi-factor authentication for contractor access to confidential company data.**
- D. Having requests for access reviewed by the privacy office.

Answer: C

Explanation:

Comprehensive and Detailed Explanation:

The most effective way to prevent unauthorized access and data theft is requiring multi-factor authentication (MFA), which adds an extra layer of security beyond just passwords.

* Option A (Criminal background checks on all contractors) - Background checks help reduce risk but do not prevent credential misuse.

* Option B (Reviewing access requests by the privacy office) - The privacy office may advise on best practices but is not responsible for granting or enforcing access controls.

* Option C (Escalating access requests for approval by a data custodian) - While this improves oversight, it does not actively prevent credential misuse.

* Option D (Requiring MFA) is the best solution because it ensures that even if a password is compromised, an additional authentication factor is required, reducing unauthorized access risks.
