

New Fortinet FCP_FAZ_AN-7.6 Test Review & FCP_FAZ_AN-7.6 Exams Dumps

P.S. Free & New FCP_FAZ_AN-7.6 dumps are available on Google Drive shared by PrepAwayExam: <https://drive.google.com/open?id=1AsYqHZfc9YSr3mqo97DCphbNwf9XyAlY>

The clients only need 20-30 hours to learn the FCP_FAZ_AN-7.6 exam questions and prepare for the test. Many people may complain that we have to prepare for the FCP_FAZ_AN-7.6 test but on the other side they have to spend most of their time on their most important things such as their jobs, learning and families. But if you buy our FCP_FAZ_AN-7.6 Study Guide you can both do your most important thing well and pass the test easily because the preparation for the test costs you little time and energy.

Fortinet FCP_FAZ_AN-7.6 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • SOC operation and automation: This domain addresses configuring events and event handlers, setting up incidents and indicators for threat tracking, configuring playbooks and fabric automation for orchestrated responses, and troubleshooting automation workflow issues.
Topic 2	<ul style="list-style-type: none"> • Features and concepts: This domain covers FortiAnalyzer's integration with Security Fabric for log collection, the technical processes of log data flow, normalization and parsing, and the SOC features available for security monitoring and analysis.
Topic 3	<ul style="list-style-type: none"> • Log Analysis: This domain focuses on examining and interpreting logs, events, and incidents, using FortiView dashboards and widgets for data visualization, and diagnosing report generation issues.
Topic 4	<ul style="list-style-type: none"> • Reports: This domain explains the use of reports, charts, and datasets for presenting security intelligence, covers report configuration to meet organizational requirements, and includes troubleshooting report generation problems.

Fortinet New FCP_FAZ_AN-7.6 Test Review Exam Latest Release | Updated FCP_FAZ_AN-7.6 Exams Dumps

Practicing with Fortinet FCP_FAZ_AN-7.6 Exam questions will help you to become an expert in and acquire the Fortinet FCP_FAZ_AN-7.6. Fortinet FCP_FAZ_AN-7.6 Exam Questions allow you to verify your skills as a professional. You have to pass the Fortinet FCP_FAZ_AN-7.6 to achieve the associate-level certification.

Fortinet FCP - FortiAnalyzer 7.6 Analyst Sample Questions (Q33-Q38):

NEW QUESTION # 33

Which two statements regarding the outbreak detection service are true? (Choose two.)

- A. It automatically downloads new event handlers and reports.
- B. New alerts are received by email.
- C. Outbreak alerts are available on the root ADOM only.
- D. An additional license is required.

Answer: A,D

Explanation:

The FortiAnalyzer Outbreak Detection Service is a licensed feature that requires a valid license to access outbreak alerts, event handlers, and reports. Without a valid license, these features are not available, and only a default alert page is shown.

When licensed, the service automatically downloads outbreak-related event handlers and reports from FortiGuard, enabling timely detection and response to emerging malware outbreaks.

NEW QUESTION # 34

What is the purpose of playbook trigger variables?

- A. To use information from the trigger to filter the action in a task
- B. To provide the trigger information to make the playbook start running
- C. To store the start times of playbooks with On_Schedule triggers
- D. To display statistics about the playbook runtime

Answer: A

Explanation:

Exact Extract: Study Guide p.211: trigger variables use information from the event or incident trigger in later playbook tasks.

Technical Deep Dive: The correct answer is B. Trigger variables allow a playbook task to reuse values from the event or incident that started the playbook, such as endpoint IP, device, severity, or incident fields. That allows a task to filter a report, get matching logs, or target a response action dynamically. Option A describes monitoring statistics, not variables. Option C reverses the relationship: the trigger starts the playbook, and the variables are then available to tasks. Option D is unrelated to ON_SCHEDULE timing.

NEW QUESTION # 35

When generating reports on FortiAnalyzer, macros can be used to include additional data. Which two statements about macros are true? (Choose two.)

- A. Macros are supported in FortiGate ADOMs only
- B. Macros cannot be customized
- C. Macros do not need to be associated with a chart
- D. Macros are abbreviated dataset queries

Answer: C,D

NEW QUESTION # 36

Exhibit.

Device Name	Device ID	Used Space	logs / quarantine / content	TSB	Allocated Quota	Used Quota
FGT-A	FGVM010000077646	352.0KB	(352.0KB / 0.0KB / 0.0KB)	0.0KB	unlimited	n/a
FGT-B	FGVM010000064692	400.7MB	(400.7MB / 0.0KB / 0.0KB)	0.0KB	unlimited	n/a
FGT-C	FGVM010000062036	1.2MB	(1.2MB / 0.0KB / 0.0KB)	0.0KB	unlimited	n/a

Total: 3 log devices, used=402.3MB quota=unlimited

AdomName	AdomOID	Type	[Retention	Quota	Used	logs/quarant/	content/	TSB	Used%	[Retention	Quota	Used	SizeKB/	incho	Used%
ADOM1	185	FSF	1000days	900.0MB	603.0MB	401.0MB	0.0KB / 0.0KB	0.0KB	66.8%	1000days	2.1GB	1.9GB	67.9MB / 17.0KB		92.4%

What can you conclude from this output?

- A. Archive logs are using more space than analytic logs.
- **B. FGT_B is the Security Fabric root.**
- C. The allocated disk quota to ADOM1 is 3 GB.
- D. There is no disk quota allocated to quarantining files.

Answer: B

Explanation:

Exact Extract: Study Guide p.19-p.20: the Security Fabric root/upstream FortiGate relationship affects how traffic and UTM logs are correlated.

Technical Deep Dive: The correct answer is B. The output indicates FGT_B is acting as the Security Fabric root. In Security Fabric logging, FortiAnalyzer uses Fabric relationships to correlate logs and avoid duplicate traffic logging. The other options draw conclusions the output does not support: disk quota allocation to quarantine files, exact ADOM disk quota size, or archive-versus-analytics usage require explicit storage lines.

The Fabric root conclusion is the one directly supported by the displayed Fabric relationship information.

NEW QUESTION # 37

Exhibit.

Laptop1 is used by several administrators to manage FortiAnalyzer. You want to configure a generic text filter that matches all login attempts to the web interface generated by any user other than admin", and coming from Laptop1.

Which filter will achieve the desired result?

- **A. Operation-login and performed_on=="GUI(10.1.1.100)' and user!=admin**
- B. Operation-login and dstip==10.1.1.210 and user!=admin
- C. Operation-login and srcip== 10.1.1.100 and dstip==10.1.1.210 and user==admin
- D. Operation-login and performed_on=="GU (10.1.1.120)' and user!=admin

Answer: A

Explanation:

Exact Extract: Study Guide p.83: generic text filters support field operators, including equality and inequality, for precise event-handler matching.

Technical Deep Dive: The correct answer is A. The required filter must match login operations to the GUI from Laptop1 and exclude the admin user. Option A includes the login operation, the correct GUI/IP value for Laptop1, and user!=admin. Option B uses the wrong IP address. Option C incorrectly matches user==admin, which is the opposite of the requirement. Option D lacks the correct performed_on GUI condition and has malformed inequality syntax. For event-handler filters, small syntax or field mistakes change the result completely.

NEW QUESTION # 38

.....

We have seen that candidates who study with outdated FCP_FAZ_AN-7.6 practice material don't get success and lose their resources. To save you from loss of money and time, BrainDumpsStore is offering a product that is specially designed to help you pass the FCP - FortiAnalyzer 7.6 Analyst (FCP_FAZ_AN-7.6) exam on the first try. The Fortinet FCP_FAZ_AN-7.6 Exam Dumps is easy to use and very easy to understand, ensuring that it is student-oriented. You can choose from 3 different formats available according to your needs. The 3 formats are desktop FCP_FAZ_AN-7.6 practice test software, web-based FCP_FAZ_AN-7.6 practice exam, and FCP_FAZ_AN-7.6 dumps PDF format.
