EMEA-Advanced-Support Exam Consultant & EMEA-Advanced-Support Exam Score

our experts have rewritten the textbooks according to the exam outline of EMEA-Advanced-Support, and have gathered all the key difficulties and made key notes, so that you can review them in a centralized manner. Experts also conducted authoritative interpretations of all incomprehensible knowledge points through examples and other methods. The expressions used in EMEA-Advanced-Support Learning Materials are very easy to understand. Even if you are an industry rookie, you can understand professional knowledge very easily. The EMEA-Advanced-Support training torrent will be the best study guide for you to obtain your certification.

Fortinet EMEA Advanced Support Exam Sample Questions (Q50-Q55):

NEW QUESTION # 50

Which FortiGate feature allows for policy-based routing?

- A. Dynamic Routes
- B. Static Routes
- C. SD-WAN Rules

- **D. Policy Routes**

Answer: D

Explanation:

Policy Routes in FortiGate allow routing decisions based on criteria like source, destination, or service, overriding the default routing table. SD-WAN Rules (A) are for WAN optimization, Static Routes (C) are fixed, and Dynamic Routes (D) are protocol-based, not policy-based. Exact extract: "Policy Routes allow FortiGate to make routing decisions based on user-defined criteria, such as source/destination IPs or services, overriding standard routing."

NEW QUESTION # 51

Which of the following is a benefit of using FortiGate's Security Fabric?

- A. It automatically configures VLANs on FortiSwitches
- **B. It enables centralized management of multiple Fortinet devices**
- C. It reduces the need for firewall policies
- D. It increases the speed of IPsec VPN tunnels

Answer: B

Explanation:

The Fortinet Security Fabric provides a centralized management platform for multiple Fortinet devices (e.g., FortiGate, FortiSwitch, FortiAP), enabling coordinated security policies, telemetry sharing, and simplified administration. It does not directly speed up VPNs (B), reduce firewall policies (C), or auto-configure VLANs (D). Exact extract: "The Fortinet Security Fabric enables centralized management and visibility across Fortinet devices, allowing coordinated security policies and telemetry sharing for enhanced protection."

NEW QUESTION # 52

What does the below route indicate?

- A. The destination network can be reached via any gates
- B. The device does not know the destination
- C. It is a dummy route in the routing table
- **D. The destination network is locally connected on that interface**

Answer: D

Explanation:

A route with a directly connected interface (no gateway) indicates the destination network is locally attached to that interface on the FortiGate. This is common for networks directly connected to the device's interfaces.

Option A is vague, B is incorrect as it's not a dummy route, and D suggests an unknown route, which isn't the case. Exact extract: "A directly connected route indicates that the destination network is locally attached to the interface specified in the routing table... No gateway is required for such routes as the FortiGate is directly connected to the network."

NEW QUESTION # 53

In VMware vSphere, the term VMotion refers to

- A. The patented technology available to migrate a server from Hyper-V to VMware
- **B. A zero downtime live migration of workloads from one server to another**
- C. The streaming of high definition video on a virtual machine
- D. The process used to describe the movement of hard drive platters on a virtual machine

Answer: B

Explanation:

VMotion in VMware vSphere enables live migration of running virtual machines from one physical server to another with zero downtime, ensuring continuous operation. Fortinet's FortiGate-VM supports such environments. Options A, C, and D are incorrect as they do not describe VMotion; C refers to a different migration scenario, and D is unrelated to virtualization. Exact extract:

"VMotion allows the live migration of a running virtual machine from one physical server to another with no downtime... This ensures workloads continue running during server maintenance or load balancing."

NEW QUESTION # 54

Which protocols are used by an email client to retrieve emails?

- A. SNMP
- B. POP3
- C. SMTP
- D. IMAP4

Answer: B,D

Explanation:

Email clients use POP3 (Post Office Protocol) and IMAP4 (Internet Message Access Protocol) to retrieve emails from a server. POP3 downloads emails and typically removes them from the server, while IMAP4 allows synchronized access. SMTP is used for sending emails, and SNMP is for network monitoring, not email retrieval. Exact extract: "Email clients use POP3 or IMAP to retrieve email messages from a mail server... IMAP allows users to access and manage email directly on the server, while POP3 typically downloads messages to the client."

NEW QUESTION # 55

.....

We all know that most candidates will worry about the quality of our product, In order to guarantee quality of our EMEA-Advanced-Support study materials, all workers of our company are working together, just for a common goal, to produce a high-quality product; it is our EMEA-Advanced-Support exam questions. If you purchase our EMEA-Advanced-Support Guide Torrent, we can guarantee that we will provide you with quality products, reasonable price and professional after sales service. I think our EMEA-Advanced-Support test torrent will be a better choice for you than other study materials.
