Pass Your Nutanix NCP-MCI-6.5: Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI) v6.5 exam Exam with Authorized NCP-MCI-6.5 Reliable Exam Labs Effectively

Here, we provide you with NCP-MCI-6.5 accurate questions & answers which will be occurred in the actual test. About explanations, the difficult issues will be along with detail explanations, so that you can easy to get the content of our Nutanix NCP-MCI-6.5 pdf vce and have a basic knowledge of the key points. Besides, you can choose the NCP-MCI-6.5 Vce Format files for simulation test. It can help you enhance your memory and consolidate the knowledge, thus the successful pass is no longer a difficult thing.

Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI) v6.5 exam is a certification that validates the skills and knowledge of IT professionals in designing, installing, configuring, and managing Nutanix solutions in a multicloud environment.

Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI) v6.5 exam certification is designed to provide IT professionals with the necessary skills and knowledge to deploy and manage Nutanix solutions across different clouds, including private, public, and hybrid clouds.

Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI) v6.5 exam Sample Questions (Q88-Q93):

NEW QUESTION # 88
Which component is supported by Prism Central storage policies?

- A. Virtual Machines
- B. Volume Groups
- C. Storage Containers
- D. VM Templates

Answer: B

NEW QUESTION # 89
How should an administrator enable secure access to Volumes using a password?

- A. SAML
- B. CHAP
- C. iSER
- D. LDAP

Answer: B

Explanation:

https://portal.nutanix.com/page/documents/details/?targetId=Web-Console-Guide-Prism-v50:wc-block-services-enabling-t.html
Provision storage on the Nutanix cluster by creating a volume group. Create a client whitelist to enable access to the volume group by using the IP addresses or client initiator IQNs in a whitelist (as part of the volume group configuration). Create a secret for the volume group if you are using CHAP authentication.

NEW QUESTION # 90
What does Nutanix recommend when setting up the node networkring?

- A. Combine NIC models from different vendors in the same bond.
- B. Include at least two physically interfaces in every bond.
- C. Include NIC models from different vendors in the same bond
- D. Combine NIC models from different vendors in the same bond.

Answer: B

Explanation:
A bond is a logical interface that combines two or more physical interfaces on an AHV host. A bond provides high availability and load balancing for the network traffic of the host and its VMs. A bond can have different modes that determine how the traffic is distributed and how the bond handles failures of the physical interfaces. The most common bond modes are active-backup, active-active, and LACP1.
Nutanix recommends including at least two physical interfaces in every bond to ensure high availability and redundancy. If one of the physical interfaces fails or is disconnected, the other interface can take over the traffic without affecting the connectivity of the host or its VMs. Having at least two physical interfaces in a bond also allows for maintenance operations such as firmware upgrades or cable replacements without downtime2.
Nutanix does not recommend including NIC models from different vendors in the same bond, as this may cause compatibility issues or performance degradation. Nutanix also does not recommend using only one physical interface in a bond, as this provides no redundancy or load balancing benefits3.

NEW QUESTION # 91

Refer to the exhibit.

The Linux Admin role has been created to manage only Linux VMs in the environment. However, the Admin1 user does not have access to all Linux VMs.
What step should be taken to grant the proper access?

- A. Add the hosts to the entities KM for the role.
- B. Add the proper category to each Linux VM.
- C. Add the role to the Linux images.
- D. Grant the admin1 user the viewer role (or the cluster.

Answer: A

NEW QUESTION # 92
How many Prism Central instances are required to deploy Leap:'

- A. One per availability zone
- B. One per physical site
- C. One per AHV cluster
- D. One per customer environment

Answer: A

NEW QUESTION # 93
