After adding a security group, you need to add corresponding rules in the security group before the virtual machine with the network card under the security group can communicate with the outside world

- A. False
- B. True

Answer: B

NEW QUESTION # 28

When an administrator uses a linked clone template to quickly provision virtual machines (VMs) on FusionAccess, which of the following are the steps of the quick provision process?

- A. Add the VM to a domain.
- B. Rename the VM.
- C. Create a VM.
- D. Associate the VM with a user group.

Answer: A,B,C,D

Explanation:

Comprehensive and Detailed Explanation (HCIA-Cloud Computing aligned):

Quick provisioning using a linked clone template is designed to rapidly deploy desktops while ensuring standardization and automation.

According to HCIA-Cloud Computing FusionAccess service provisioning procedures, the quick provision workflow includes:

- * Creating the VM based on the linked clone template and snapshot.
- * Renaming the VM to meet enterprise naming rules.
- * Adding the VM to the domain, enabling centralized authentication and policy control.
- * Associating the VM with a user or user group, which determines desktop assignment and access permissions.

All listed operations are integral steps in the linked clone quick provisioning process. Therefore, all options are correct.
