WGU Information-Technology-Management Exam | Valid Information-Technology-Management Exam Topics - Test Engine Simulation of Information-Technology-Management Practice Online

The GuideTorrent is one of the top-rated and reliable platforms that has been helping the WGU Information-Technology-Management exam candidates for many years. Over this long time period, countless Information-Technology-Management exam candidates have passed their WGU exam with good scores. In their success one thing is common and that is the usage of GuideTorrent Information-Technology-Management Exam Practice test questions.

WGU Information Technology Management QGC1 Sample Questions (Q24-Q29):

NEW QUESTION # 24

When should a product management team utilize a prototype?

- A. When testing various user interface designs for a new application
- B. While creating training on a new application for IT Technicians
- **C. When a preliminary model is needed to seek user feedback**
- D. While creating a way to show how the various features in a new application will work together.

Answer: C

Explanation:

* Purpose of Prototypes in Product Management:

* Prototypes provide a working model of the product to collect user feedback.

* This helps the product management team refine the application and address usability issues.

* Why Other Options Are Incorrect:

* Option A: Showing feature interaction is a secondary purpose but not the primary reason for using a prototype.

* Option C: Testing user interfaces may involve prototypes, but the main purpose is feedback collection.

* Option D: Prototypes are not typically used for creating training materials.

References:

* "Role of Prototyping in Product Development" - Product Management Institute

* Agile Prototyping Guidelines - Scrum Alliance

NEW QUESTION # 25

An attacker uses a guest account to exploit a weakness that enables the attacker to change access rights and alter user account information. Which type of attack is described?

- A. Spoofing
- B. Packet tampering
- C. Hoaxing
- **D. Elevation of privilege**

Answer: D

Explanation:

* Definition of Elevation of Privilege Attack:

* This attack occurs when an attacker exploits vulnerabilities in systems to escalate their permissions beyond what they are authorized for, gaining access to sensitive data or control over the system.

* Example in the Scenario:

* The attacker uses a guest account, a low-privilege account, to exploit a system weakness and escalate their privileges, altering user account information.

* Incorrect Options Analysis:

* A. Packet tampering: Involves altering data packets, not access rights.

* B. Spoofing: Involves impersonation, not privilege escalation.

* D. Hoaxing: Refers to deceptive scams, unrelated to access rights.

References and Documents of Information Technology Management:

* "Cybersecurity Vulnerabilities and Exploits" (CIS Controls).

* ITIL Risk Management Framework (Axelos).

NEW QUESTION # 26

What happens during the design phase of the systems development life cycle (SDLC)?

- A. Requirements from business stakeholders and subject-matter experts are identified.
- B. A high-level strategy and goals for an intended project are established.
- C. End-user business requirements are identified, and project goals are refined into defined functions and operations.
- **D. Full descriptions of the desired features and operations of the system are established.**

Answer: D

Explanation:

Design Phase in SDLC:

During the design phase, detailed descriptions of system features and operations are developed. This includes creating architectural diagrams, prototypes, and technical specifications.

Key Activities in the Design Phase:

Translating business requirements into technical blueprints.

Defining user interfaces, workflows, data structures, and system behavior.

Incorrect Options Analysis:

B . High-level strategy and goals: Refers to the planning phase.

C . Requirements identification: Part of the analysis phase.

D . Refining project goals: Occurs during analysis, not design.

and Documents of Information Technology Management:

"System Design Practices in SDLC" (TechRepublic).

ITIL Technical Design Framework (Axelos).

NEW QUESTION # 27

What is the definition of the accountability vs. ownership paradox?

- A. An evaluation of where a business is headed, what it wants to achieve, and how it will support its objectives
- B. A situation in which the CEO is concerned they might be overlooking a digital disrupter that competitors have surely discovered
- C. A situation in which a company's CIO is responsible for the outcomes of technology implementations but does not have the power to change ' business processes
- D. The ability to use a uniquely enterprise view to create business process change

Answer: C

NEW QUESTION # 28

Which benefit does a prototype provide to a client?

- A. Blueprint of the entire project
- B. Demonstration of interaction with the interface
- C. Static example of the finished product
- D. Detailed instructions for development

Answer: B

NEW QUESTION # 29

.....

In order to help our candidates know better on our Information-Technology-Management exam questions to pass the exam, we provide you the responsible 24/7 service. Our candidates might meet different problems on Information-Technology-Management learning guide during purchasing and using our Information-Technology-Management prep guide, you can contact with us through the email, and we will give you respond and solution as quick as possible. With the commitment of helping candidates to Pass Information-Technology-Management Exam, we have won wide approvals by our clients. We always take our candidates' benefits as the priority, so you can trust us without any hesitation.
