Mule-Dev-202 Exam Topics | New Mule-Dev-202 Exam Book

Our Mule-Dev-202 study guide boosts many merits and functions. You can download and try out our Mule-Dev-202 test question freely before the purchase. You can use our product immediately after you buy our product. We provide 3 versions for you to choose and you only need 20-30 hours to learn our Mule-Dev-202 training materials and prepare the exam. The passing rate and the hit rate are both high. We provide 24-hours online customer service and free update within one year. And if you have a try on our Mule-Dev-202 Exam Questions, you will find that there are many advantages of our Mule-Dev-202 training materials.

Salesforce Certified MuleSoft Hyperautomation Developer Sample Questions (Q14-Q19):

NEW QUESTION # 14

For a MuleSoft Composer flow, errors can be noted in its Flow Details page.
What other way can MuleSoft Composer send notifications when errors occur?

- **A. It sends a notification to the configured email address.**
- B. It posts to a configured Chatter profile.
- C. It sends a message to a configured Slack channel.
- D. It generates a notification in the flow.

Answer: A

Explanation:

MuleSoft Composer provides a way to handle errors and notify users when something goes wrong in a flow.

Aside from viewing errors on the Flow Details page, MuleSoft Composer can also send notifications to alert users about the errors.

Flow Error Handling: When an error occurs in a MuleSoft Composer flow, the error is logged and visible on the Flow Details page.

Email Notifications: MuleSoft Composer can be configured to send notifications to a specified email address.

This allows users to be promptly informed of any issues without having to constantly monitor the Flow Details page.

Configuration: This can be set up in the MuleSoft Composer settings, where an email address can be configured to receive these notifications.

MuleSoft Composer Error Notifications

NEW QUESTION # 15

A MuleSoft developer at AnyAirlines is tasked with creating a new API for an integration.
According to best practices, what is the first step they need to perform?

- A. Create a new project in Anypoint Studio.
- **B. Create a RAML definition in Design Center.**
- C. Install a standalone Mule runtime on their local machine.
- D. Create a case in Salesforce.

Answer: B

Explanation:

RAML Definition Creation: The first step in creating a new API as per MuleSoft best practices is to create a RAML (RESTful API Modeling Language) definition in the Design Center. This step is critical as it outlines the API's structure, endpoints, methods, and data types, providing a clear blueprint for subsequent development.

Reference: MuleSoft API Design Best Practices

Project Creation in Anypoint Studio: Once the RAML definition is created, the next step would be to generate the API project in Anypoint Studio. This IDE allows developers to implement the API logic as defined in the RAML.

Reference: Getting Started with Anypoint Studio

Mule Runtime Installation: Installing Mule runtime is necessary for running and testing Mule applications locally. However, this step is secondary to defining the API's structure.

Reference: Mule Runtime Installation

Case Creation in Salesforce: Creating a case in Salesforce is not relevant to the API development process but may be necessary for support or project management purposes.

Reference: Salesforce Case Management

NEW QUESTION # 16

Northern Trail Outfitters publishes REST APIs to Anypoint Exchange. They write the REST APIs using RAML and share these APIs with internal and external users.

In which language or languages can a user download these APIs?

- **A. RAML and OAS only**
- B. RAML, OAS, and Apiary
- C. RAML and Apiary only

- D. RAML only

Answer: A

Explanation:

Users can download REST APIs published to Anypoint Exchange in the following languages:

RAML (RESTful API Modeling Language):

RAML is a modeling language for defining APIs, used by MuleSoft for creating REST APIs.

OAS (OpenAPI Specification):

OAS, also known as Swagger, is another widely-used standard for defining APIs.

MuleSoft supports both RAML and OAS formats, allowing users to choose between these two standards when downloading API definitions.

MuleSoft RAML and OAS Documentation

NEW QUESTION # 17

Northern Trail Outfitters developed an integration between its two Salesforce orgs using MuleSoft Composer.

Which two actions should be taken before testing the Composer flow? (Choose two.)

- A. Ensure MuleSoft Composer is installed on both the source and target orgs.
- **B. Ensure the flow trigger is connected to a sandbox instance of Salesforce.**
- **C. Ensure action steps are connected to a sandbox instance of Salesforce.**
- D. Ensure the credentials to the target production org are still valid.

Answer: B,C

NEW QUESTION # 18

An AnyAirlines employee determines that an RPA process is a strong candidate for automation. When approving the process, the employee needs to specify a group of potential users to manage the RPA process throughout its lifecycle.

According to best practices, which group should the employee choose?

- A. Center for Enablement
- B. Multiple project managers
- **C. Center of Excellence**
- D. Scrum team

Answer: C

Explanation:

When approving an RPA process and specifying a group of potential users to manage it throughout its lifecycle, the best practice is to choose the Center of Excellence (CoE):

Center of Excellence (CoE):

The CoE is a team of experts who are responsible for overseeing the implementation, governance, and management of RPA processes within the organization.

They ensure that best practices are followed, provide guidance and support to project teams, and manage the overall RPA strategy and roadmap.

Lifecycle Management:

The CoE is well-equipped to manage the RPA process from initial development through deployment and ongoing maintenance. They have the expertise to handle any issues that arise and ensure the process remains efficient and effective.

Best Practices:

By involving the CoE, the organization ensures that the RPA process adheres to established best practices, maintains high quality, and delivers the expected benefits.
