Downloading a free demo will remove your doubts about purchasing the APMG-International AgilePM-Foundation Questions.

APMG-International Agile Project Management (AgilePM) Foundation Exam Sample Questions (Q21-Q26):

NEW QUESTION # 21
Which competence is NOT required within the Solution Development team?

- A. All members to be multi-skilled experts
- B. Technical expertise
- C. Business knowledge
- D. Willingness to work with other

Answer: A

Explanation:
Within the Solution Development team, it is not required for all members to be multi-skilled experts1. While a diverse set of skills is beneficial, DSDM emphasizes collaboration and the effective use of individual strengths rather than expecting every team member to be an expert in all areas1.

NEW QUESTION # 22
Which of the following statements, about building and maintaining engagement throughout change, are true?
* Engaging people in change is simple and routine.
* A simple formula can be applied for all change situations.

- A. Both 1 and 2 are true.
- B. Neither 1 nor 2 is true.
- C. Only 2 is true.
- D. Only 1 is true.

Answer: B

Explanation:
* Statement 1: Incorrect. Engaging people in change is complex and requires tailored strategies. It's not a simple or routine task.
* Statement 2: Incorrect. Change situations vary greatly, and no single formula works universally. Agile emphasizes context-specific approaches.
Key AgilePM Concepts Referenced:
* Engagement Strategies: AgilePM Handbook, Chapter 4, Section 4.2.

NEW QUESTION # 23
When building a change delivery scorecard, which of the different views on value are achieved through a measurable increase in sales?

- A. Financial.
- B. Internal.
- C. Learning & Growth.
- D. Customer.

Answer: A

Explanation:
* Financial: A measurable increase in sales reflects improved financial performance, making it a financial metric. Financial views in a change delivery scorecard often include profitability, revenue growth, and ROI-all of which are influenced by sales increases.
* Customer, Internal, Learning & Growth: These are equally important views but do not directly relate to sales performance. For instance:
* Customer View: Focuses on customer satisfaction and loyalty.
* Internal View: Addresses process efficiency.
* Learning & Growth View: Pertains to employee development and organizational innovation.
Key AgilePM Concepts Referenced:
* Scorecard and Value Metrics: AgilePM Handbook, Section 2.5.3.

NEW QUESTION # 24

The Product Owner has identified the need for staff training, to ensure the value from the evolving product is fully realized.
Which role should the Product Owner discuss this with?

- **A. Business Visionary**
- B. Scrum Master
- C. Project Manager
- D. Business Sponsor

Answer: A

Explanation:
Realizing business value often depends on business change enablement-including user training, readiness, and adoption. In AgilePM, the Business Visionary owns the business vision and ensures the evolving solution will deliver the expected benefits in operational use. They coordinate with Business Ambassadors and other stakeholders to prepare the organization (e.g., training, process updates) so that increments translate into realized value. While a Project Manager may help plan logistics and the Scrum Master facilitates the team, accountability for ensuring the business side is prepared to exploit the product sits with the Business Visionary. The Business Sponsor owns investment and justification; they may support funding for training, but the Visionary leads aligning solution capabilities with people and practice changes needed for benefit realization.

NEW QUESTION # 25

In the context of the project organization, which of the following are classed as External Stakeholders by Agile?
Regulatory Authorities
Developers
Customers
Employees

- **A. 1, 3, 4**
- B. 1, 2, 4
- C. 2, 3, 4
- D. 1, 2, 3

Answer: A

Explanation:
AgilePM distinguishes clearly between internal delivery roles (the project team and its immediate governance) and the wider set of external stakeholders who affect, constrain, or benefit from the solution. Developers are part of the internal Solution Development Team-hence not external stakeholders. By contrast, Regulatory Authorities are external parties that impose compliance obligations and quality constraints; they influence acceptance and release but are outside the project team structure. Customers (and users) are also external stakeholders: they receive value, validate usability, and provide feedback, yet they are not members of the delivery team itself. Employees who sit outside the formal project team (e.g., business staff impacted by change, operational personnel, support and sales teams) are treated as external stakeholders because they are affected by the solution and provide input, but they don't hold delivery roles. AgilePM's organization model embeds active business involvement through defined roles inside the team, while also recognizing a broader environment of external interests that must be engaged and managed. Therefore, the items that best fit the "external stakeholder" classification are 1 (Regulatory Authorities), 3 (Customers), and 4 (Employees); 2 (Developers) belong to the internal delivery team.

NEW QUESTION # 26

......

Learning with our AgilePM-Foundation learning guide is quiet a simple thing, but some problems might emerge during your process of AgilePM-Foundation exam materials or buying. Considering that our customers are from different countries, there is a time difference between us, but we still provide the most thoughtful online after-sale service twenty four hours a day, seven days a week, so just feel free to contact with us through email anywhere at any time. Our commitment of helping you to Pass AgilePM-Foundation Exam will never change. Considerate 24/7 service shows our attitudes, we always consider our candidates' benefits and we guarantee that our AgilePM-Foundation test questions are the most excellent path for you to pass the exam.
