Our study materials will help you get the according certification you want to have. Believe me, after using our study materials, you will improve your work efficiency. You will get more opportunities than others, and your dreams may really come true in the near future. FCP\_FGT\_AD-7.6 Test Guide will make you more prominent in the labor market than others, and more opportunities will take the initiative to find you. Next, let's take a look at what is worth choosing from FCP\_FGT\_AD-7.6 learning question.

## Fortinet FCP\_FGT\_AD-7.6 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Content inspection: This section of the exam measures the skills of network security engineers and covers the setup and management of content inspection features on FortiGate. Candidates must demonstrate an understanding of encrypted traffic inspection using digital certificates, identify and apply FortiGate inspection modes, and configure web filtering policies. The ability to implement application control for monitoring and regulating network application usage, configure antivirus profiles to detect and block malware, and set up Intrusion Prevention Systems (IPS) to shield the network from threats and vulnerabilities is also assessed.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Deployment and system configuration: This section of the exam measures the skills of network security engineers and covers essential tasks for setting up a FortiGate device in a production environment. Candidates are expected to perform the initial configuration, establish basic connectivity, and integrate the device within the Fortinet Security Fabric. They must also be able to configure a FortiGate Cluster Protocol (FGCP) high availability setup and troubleshoot resource and connectivity issues to ensure system readiness and network uptime.</li></ul>

Topic 3	<ul style="list-style-type: none"> <li>Firewall policies and authentication: This section of the exam measures the skills of firewall administrators and covers the implementation and management of security policies. It involves configuring basic and advanced firewall rules, applying Source NAT (SNAT) and Destination NAT (DNAT) options, and enforcing various firewall authentication methods. The section also includes deploying and configuring Fortinet Single Sign-On (FSSO) to streamline user access across the network.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Routing: This section of the exam measures the skills of firewall administrators and covers the configuration of routing features on FortiGate devices. It includes defining and applying static routes for directing traffic within and outside the network, as well as setting up Software-Defined WAN (SD-WAN) to distribute and balance traffic loads across multiple WAN connections efficiently.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>VPN: This section of the exam measures the skills of network security engineers and covers the configuration and deployment of Virtual Private Network (VPN) solutions. Candidates are required to implement SSL VPNs to grant secure remote access to internal resources and configure IPsec VPNs in either meshed or partially redundant topologies to ensure encrypted communication between distributed network locations.</li> </ul>

## Exam FCP\_FGT\_AD-7.6 Pass Guide & Study FCP\_FGT\_AD-7.6 Test

You can access our web-based FCP - FortiGate 7.6 Administrator (FCP\_FGT\_AD-7.6) practice exam from anywhere with an internet connection, and fit your studying into your busy schedule. No more traveling to a physical classroom, wasting time and money on gas or public transportation. With the web-based Fortinet FCP\_FGT\_AD-7.6 Practice Test, you can evaluate and enhance your progress. Customizable web-based mock exam creates a real FCP - FortiGate 7.6 Administrator (FCP\_FGT\_AD-7.6) exam environment and works on all operating systems.

## Fortinet FCP - FortiGate 7.6 Administrator Sample Questions (Q117-Q122):

### NEW QUESTION # 117

Refer to the exhibits. An administrator configured the Web Filter Profile to block access to all social networking sites except Facebook. However, when users try to access Facebook.com, they are redirected to a FortiGuard web filtering block page. Based on the exhibits, which configuration change must the administrator make to allow Facebook while blocking all other social networking sites?

- A. Set the Action as Exempt for www.facebook.com in the Static URL Filter.
- B. Change the Feature set of Web Filter Profile as Proxy-based.
- C. Set the Social Networking action as warning in the FortiGuard Category Based Filter.
- D. Change the type as Simple in the Static URL Filter section.

Answer: A

#### NEW QUESTION # 118

Refer to the exhibit. The predefined deep-inspection and custom-deep-inspection profiles exclude some web categories from SSL inspection, as shown in the exhibit.

For which two reasons are these web categories exempted? (Choose two.)

- A. The legal regulation aims to prioritize user privacy and protect sensitive information for these websites.
- B. These websites are in an allowlist of reputable domain names maintained by FortiGuard.
- C. The FortiGate temporary certificate denies the browser's access to websites that use HTTP Strict Transport Security.
- D. The resources utilization is optimized because these websites are in the trusted domain list on FortiGate.

Answer: A,C

Explanation:

FortiGate's temporary SSL certificate may cause access denial to sites using HTTP Strict Transport Security (HSTS), so such sites are exempted from deep SSL inspection. Legal regulations require exemption of certain categories to protect user privacy and sensitive information, so these web categories are excluded from SSL inspection.

#### NEW QUESTION # 119

Refer to the exhibits. An administrator configured the Web Filter Profile to block access to all social networking sites except Facebook. However, when users try to access Facebook.com, they are redirected to a FortiGuard web filtering block page. Based on the exhibits, which configuration change must the administrator make to allow Facebook while blocking all other social networking sites?

**Web filter configuration**

**Edit Web Filter Profile**

Feature set **Flow-based** Proxy-based

☒ FortiGuard Category Based Filter

☒ Allow ☒ Monitor ☒ Block ☒ Warning ☒ Authenticate

Name	Action
Web-based Applications	<input checked="" type="radio"/> Allow
Entertainment	<input checked="" type="radio"/> Allow
Arts and Culture	<input checked="" type="radio"/> Allow
Education	<input checked="" type="radio"/> Allow
Health and Wellness	<input checked="" type="radio"/> Allow
Job Search	<input checked="" type="radio"/> Allow
Medicine	<input checked="" type="radio"/> Allow
News and Media	<input checked="" type="radio"/> Allow
Social Networking	<input checked="" type="radio"/> Block

53% 95

☐ Allow users to override blocked categories

☒ Search Engines

Enforce 'Safe Search' on Google, Yahoo!, Bing, Yandex ☐

☒ Static URL Filter

Block invalid URLs ☐

URL Filter ☒

URL	Type	Action	Status
www.facebook.com	Wildcard	<input checked="" type="radio"/> Monitor	<input checked="" type="radio"/> Enable

Block page

FORTINET.

- A. Set the Action as Exempt for www.facebook.com in the Static URL Filter.
- B. Change the Feature set of Web Filter Profile as Proxy-based.
- C. Set the Social Networking action as warning in the FortiGuard Category Based Filter.
- D. Change the type as Simple in the Static URL Filter section.

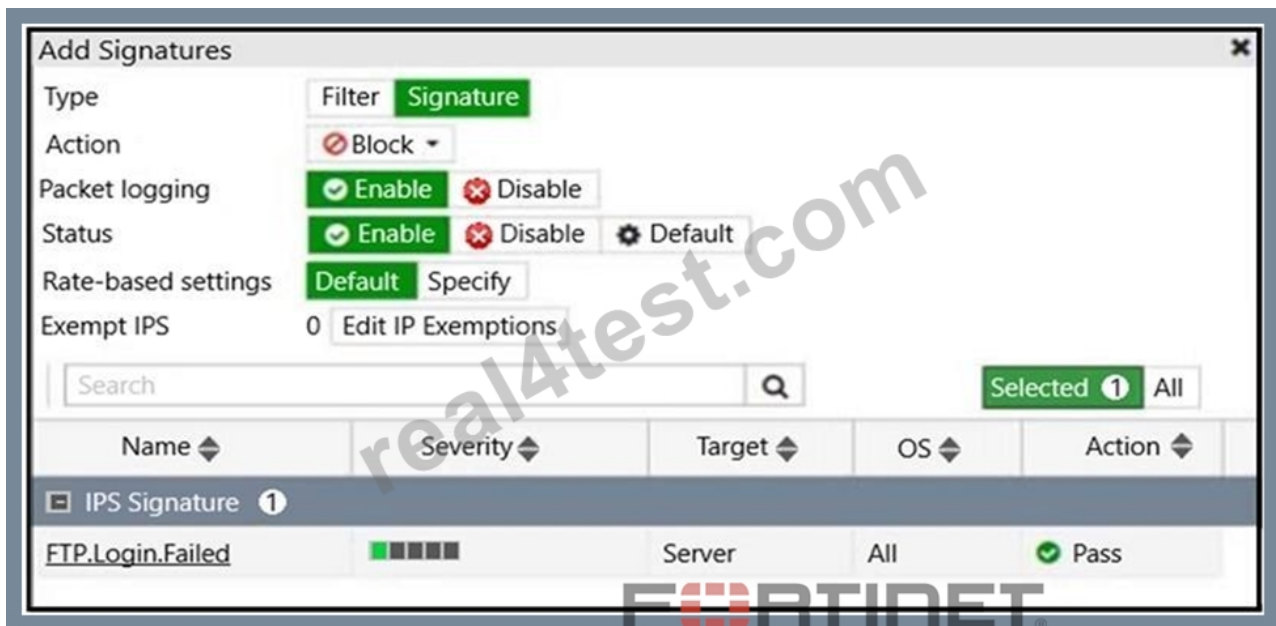

**Answer: A**

Explanation:

The FortiGuard category filter is blocking Social Networking, which includes Facebook. Although a static URL filter entry for www.facebook.com exists, its action is set to Monitor, so it does not override the category block. To allow Facebook while blocking other social networking sites, the action for www.facebook.com in the Static URL Filter must be set to Exempt. This explicitly bypasses category filtering for that URL.

#### NEW QUESTION # 120

Refer to the exhibit. Review the intrusion prevention system (IPS) profile signature settings shown in the exhibit. What can you conclude about the signature when adding the FTP.Login.Failed signature to the IPS Sensor profile?

- A. FortiGate allows this low severity signature packet and creates a log.
- B. FortiGate stores a local copy of the packet that matches the signature.
- C. The signature setting includes a group of other signatures.
- D. The signature setting uses a custom rating threshold

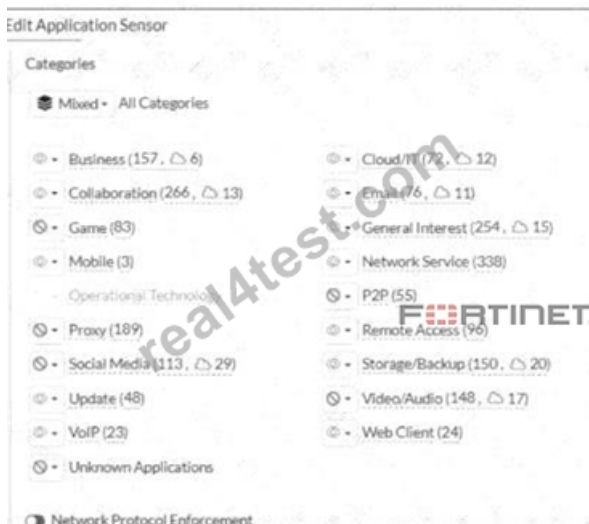

**Answer: A**

Explanation:

The IPS signature FTP.Login.Failed is configured with the action Pass and Packet logging = Enable. This means FortiGate will allow traffic that matches this signature but will also log the event, since the severity is low and blocking is not applied.

## NEW QUESTION # 121

Application sensor

Refer to the exhibits.

You have implemented the application sensor and the corresponding firewall policy as shown in the exhibits.

Which two factors can you observe from these configurations? (Choose two.)

- A. YouTube access is blocked based on Excessive-Bandwidth Application and Filter override settings.
- B. YouTube search is allowed based on the Google Application and Filter override settings.
- C. Facebook access is blocked based on the category filter settings.
- D. Facebook access is allowed but you cannot play Facebook videos based on Video/Audio category filter settings.

**Answer: A,C**

## NEW QUESTION # 122

.....

Many candidates may think that it will take a long time to prepare for the FCP\_FGT\_AD-7.6 exam. Actually, it only takes you about twenty to thirty hours to practice our FCP\_FGT\_AD-7.6 exam simulation. We believe that the professional guidance will help you absorb the knowledge quickly. You will have a wide range of chance after obtaining the FCP\_FGT\_AD-7.6 certificate. You need to have a brave attempt. Our FCP\_FGT\_AD-7.6 training engine will help you realize your dreams.
