The Desktop EPIC EDI101 Practice Exam Software of Pass4SureQuiz arranges a mock exam for the one who wants to evaluate and improve preparation.

## EPIC CEE: Bridges Interfaces Application Essentials Exam (2026 Version) Sample Questions (Q39-Q44):

### NEW QUESTION # 39

What segments are defined as custom in HL7 version 2?

- A. NTE
- B. X-segment
- C. Z-segment

- D. PID

**Answer: C**

Explanation:

HL7 provides a standard set of segments (like PID for Patient Identity or MSH for Message Header).

However, to allow for site-specific data that doesn't fit into standard segments, HL7 reserves the letter "Z" for custom segments. Any segment starting with "Z" (e.g., ZPV, ZCD) is considered a local, non-standard extension defined by the specific healthcare organization or vendor.

#### **NEW QUESTION # 40**

All Triggers in Interface System Defaults can only be configured to trigger messages to a single interface.

- A. True
- **B. False**

**Answer: B**

Explanation:

Epic's trigger logic is highly flexible. A single event in Chronicles (such as a patient admission) can be configured within the System Defaults or specialized trigger tables to send data to multiple interfaces simultaneously. This is common when an admission needs to notify a Lab system, a Pharmacy system, and a Dietary system all at once.

#### **NEW QUESTION # 41**

Table translations can be either case sensitive or not case sensitive.

- **A. True**
- B. False

**Answer: A**

Explanation:

Bridges provides a configuration toggle for Case Sensitivity within translation tables. This is crucial because some external systems might send values like "M" and "m" interchangeably, while others might use case to distinguish between two different codes. Setting this correctly ensures that the interface accurately matches the incoming string to the intended internal value.

#### **NEW QUESTION # 42**

A new error started logging to your interface and your team decides that this error should be worked on an existing workqueue. You properly update the workqueue rule to include the new error. Which of the following will your workqueue contain moving forward if you take no other actions? (SELECT ALL THAT APPLY)

- **A. All errors previously added to the workqueue**
- B. No occurrences of the new error
- **C. Future occurrences of the new error, and none of the previous occurrences**
- D. All occurrences of the new error, past and future

**Answer: A,C**

#### **NEW QUESTION # 43**

The VISIT\_ITEM profile variable is set to '8' in the Interface System Defaults. Your "Incoming Transcription" interface doesn't have a value populated for the VISIT\_ITEM profile variable. What value will the "Incoming Transcription" interface use for the value of the VISIT\_ITEM profile variable?

- A. 0
- B. <Null>
- C. 1
- **D. 2**

**Answer: D**

Explanation:

Bridges uses a hierarchical approach for profile variables. The system first looks at the specific Interface record; if that is null, it looks at the Interface Specification; if that is also null, it falls back to the Interface System Defaults. Since the specific transcription interface has no value, it inherits the '8' defined at the system level.

## NEW QUESTION # 44

.....

You can download a free demo of EPIC exam study material at Pass4SureQuiz. The free demo of EDI101 exam product will eliminate doubts about our EDI101 PDF and practice exams. You should avail this opportunity of CEE: Bridges Interfaces Application Essentials Exam (2026 Version) EDI101 exam dumps free demo. It will help you pay money without any doubt in mind.
