Free PDF 2026 Reliable CompTIA Valid SK0-005 Test Papers

The BraindumpsPrep CompTIA SK0-005 PDF questions file, desktop practice test software, and web-based practice test software, all these three CompTIA SK0-005 practice test questions formats are ready for instant download. Just download any CompTIA SK0-005 Exam Questions format and start this journey with confidence. Best of luck with exams and your career!!!

CompTIA Server+ Certification Exam Sample Questions (Q342-Q347):

NEW QUESTION # 342
A server administrator created a new script and included the path to the script binary as the first line of the script. Which of the following scripting languages did the administrator most likely use?

- A. Bash
- B. PowerShell
- C. Java
- D. Batch

Answer: A

Explanation:
InBash (a Unix/Linux shell scripting language), it is common to include theshebang (#!) followed by the path to the interpreter (e.g., #!/bin/bash) on the first line of the script. This tells the operating system which interpreter to use to execute the script.

* Bash (Answer C):Bash scripts often start with a shebang line that specifies the path to the binary (#!/bin
/bash).
* Batch (Option A):Batch scripts (used in Windows) do not require a path to the interpreter on the first line.
* Java (Option B):Java is a compiled language, not a scripting language, so this does not apply.
* PowerShell (Option D):PowerShell scripts (.ps1 files) do not typically require specifying the interpreter path on the first line.
CompTIA Server+ Reference:This topic is related toSK0-005 Objective 1.1: Understand scripting basics and the use of
interpreters.

NEW QUESTION # 343
A server administrator is setting up a disk with enforcement policies on how much data each home share can hold. The amount of
data that is redundant on the server must also be minimized. Which of the following should the administrator perform on the server?
(Select two).

- A. Compression
- B. Provisioning
- C. Cloning
- D. Deduplication
- E. Partitioning
- F. Disk quotas

Answer: D,F

Explanation:
Deduplication is a process that eliminates redundant data blocks and reduces the amount of storage space needed. Disk quotas are
policies that limit the amount of disk space that each user or group can use on a volume.

* Data Deduplication interoperability2

NEW QUESTION # 344
A server technician downloaded new firmware from the manufacturer's website. The technician then attempted to install the firmware
on the server, but the installation failed, stating the file is potentially corrupt. Which of the following should the technician have
checked prior to installing the firmware?

- A. DLF configuration
- B. MBR failure
- C. MD5 checksum
- D. ECC support

Answer: C

Explanation:
Explanation
A MD5 checksum is a value that is calculated from a file using a cryptographic hash function. A MD5 checksum is used to verify the
integrity of a file by comparing it with the original value provided by the manufacturer or the source. If the MD5 checksums match, it
means that the file is authentic and has not been corrupted or tampered with. If the MD5 checksums do not match, it means that the
file is potentially corrupt or malicious and should not be installed12. A DLF configuration (A) is a setting that determines how a
dynamic link library (DLL) is loaded into memory and executed by an application. A DLF configuration does not check the integrity
of a file. A MBR failure (B) is a problem that occurs when the master boot record (MBR) of a disk is damaged or corrupted,
preventing the system from booting. A MBR failure does not check the integrity of a file. ECC support is a feature that enables
error-correcting code (ECC) memory to detect and correct data errors in RAM. ECC support does not check the integrity of a file.

NEW QUESTION # 345
A server administrator wants to check the open ports on a server. Which of the following commands should the administrator use to

complete the task?

- A. nbtstat
- B. telnet
- C. netstat -a
- D. nslookup

Answer: C

Explanation:
netstat is a command-line tool that displays network connections, routing tables, interface statistics, and more. The -a option shows all listening and non-listening sockets on the server. This can help check the open ports on a server and identify any unwanted or malicious connections. Reference: https://docs.microsoft.com/en-us/windows-server/administration/windows-commands/netstat

NEW QUESTION # 346
A systems administrator is performing maintenance on 12 Windows servers that are in different racks at a large datacenter. Which of the following would allow the administrator to perform maintenance on all 12 servers without having to physically be at each server? (Choose two.)

- A. A console connection
- B. Remote drive access
- C. A virtual administration console
- D. Remote desktop
- E. IP KVM
- F. A crash cart

Answer: D,E

Explanation:
The methods that would allow the administrator to perform maintenance on all 12 servers without having to physically be at each server are remote desktop and IP KVM. Remote desktop is a feature that allows a user to access and control another computer over a network using a graphical user interface (GUI). Remote desktop can enable remote administration, troubleshooting, and maintenance of servers without requiring physical presence at the server location. IP KVM (Internet Protocol Keyboard Video Mouse) is a device that allows a user to access and control multiple servers over a network using a single keyboard, monitor, and mouse. IP KVM can provide remote access to servers regardless of their operating system or power state, and can also support virtual media and serial console functions.

NEW QUESTION # 347
......

We will provide you with professional advice before you buy our SK0-005 guide materials. If you have problems in the process of using our SK0-005 study questions, as long as you contact us anytime and anywhere, we will provide you with remote assistance until that all the problems on our SK0-005 Exam Braindumps are solved. When you send us a message, we will reply immediately and we will never waste your precious time on studying our SK0-005 practice quiz.
