It is well known that under the guidance of our HPE7-J02 PDF study exam, you are more likely to get the certification easily. But I think few of you know the advantages after getting certificates. Basically speaking, the benefits of certification with the help of our HPE7-J02 practice test can be classified into three aspects. Firstly, with the certification, you can have access to big companies where you can more job opportunities which you can't get in the small companies. Secondly, with our HPE7-J02 Preparation materials, you can get the HPE7-J02 certificates and high salaries.

## HP HPE7-J02 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Competitive Positioning of HPE Storage: This part of the exam focuses on the ability of Trusted Advisors to identify competitive opportunities for HPE Storage solutions. It requires articulating HPE's strengths in comparison to multi-vendor environments, customer needs, and market trends, helping customers make informed technology choices.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Optimizing the Customer's Environment: This domain evaluates the skills of Optimization Specialists in identifying opportunities for improvement. Candidates will design and validate optimization plans that enhance customer environments, ensuring measurable performance and efficiency gains.</li> </ul>

Topic 3	<ul style="list-style-type: none"> <li>• <b>Planning and Validating Storage Solutions:</b> This section assesses the role of Storage Consultants in evaluating complex, multi-vendor environments. Candidates will demonstrate their ability to plan, size, and validate storage solutions tailored for enterprise workloads, ensuring proposals meet customer requirements effectively.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Monitoring and Telemetry:</b> This section examines the skills of Cloud Operations Specialists in using HPE or third-party management tools to monitor customer telemetry. Candidates must configure alerts, analyze logs, and evaluate reports to identify SLA trends, outages, and performance issues.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• <b>Remote Support Configuration:</b> This small but important section tests the ability of System Administrators to configure HPE solutions for remote support, ensuring proactive monitoring and timely resolution of technical issues.</li> </ul>

## HPE7-J02 actual exam torrent & HPE7-J02 practice materials & HPE7-J02 valid practice material

Solutions is committed to ace your HP HPE7-J02 exam preparation and enable you to pass the final HPE7-J02 exam with flying colors. To achieve this objective Exams. Solutions is offering updated, real, and error-free HPE7-J02 Exam Questions in three easy-to-use and compatible formats. These HPE7-J02 exam questions formats will help you in preparation.

### HP Advanced HPE Storage Integrator Solutions Written Exam Sample Questions (Q15-Q20):

#### NEW QUESTION # 15

You are sizing an HPE Alletra 5030. Unless otherwise indicated by the HPE sizer or the customer's requirements, HPE best practices state that you should default to which minimum FDR calculation?

- A. 23% of the smallest drive size
- **B. 23% of the largest drive size**
- C. Below 12% for low-read latency
- D. Above 12% for low-read latency

**Answer: B**

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

In Alletra 5000/6000 sizing, the Failure Domain Reserve (FDR) is used to account for rebuild overhead in case of drive failure. HPE best practices define that, unless otherwise directed by the sizing tool or customer requirements, the minimum FDR value should be set to 23% of the largest drive size. This ensures enough reserve capacity for fault tolerance and sustained performance during rebuilds.

Distractors:

B/C: Low-read latency is influenced by cache and workload profile, not by arbitrary FDR percentages.

D: Using the smallest drive is incorrect - rebuild impact must be sized against the largest drive.

Key Concept: FDR sizing based on 23% of largest drive = HPE best practice.

Reference: HPE Alletra 5000/6000 Sizing and Configuration Guide.

#### NEW QUESTION # 16

Two HPE Alletra 6000 arrays are configured for peer persistence between datacenters A and B, which have a fiber distance of 50km (31mi). The datacenter B hardware will be relocated to a new location that will increase the fiber distance to 150km (93mi). Which condition is valid once the relocation is finished?

- A. The fiber distance exceeds the distance supported for peer persistence setup.

- B. The peer persistence replication links need to be changed to RC transport.
- **C. The peer persistence configuration is supported, when latency remains <10ms.**
- D. The peer persistence setup needs to be changed to active peer persistence.

**Answer: C**

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

HPE Peer Persistence is supported over distances of up to 150-200 km, as long as the round-trip latency is <10ms. Therefore, even after relocation to 150km, Peer Persistence remains supported provided latency requirements are met.

Distractors:

B: RC (Remote Copy) transport is already the underlying technology, but no change is required.

C: Peer Persistence is already an active-active design; no change to "active" mode is needed.

D: Distance does not exceed the supported range; only latency matters.

Key Concept: Latency <10ms is the critical requirement for Peer Persistence.

Reference: HPE Alletra 6000/Primera Peer Persistence Best Practices.

## NEW QUESTION # 17

Refer to the exhibit.

A junior engineer is expanding a StoreOnce deployment for a law firm with a hybrid environment. The customer already has Veeam backing up to StoreOnce 3660 Gen 4 at both primary and secondary sites. They want to add Cloud Bank Storage (CBS) to archive into AWS Glacier tier for compliance. The junior engineer has added Cloud Bank licenses for the 80TB onsite capacity at the primary office.

Question: What does the junior engineer need to add to enable this scenario?

- **A. Detach License on StoreOnce-A**
- B. Cloud Bank Storage for AWS Glacier
- C. Catalyst License for StoreOnce-B
- D. Federated Management

**Answer: A**

## NEW QUESTION # 18

Your customer has just gone through a merger and is consolidating datacenters. They are currently using a mix of manufacturers. They are evaluating whether to consolidate on HPE as their new standard. You are helping them size their new virtualized environment.

What additional information do you need to decide on an assessment tool?

- A. If they are only purchasing in a CapEx model
- **B. If they are virtualized on VMware or Hyper-V**
- C. If they are using AWS or Azure public cloud storage
- D. If any equipment has expired support contracts

**Answer: B**

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

The choice of assessment tool (e.g., HPE CloudPhysics for VMware vs. CloudPhysics.vhdx collector for Hyper-V) depends primarily on the virtualization platform in use. VMware and Hyper-V require different collectors, and this is the deciding factor for tool selection.

Distractors:

A: Public cloud use matters for hybrid sizing but not for tool selection.

C: Expired contracts are unrelated to tool choice.

D: Procurement model (CapEx vs. GreenLake) is separate from sizing assessment.

Key Concept: Assessment tool choice = based on hypervisor platform (VMware vs Hyper-V).

Reference: HPE CloudPhysics Assessment Guide.

### NEW QUESTION # 19

Which statement is correct when enabling port trunking (FC ISL / Ethernet link aggregation)?

- A. Ports need to belong to the same port group of the switch.
- B. For optimal performance, no more than 100 meters of cable length difference is acceptable.
- C. Port Trunking is supported by default on every B-Series FC switch.
- D. The port speed of the trunk ports can be different based on the used switches in the ISL group.

**Answer: A**

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

In B-Series (Brocade) SAN switches, trunking requires that all ports in a trunk group belong to the same port group (same ASIC) and run at the same speed. This ensures frame ordering and load balancing across ISLs.

Distractors:

A: Incorrect - cable length differences must be minimal, but not stated in meters like this.

C: Incorrect - speeds must match across all trunked ports.

D: Trunking requires a license on some Brocade models; not always enabled by default.

Key Concept: Port trunking requires same port group and same speed.

Reference: HPE B-Series SAN Switch Trunking Best Practices.

### NEW QUESTION # 20

.....

We offer a money-back guarantee if you fail despite proper preparation and using our product (conditions are mentioned on our guarantee page). This feature gives you the peace of mind to confidently prepare for your HP HPE7-J02 Certification Exam. Our HP HPE7-J02 exam dumps are available for instant download right after purchase, allowing you to start your HP HPE7-J02 preparation immediately.
