Practice ECCouncil 312-85 Engine - Valid 312-85 Exam Camp Pdf

We all know that in the fiercely competitive IT industry, having some IT authentication certificates is very necessary. IT authentication certificate is a best proof for your IT professional knowledge and experience. ECCouncil 312-85 is a very important

certification exam in the IT industry and passing ECCouncil certification 312-85 exam is very difficult. But in order to let the job position to improve spending some money to choose a good training institution to help you pass the exam is worthful. Real4test's latest training material about ECCouncil Certification 312-85 Exam have 95% similarity with the real test. If you use Real4test'straining program, you can 100% pass the exam. If you fail the exam, we will give a full refund to you.

ECCouncil Certified Threat Intelligence Analyst Sample Questions (Q38-Q43):

NEW QUESTION # 38
Bob, a threat analyst, works in an organization named TechTop. He was asked to collect intelligence to fulfil the needs and requirements of the Red Tam present within the organization.
Which of the following are the needs of a RedTeam?

- A. Intelligence related to increased attacks targeting a particular software or operating system vulnerability
- B. Intelligence that reveals risks related to various strategic business decisions
- C. Intelligence on latest vulnerabilities, threat actors, and their tactics, techniques, and procedures (TTPs)
- D. Intelligence extracted latest attacks analysis on similar organizations, which includes details about latest threats and TTPs

Answer: C

NEW QUESTION # 39
Walter and Sons Company has faced major cyber attacks and lost confidential data. The company has decided to concentrate more on the security rather than other resources. Therefore, they hired Alice, a threat analyst, to perform data analysis. Alice was asked to perform qualitative data analysis to extract useful information from collected bulk data.
Which of the following techniques will help Alice to perform qualitative data analysis?

- A. Numerical calculations, statistical modeling, measurement, research, and so on.
- B. Regression analysis, variance analysis, and so on
- C. Finding links between data and discover threat-related information
- D. Brainstorming, interviewing, SWOT analysis, Delphi technique, and so on

Answer: D

Explanation:
For Alice to perform qualitative data analysis, techniques such as brainstorming, interviewing, SWOT (Strengths, Weaknesses, Opportunities, Threats) analysis, and the Delphi technique are suitable. Unlike quantitative analysis, which involves numerical calculations and statistical modeling, qualitative analysis focuses on understanding patterns, themes, and narratives within the data. These techniques enable the analyst to explore the data's deeper meanings and insights, which are essential for strategic decision-making and developing a nuanced understanding of cybersecurity threats and vulnerabilities.References:
* "Qualitative Research Methods in Cybersecurity," SANS Institute Reading Room

NEW QUESTION # 40
Michael, a threat analyst at an organization named TechTop, was asked to conduct a cyber-threat intelligence analysis. After obtaining information regarding threats, he started analyzing the information and understanding the nature of the threats.
What stage of cyber-threat intelligence is Michael currently in?

- A. Known knowns
- B. Unknown knowns
- C. Unknown unknowns
- D. Known unknowns

Answer: A

Explanation:
The stage described involves analyzing gathered information and understanding known threats. This aligns with the Known Knowns stage.
Known Knowns represent threats that have already been identified, understood, and documented. Analysts in this stage work with existing data to refine and interpret known indicators or threat actor behaviors.

Why the Other Options Are Incorrect:
* Unknown unknowns: Threats that are entirely unknown and undetectable with current knowledge.
* Known unknowns: Threats suspected to exist but not yet clearly identified.
* Unknown knowns: Information that exists but has not been analyzed or recognized as relevant.
Conclusion:
Michael is analyzing existing and understood threat data, placing him in the Known Knowns stage of cyber- threat intelligence.
Final Answer: D. Known knowns
Explanation Reference (Based on CTIA Study Concepts):
In the CTIA framework, known knowns refer to threats that are fully understood and documented, forming the basis for structured analysis.

NEW QUESTION # 41

A network administrator working in an ABC organization collected log files generated by a traffic monitoring system, which may not seem to have useful information, but after performing proper analysis by him, the same information can be used to detect an attack in the network.
Which of the following categories of threat information has he collected?

- A. Advisories
- B. Detection indicators
- C. Low-level data
- D. Strategic reports

Answer: C

NEW QUESTION # 42

H&P, Inc. is a small-scale organization that has decided to outsource the network security monitoring due to lack of resources in the organization. They are looking for the options where they can directly incorporate threat intelligence into their existing network defense solutions.
Which of the following is the most cost-effective methods the organization can employ?

- A. Recruit managed security service providers (MSSP)
- B. Look for an individual within the organization
- C. Recruit data management solution provider
- D. Recruit the right talent

Answer: A

Explanation:
For H&P, Inc., a small-scale organization looking to outsource network security monitoring and incorporate threat intelligence into their network defenses cost-effectively, recruiting a Managed Security Service Provider (MSSP) would be the most suitable option. MSSPs offer a range of services including network security monitoring, threat intelligence, incident response, and compliance management, often at a lower cost than maintaining an in-house security team. This allows organizations to benefit from expert services and advanced security technologies without the need for significant resource investment.
