You want to connect a DS224C shelf with 3.8 TB NetApp Storage Encryption (NSE) SSDs to an AFF A300 HA pair that already has two DS224C shelves with 3.8 TB SSDs without NSE in one stack.

In this scenario, how would you add the shelf?

- A. Connect the shelf to an HA pair with NSE drives.
- B. License NSE and add the shelf to this HA pair as a new stack.
- **C. Create a new stack on the HA pair to add the shelf.**
- D. Add the shelf to the existing stack.

Answer: C

Explanation:

NetApp installation rules prohibit mixing NSE and non-NSE drives within the same stack. While the AFF A300 supports both encrypted and non-encrypted drives, they must be physically separated into different stacks.

Licensing NSE alone does not allow mixing encrypted and unencrypted drives in the same stack. The correct approach is to create a new stack specifically for the NSE drives.
