## Latest HCL-HWA-ADM-102 Test Blueprint, Exam HCL-HWA-ADM-102 Simulations

We are pleased to inform you that we have engaged in this business for over ten years with our HCLSoftware Certified Administrator- HWA 10.2 HCL-HWA-ADM-102 exam questions. Because of our experience, we are well qualified to take care of your worried about the HCL-HWA-ADM-102 Preparation exam and smooth your process with successful passing results.

## HCLSoftware Certified Administrator- HWA 10.2 Sample Questions (Q296-Q301):

### NEW QUESTION # 296

Orchestration CLI configured for multiple environments in HCL Workload Automation 10.2. To list available contexts and switch to "test", commands? (Select two)

- A. ocli context list
- B. ocli context use test
- C. ocli config contexts
- D. ocli switch test
- E. ocli login test

**Answer: A,B**

Explanation:

ocli context list displays configured contexts from config.yaml. ocli context use test activates the test environment for subsequent

commands.

#### NEW QUESTION # 297

A customer wants to brand the Dynamic Workload Console 10.2.3 with their corporate logo and icon so that the console visually aligns with their other internal portals. They ask whether this kind of visual customization is supported and, if so, from which version. What is the documented capability regarding branding the Dynamic Workload Console?

- A. Branding is not supported; only color themes can be changed through CSS overrides
- **B. Starting from version 10.2.3, the Dynamic Workload Console can be customized with a customer's own icon and logo**
- C. Branding requires modifying the HWA server binaries and is not supported as a configuration-only change
- D. Branding is supported only in versions earlier than 10.0 and was removed in later releases

**Answer: B**

Explanation:

Community documentation for HCL Workload Automation states that, starting from version 10.2.3, administrators can customize the Dynamic Workload Console with their own brand elements, including custom icons and logos. This capability allows organizations to align the console's appearance with corporate visual guidelines without altering core server binaries. Earlier versions did not provide the same level of straightforward branding support, and the feature is explicitly described as available from 10.2.3 onward.

#### NEW QUESTION # 298

An HCL Workload Automation administrator needs to migrate the database server hosting the scheduling data to a new host with a different port and database name while keeping the master domain manager and Dynamic Workload Console installations unchanged. The DBA has already created the new database instance and migrated the data using native tools. The administrator must now update the workload automation configuration so that the engine and console connect to the new host without reinstalling any component. Which set of properties must be updated to point both engine and console to the new database instance?

- A. db.serverName, db.user, db.driver.path in the engine properties and the twa\_env command configuration for the Dynamic Workload Console
- B. db.password, db.user, db.sslConnection in the engine properties and the DWC\_DATA\_dir path in the Dynamic Workload Console configuration
- **C. db.databaseName, db.portNumber, db.serverName in the engine properties and com.ibm.tdwb.dao.rdbms.jdbcPath in the Dynamic Workload Console configuration**
- D. db.databaseName, db.driver.path, db.sslConnection in the engine properties and com.ibm.tdwb.dao.rdbms.jdbcPath in the Dynamic Workload Console configuration

**Answer: C**

Explanation:

When the underlying database host, port, or name changes in an HCL Workload Automation deployment, the engine configuration must update db.serverName, db.portNumber, and db.databaseName to reflect the new database server host, listening port, and database name values. These properties control the engine's JDBC connection details and must align with the actual database instance configuration that now stores the scheduling data. The Dynamic Workload Console uses a JDBC URL, configured through properties such as com.ibm.tdwb.dao.rdbms.jdbcPath, which must also be updated to reference the new hostname, port, and database name in the JDBC connection string so that the console accesses the same database as the engine. Adjusting only credentials or driver paths is insufficient if the physical endpoint of the database has changed, and updating DWC installation paths or environment scripts does not alter the JDBC target.

#### NEW QUESTION # 299

Workload security HCL HWA 10.2 audit logs credential access attempts. Admin views job parameters containing DB passwords in DWC. What configuration masks credentials in audit trails?

- A. DWC UI redacts credentials automatically
- **B. localopts AUDIT\_CREDENTIAL\_MASKING=YES; AUDIT\_SENSITIVE\_FIELDS=DB\_PASSWORD**
- C. Audit logging excludes job parameters by default
- D. security.txt: audit=mask\_credentials

**Answer: B**

Explanation:

Audit masking protects sensitive data in logs. localopts AUDIT\_CREDENTIAL\_MASKING=YES masks password fields in audit records. DWC audit view shows DB\_PASSWORD=[MASKED], preserving compliance without exposing production credentials.

### NEW QUESTION # 300

HCL HWA 10.2 customizing DWC certificates for SAML federation fails signature validation: "Signature algorithm SHA1withRSA not allowed". IdP metadata specifies SHA256. Required Liberty SAML configuration override?

- A. IdP metadata auto-negotiates SHA256, no configuration required
- B. server.xml: `<samlSP id="samlSP" idpMetadataRef="idpMetadata" signatureAlgorithm="RSA_SHA256"/>`
- C. samlGlobalSpMetadata.xml: `<signatureMethod algorithm="http://www.w3.org/2001/04/xmldsig-more#rsa-sha256"/>`
- D. jvm.options: `-Dsaml.security.signature.algorithm=SHA256withRSA`

**Answer: B**

Explanation:

Liberty SAML service provider requires explicit signature algorithm matching IdP. server.xml samlSP configuration: `<samlSP signatureAlgorithm="http://www.w3.org/2001/04/xmldsig-more#rsa-sha256" idpMetadataRef="corporateIdP"/>` ensures SHA256 signatures validated. SSO login succeeds, browser developer tools confirm SAML assertion signature verification passes.

### NEW QUESTION # 301

.....

The HCLSoftware HCL-HWA-ADM-102 practice test by Exam4Labs can be accessed online on different web browsers like Chrome, IE, Firefox, Opera, and Safari without any plugins. You also have the flexibility to open the pdf file of the HCLSoftware Certified Administrator- HWA 10.2 HCL-HWA-ADM-102 Practice Test on mobile devices and tablets. The HCLSoftware HCL-HWA-ADM-102 pdf dumps version allows you to print the HCLSoftware HCL-HWA-ADM-102 exam questions easily and access it everywhere.
