Professional-Cloud-DevOps-Engineer Certification Training: Google Cloud Certified - Professional Cloud DevOps Engineer Exam & Professional-Cloud-DevOps-Engineer Study Guide & Professional-Cloud-DevOps-Engineer Exam Bootcamp

Attempting these Professional-Cloud-DevOps-Engineer practice test questions, again and again, enhances your learning and eliminates errors in your readiness for the Google Cloud Certified - Professional Cloud DevOps Engineer Exam certification exam. Customization features of Google Cloud Certified - Professional Cloud DevOps Engineer Exam (Professional-Cloud-DevOps-Engineer) practice test software give you chance to adjust the settings of the Google Cloud Certified - Professional Cloud DevOps Engineer Exam (Professional-Cloud-DevOps-Engineer) practice exams sessions. Windows laptops and PCs support the desktop-based software of the Google Professional-Cloud-DevOps-Engineer practice test. These Google Cloud Certified - Professional Cloud DevOps Engineer Exam (Professional-Cloud-DevOps-Engineer) practice exams create situations that replicate the actual Professional-Cloud-DevOps-Engineer exam.

Google Cloud Certified - Professional Cloud DevOps Engineer Exam Sample Questions (Q179-Q184):

NEW QUESTION # 179

Your company operates in a highly regulated domain that requires you to store all organization logs for seven years. You want to minimize logging infrastructure complexity by using managed services. You need to avoid any future loss of log capture or stored logs due to misconfiguration or human error. What should you do?

- A. Use Cloud Logging to configure an aggregated sink at the organization level to export all logs into Cloud Storage with a seven-year retention policy and Bucket Lock
- B. Use Cloud Logging to configure an aggregated sink at the organization level to export all logs into a BigQuery dataset
- C. Use Cloud Logging to configure an export sink at each project level to export all logs into a BigQuery dataset
- D. Use Cloud Logging to configure an export sink at each project level to export all logs into Cloud Storage with a seven-year retention policy and Bucket Lock

Answer: A

NEW QUESTION # 180

Your team uses Cloud Build for all CI/CO pipelines. You want to use the kubectl builder for Cloud Build to deploy new images to Google Kubernetes Engine (GKE). You need to authenticate to GKE while minimizing development effort. What should you do?

- A. Create a separate step in Cloud Build to retrieve service account credentials and pass these to kubectl.
- B. Specify the Container Developer role for Cloud Build in the cloudbuild.yaml file.
- C. Assign the Container Developer role to the Cloud Build service account.
- D. Create a new service account with the Container Developer role and use it to run Cloud Build.

Answer: C

Explanation:

<https://cloud.google.com/build/docs/deploying-builds/deploy-gke>

<https://cloud.google.com/build/docs/securing-builds/configure-user-specified-service-accounts>

NEW QUESTION # 181

You are deploying an application that needs to access sensitive information. You need to ensure that this information is encrypted and the risk of exposure is minimal if a breach occurs. What should you do?

- A. Leverage a continuous build pipeline that produces multiple versions of the secret for each instance of the application.
- B. Store the encryption keys in Cloud Key Management Service (KMS) and rotate the keys frequently
- C. Integrate the application with a Single sign-on (SSO) system and do not expose secrets to the application
- D. Inject the secret at the time of instance creation via an encrypted configuration management system.

Answer: B

Explanation:

<https://cloud.google.com/security-key-management>

NEW QUESTION # 182

You support a web application that runs on App Engine and uses CloudSQL and Cloud Storage for data storage. After a short spike in website traffic, you notice a big increase in latency for all user requests, increase in CPU use, and the number of processes running the application. Initial troubleshooting reveals:

After the initial spike in traffic, load levels returned to normal but users still experience high latency.

Requests for content from the CloudSQL database and images from Cloud Storage show the same high latency.

No changes were made to the website around the time the latency increased.

There is no increase in the number of errors to the users.

You expect another spike in website traffic in the coming days and want to make sure users don't experience latency. What should you do?

- A. Upgrade the GCS buckets to Multi-Regional.
- B. Modify the App Engine configuration to have additional idle instances.
- C. Move the application from App Engine to Compute Engine.
- D. Enable high availability on the CloudSQL instances.

Answer: B

NEW QUESTION # 183

Your application services run in Google Kubernetes Engine (GKE). You want to make sure that only images from your centrally-managed Google Container Registry (GCR) image registry in the altostrat-images project can be deployed to the cluster while minimizing development time. What should you do?

- A. Add logic to the deployment pipeline to check that all manifests contain only images from gcr.io/altostrat-images.
- B. Create a custom builder for Cloud Build that will only push images to gcr.io/altostrat-images.
- **C. Add a tag to each image in gcr.io/altostrat-images and check that this tag is present when the image is deployed.**
- D. Use a Binary Authorization policy that includes the whitelist name pattern gcr.io/altostrat-images/.

Answer: C

NEW QUESTION # 184

.....

Under the help of our Professional-Cloud-DevOps-Engineer exam questions, the pass rate among our customers has reached as high as 98% to 100%. We are look forward to become your learning partner in the near future. As we all know, to make something right, the most important thing is that you have to find the right tool. Our Professional-Cloud-DevOps-Engineer study quiz is the exact study tool to help you pass the Professional-Cloud-DevOps-Engineer exam by your first attempt.

Professional-Cloud-DevOps-Engineer Test Pattern: <https://www.dumpexam.com/Professional-Cloud-DevOps-Engineer-valid-torrent.html>

It is better to find a useful and valid Professional-Cloud-DevOps-Engineer training torrent rather than some useless study material which will waste your money and time, We appreciate every comment our users of Professional-Cloud-DevOps-Engineer exam guide make as much as we value each effort we do for our users, 24/7 after sale service - Professional-Cloud-DevOps-Engineer Test Pattern - Google Cloud Certified - Professional Cloud DevOps Engineer Exam exam dumps, Google Professional-Cloud-DevOps-Engineer Practice Mock We have conducted research specifically on the current youth market, so we are very clear about what young people like today.
