- Perform a merge from the Dev source branch.
- Choose the selected changesets option.
- Merge the changes to the Release target branch.

Answer:

Explanation:

Actions

Steps to perform merge activity.

- Choose the all changes up to a specific version option.
- Perform a merge from the Release source branch.
- Merge the changes to the Dev target branch.
- Perform a merge from the Dev source branch.
- Choose the selected changesets option.
- Merge the changes to the Release target branch.

Perform a merge from the Dev source branch.

Choose the selected changesets option.

Merge the changes to the Release target branch.

Explanation:

**Actions**

Steps to perform merge activity.

- Choose the all changes up to a specific version option.
- Perform a merge from the Release source branch.
- Merge the changes to the Dev target branch.

	Steps to perform merge activity.
1	Perform a merge from the Dev source branch.
2	Choose the selected changesets option.
3	Merge the changes to the Release target branch.

NEW QUESTION # 106

You are a Dynamics 365 Finance developer.

You launch the Performance Timer tool to troubleshoot performance issues with a business process.

You need to view the results from the tool.

What does the tool present? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Performance Timer tool link	Data
Forms	▼
	The number of open forms and the rate at which they are opened and closed (per second).
	The total number of forms and the rate at which they are opened and closed (per second).
	The number of open forms and the rate at which they are opened and closed (per minute).
	The total number of forms and the rate at which they are opened and closed (per minute).
Services Session Provider	▼
	The number of open forms and the rate at which they are opened and closed (per second).
	The total number of forms and the rate at which they are opened and closed (per second).
	The number of open forms and the rate at which they are opened and closed (per minute).
	The total number of forms and the rate at which they are opened and closed (per minute).

Answer:

Explanation:

Performance Timer tool link	Data
Forms	▼
	The number of open forms and the rate at which they are opened and closed (per second).
	The total number of forms and the rate at which they are opened and closed (per second).
	The number of open forms and the rate at which they are opened and closed (per minute).
	The total number of forms and the rate at which they are opened and closed (per minute).
Services Session Provider	▼
	The number of open forms and the rate at which they are opened and closed (per second).
	The total number of forms and the rate at which they are opened and closed (per second).
	The number of open forms and the rate at which they are opened and closed (per minute).
	The total number of forms and the rate at which they are opened and closed (per minute).

Explanation:

Performance Timer tool link	Data
Forms	▼
	The number of open forms and the rate at which they are opened and closed (per second).
	The total number of forms and the rate at which they are opened and closed (per second).
	The number of open forms and the rate at which they are opened and closed (per minute).
	The total number of forms and the rate at which they are opened and closed (per minute).
Services Session Provider	▼
	The number of open forms and the rate at which they are opened and closed (per second).
	The total number of forms and the rate at which they are opened and closed (per second).
	The number of open forms and the rate at which they are opened and closed (per minute).
	The total number of forms and the rate at which they are opened and closed (per minute).

Box 1: The number of open forms and ..(per second)

Forms - Forms will show how many forms are currently open, plus the rate at which they opened and closed (per second), and a set of counters, such as the total amount of created or closed forms.

Box 2: The number of open forms and ..(per second)

This should really be: Services Session provider - This is the total number of sessions created.

NEW QUESTION # 107

A company is migrating from a legacy system to Dynamics 365 Unified Operations.

You need to import the customer data by using the Data Management workspace.

In which order should you perform the actions? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

- Specify the target entity.
- Specify the source data format.
- Import the source file to the project.
- Create a new import project.
- Specify the project category for the import.

Answer Area

Answer:

Explanation:

Actions

- Specify the target entity.
- Specify the source data format.
- Import the source file to the project.
- Create a new import project.
- Specify the project category for the import.

Answer Area

- Create a new import project.
- Specify the project category for the import.
- Specify the source data format.
- Specify the target entity.
- Import the source file to the project.

Explanation:

Step 1: Create a new import project.

Step 2: Specify the project category for the import.

Step 3: Specify the Source Data Format.

Step 4: Specify the target entity.

Step 5: Import the source file to the project.

The import process is done through the Import tile in the Data Management workspace.

Import a data package

* Log into the environment using a login with sufficient privileges (typically this is the Administrator role).

* On the dashboard, click the Data Management workspace.

* Click the Import tile.

* On the next page, do the following:

Provide a name.

In the Source Data Format field, select Package.

Click the Upload button and choose the appropriate package file from the location for the data being imported. This will import all the files from the package.

Click Save, and then click Import.
