

SSE-Engineer Passing Score Feedback | Exam SSE-Engineer Pass4sure

P.S. Free & New SSE-Engineer dumps are available on Google Drive shared by Exams4Collection: <https://drive.google.com/open?id=1hTf2b87ZvUkqdQNLW1mfLMXYJhdfHYfT>

If you fail in the exam, we will refund you in full immediately at one time. After you buy our Palo Alto Networks Security Service Edge Engineer exam torrent you have little possibility to fail in exam because our passing rate is very high. But if you are unfortunate to fail in the exam we will refund you immediately in full and the process is very simple. If only you provide the scanning copy of the SSE-Engineer failure marks we will refund you immediately. If you have any doubts about the refund or there are any problems happening in the process of refund you can contact us by mails or contact our online customer service personnel and we will reply and solve your doubts or questions timely. We provide the best service and SSE-Engineer Test Torrent to you to make you pass the exam fluently but if you fail in we will refund you in full and we won't let your money and time be wasted.

After going through all ups and downs tested by the market, our SSE-Engineer real dumps have become perfectly professional. And we bring the satisfactory results you want. Both theories of knowledge as well as practice of the questions in the SSE-Engineer Practice Engine will help you become more skillful when dealing with the SSE-Engineer exam. Our experts have distilled the crucial points of the exam into our SSE-Engineer study materials by integrating all useful content into them.

Exam SSE-Engineer Pass4sure | SSE-Engineer Exam Certification Cost

Palo Alto Networks Certification exams are essential to move ahead, because being certified professional a well-off career would be in your hand. Palo Alto Networks is among one of the strong certification provider, who provides massively rewarding pathways with a plenty of work opportunities to you and around the world. But the mystery is quite challenging to pass SSE-Engineer exam unless you have an updated exam material. Thousands of people attempt SSE-Engineer Exam but majorly fails despite of having good professional experience, because only practice and knowledge isn't enough a person needs to go through the exam material designed by Palo Alto Networks, otherwise there is no escape out of reading. Well, you have landed at the right place; Exams4Collection offers your experts designed material which will gauge your understanding of various topics.

Palo Alto Networks Security Service Edge Engineer Sample Questions (Q52-Q57):

NEW QUESTION # 52

A customer using Prisma Access (Managed by Panorama) wants to monitor traffic patterns across all remote networks and use Strata Logging Service to gather insights on network usage. An engineer notices that some network data is missing from the Application Command Center (ACC).

What should the engineer do to ensure complete data visibility?

- A. Ensure that log forwarding profiles are applied to all Prisma Access policies and directed to Strata Logging Service.
- B. Reconfigure the Prisma Access remote networks to log directly to Panorama instead of using Strata Logging Service.
- C. Enable the Use Data for Pre-Defined Reports' setting in the Logging and Reporting configuration on Panorama.
- D. Verify that the Panorama web interface has been configured to aggregate logs from both the Panorama data and RN-

SPNs.

Answer: A

Explanation:

For complete data visibility in Prisma Access (Managed by Panorama), log forwarding profiles must be applied to all security policies to ensure that traffic logs are correctly sent to Strata Logging Service. If log forwarding is missing or misconfigured, some traffic data may not appear in the Application Command Center (ACC), leading to incomplete insights. Verifying and correctly assigning log forwarding ensures that all relevant network activity is captured and available for analysis.

NEW QUESTION # 53

Which Cloud Identity Engine capability will create a Security policy that uses Entra ID attributes as the source identification?

- A. Entra ID Cloud Group
- B. Attribute Group Mapping
- **C. Cloud Dynamic User Group**
- D. Entra ID Group Attribute

Answer: C

Explanation:

The Cloud Dynamic User Group capability in Cloud Identity Engine enables the creation of Security policies that use Entra ID (formerly Azure AD) attributes for user identification. This allows Prisma Access to dynamically apply user-based security rules based on real-time Entra ID attributes, ensuring that access policies adapt to user changes such as group membership, device compliance, or role updates.

NEW QUESTION # 54

Strata Logging Service is configured to forward logs to an external syslog server; however, a month later, there is a disruption on the syslog server.

Which action will send the missing logs to the external syslog server?

- **A. Configure a replay profile with the affected time range and associate it with the affected syslog server profile.**
- B. Export the logs from Strata Logging Service, and then manually import them to the syslog server.
- C. Delete the affected syslog server profile and create a new one.
- D. Configure a log filter under the syslog server profile with the affected time range.

Answer: A

Explanation:

The Strata Logging Service allows log replay, which enables resending logs that were not successfully forwarded to an external syslog server due to disruptions. By configuring a replay profile with the affected time range and associating it with the syslog server profile, Prisma Access will resend the missing logs, ensuring that all relevant data is restored in the external logging system. This approach is the most efficient and automated way to recover missing logs.

NEW QUESTION # 55

Which overlay protocol must a customer premises equipment (CPE) device support when terminating a Partner Interconnect-based Colo-Connect in Prisma Access?

- A. Geneve
- B. DTLS
- **C. IPSec**
- D. GRE

Answer: C

Explanation:

When terminating a Partner Interconnect-based Colo-Connect in Prisma Access, the Customer Premises Equipment (CPE) must support IPSec as the overlay protocol. Prisma Access establishes secure IPSec tunnels between the Colo-Connect infrastructure and

the CPE, ensuring encrypted communication and reliable connectivity. IPsec provides secure site-to-cloud integration, enabling customers to extend their private network securely over the Prisma Access infrastructure.

NEW QUESTION # 56

When configuring Remote Browser Isolation (RBI) with Prisma Access (Managed by Strata Cloud Manager), which element is required to define the protected URLs for mobile users?

- A. A DNS Security profile applied to a Security policy with the action of "Isolate" for the target remote browser DNS categories
- B. A Security policy with the target URL categories and set the action to "Isolate"
- C. A URL access management profile with site access set to "Isolate" applied to a Security policy
- D. An RBI profile applied to the URL access management profile

Answer: C

Explanation:

When configuring Remote Browser Isolation (RBI) in Prisma Access (Managed by Strata Cloud Manager) for mobile users, a URL access management profile must be created with the site access action set to "Isolate". This profile is then applied to a Security policy to enforce isolation for specific URLs. This ensures that web traffic to designated high-risk or untrusted sites is redirected to a remote, secure browser instance, protecting endpoints from potential web-based threats.

NEW QUESTION # 57

.....

Once bit twice shy! Many candidates feel depressed since they failed before, and someone choose to delay exams, someone may choose to give up. Cheer up! Our latest Palo Alto Networks SSE-Engineer exam review questions will be your best savior and help you out of failure experience. Yes. We are the best authorized legal company which offers Valid SSE-Engineer Exam Review questions many years, we are entitled as the best high passing rate provider now.
