

100% Pass Quiz Updated Salesforce - New Salesforce-MuleSoft-Developer-I Real Test

Salesforce Advanced-Administrator Salesforce Certified Advanced Administrator 1

100% Pass Quiz Advanced-Administrator - Newest Salesforce Certified Advanced Administrator Reliable Test Prep

Are you often regretful that you have purchased an inappropriate product? Unlike other platforms for selling test materials, in order to make you more aware of your needs, Advanced-Administrator test preps provide sample questions for you to download for free. You can use the sample questions to learn some of the topics about Advanced-Administrator learn torrent and familiarize yourself with the [Advanced-Administrator Quiz](#) torrent in advance. If you feel that the Advanced-Administrator quiz torrent is satisfying to you, you can choose to purchase our complete question bank. After the payment, you will receive the email sent by the system within 5-10 minutes. Click on the login to start learning immediately with Advanced-Administrator test preps. No need to wait.

Choose a good Advanced-Administrator exam quiz and stick with it, you will be successful! Our Advanced-Administrator study questions will provide you with professional guidance and quality resources, but you must also be aware of the importance of adherence. As you know, life is like the sea. Only firm people will reach the other side. After you have chosen [Advanced-Administrator Preparation](#) materials, we will stay with you until you reach your goal.

After paying our Salesforce-MuleSoft-Developer-I exam torrent successfully, buyers will receive the mails sent by our system in 5-10 minutes. Then candidates can open the links to log in and use our Salesforce-MuleSoft-Developer-I test torrent to learn immediately. Because the time is of paramount importance to the examinee, everyone hope they can learn efficiently. So candidates can use our Salesforce-MuleSoft-Developer-I Guide questions immediately after their purchase is the great advantage of our product. It is convenient for candidates to master our Salesforce-MuleSoft-Developer-I test torrent and better prepare for the Salesforce-MuleSoft-Developer-I exam.

Salesforce Salesforce-MuleSoft-Developer-I Exam Syllabus Topics:

Topic	Details
Topic 1	Designing APIs: Designing APIs involves describing the lifecycle of the modern API and using RAML to define various aspects of an API. It includes identifying when to use query parameters vs URI parameters, and defining API parameters.

Topic 2	• Building API Implementation Interfaces: This topic involves manually creating a RESTful interface for a Mule application and generating a REST Connector from a RAML specification. It also includes describing the features and benefits of APIkit.
Topic 3	• Deploying and Managing APIs and Integrations: It includes packaging Mule applications for deployment and deploying them to CloudHub. This topic also involves using CloudHub properties, creating and deploying API proxies, connecting an API implementation to API Manager, and applying policies to secure an API.
Topic 4	• Routing Events: It focuses on using the Choice router for conditional logic and the Scatter-Gather router to multicast events. This topic also involves validating data by using the Validation module.
Topic 5	• Transforming Data with DataWeave: It involves writing DataWeave scripts and using DataWeave functions. This topic also includes defining and using DataWeave variables, functions, and modules, and applying correct syntax.
Topic 6	• Processing Records: Processing records includes methods for processing individual records in a collection and explaining how Mule events are processed by the For Each scope. It also involves using the Batch Job with Batch Steps and a Batch Aggregator.
Topic 7	• Debugging and Troubleshooting Mule Applications: Using breakpoints to inspect a Mule event during runtime, installing missing Maven dependencies, and reading and deciphering Mule log error messages are sub-topics of this topic.
Topic 8	• Accessing and Modifying Mule Events: It describes the Mule event data structure. Moreover, the topic focuses on usage of transformers and enriching Mule events.
Topic 9	• Creating Application Networks: The topic of creating Application Networks encompasses understanding MuleSoft's proposal for closing the IT delivery gap and describing the role and characteristics of the modern API. It also includes the purpose and roles of a Center for Enablement (C4E), and the benefits of API-led.
Topic 10	• Using Connectors: It focuses on retrieving data from REST services using HTTP Request or REST Connector. Moreover, the topic covers using a Web Service Consumer connector for SOAP web services and the Transform Message component.
Topic 11	• Handling Errors: Handling errors includes describing default error handling in Mule applications and defining custom global default error handlers. It involves comparing On Error Continue and On Error Propagate scopes, creating error handlers for a flow, using the Try scope, and mapping errors to custom application errors.

Latest Salesforce Salesforce-MuleSoft-Developer-I Exam Fee | Accurate Salesforce-MuleSoft-Developer-I Study Material

Our Salesforce-MuleSoft-Developer-I learning materials are carefully compiled by industry experts based on the examination questions and industry trends. You don't have to worry about our learning from Salesforce-MuleSoft-Developer-I exam question. We assure you that our Salesforce-MuleSoft-Developer-I learning materials are easy to understand and use the fewest questions to convey the most important information. As long as you follow the steps of our Salesforce-MuleSoft-Developer-I Quiz torrent, your mastery of knowledge will be very comprehensive and you will be very familiar with the knowledge points. This will help you pass the exam more smoothly.

Salesforce Certified MuleSoft Developer (Mule-Dev-201) Sample Questions (Q223-Q228):

NEW QUESTION # 223

Refer to the exhibits.

```
<flow name="custNameFlow" doc:id="bcbd3cba-7ff3-469a-a38f-026be38282ba">
  <http:listener doc:name="Listener" config-ref="HTTP Listener config" path="/Log"/>
  <set-variable value="#[{ firstName: 'Madhav', lastName: 'Joshi'}]"
    doc:name='customer to { firstName: "Madhav", lastName: "Joshi"}' variableName="customer"/>
  <logger level="INFO" doc:name="firstName" message="?????"/>
</flow>
```

Set payload transformer is set the firstName and lastName of the customer as shown in below images.

What is the correct Dataweave expression which can be added in message attribute of a Logger activity to access firstName (which in this case is Madhav) from the incoming event?

- A. vars."customer.firstName"
- B. firstName
- C. vars."customer"."firstName"
- D. customer.firstName

Answer: C

Explanation:

Correct answer is vars."customer"."firstName"

Please note that you can also access firstName using this syntax vars.customer.firstName.

Mule Ref Doc : Variables in Mule Apps | MuleSoft Documentation

NEW QUESTION # 224

Refer to the exhibit.

What expression correctly specifies input parameters to pass the city and state values to the SQL query?

- A.

```
#[
  salesforce
  inputParams: [
    "San Francisco",
    "CA"
  ]
]
```
- B.

```
#[
  salesforce
  inputParams: {
    city: "San Francisco",
    state: "CA"
  }
]
```
- C.

```
#[
  {
    city: "San Francisco",
    state: "CA"
  }
]
```
- D.

```
#[
  [
    "San Francisco",
    "CA"
  ]
]
```

Answer: C

Explanation:

MuleSoft Documentation Reference : <https://docs.mulesoft.com/db-connector/1.9/database-connector-select>

NEW QUESTION # 225

Refer to the exhibits.

A web client sends a GET request to the HTTP Listener.

What response message is returned to the web client?

```
<flow name="validatePayload" >
  <http:listener doc:name="HTTP: GET /" config-ref="HTTPListenerConfig" path="/" />
  <set-payload value="Start" doc:name="Start" />
  <validation:is-blank-string doc:name="payload" value="#[payload]" />
  <set-payload value="End" doc:name="End" />
</flow>
```

- A. "End"
- B. "Start"
- C. ""
- D. "String is not blank"

Answer: A

Explanation:

1. Set Payload "Start"
2. 'Is Balnk String' Creates an Error object with #[error.description] ="String is not blank"
3. Default Error Handler catches and Propagates error
4. 'On Error Propagate' is 'RED IN RED OUT'. It Returns Status Code : 500 & #[error.description]

----- Correct
answer is String is not blank. Because validation component will throw an error as payload is not blank.

NEW QUESTION # 226
Refer to the exhibits.

```
<flow name="getNumbers" >
  <http:listener doc:name="HTTP: GET /" config-ref="HTTP_Listener_config" path="/" />
  <scatter-gather doc:name="Scatter-Gather">
    <route >
      <flow-ref doc:name="setPayload100" name="setPayload100" />
    </route>
    <route >
      <flow-ref doc:name="setPayload200" name="setPayload200" />
    </route>
  </scatter-gather>
  <ee:transform doc:name="payload">
    <ee:message >
      <ee:set-payload ><![CDATA[%dw 2.0
        output application/json
        ---
        payload]]></ee:set-payload>
    </ee:message>
  </ee:transform>
</flow>
<flow name="setPayload100" ><set-payload value='#[ "100" ]' doc:name="100" /></flow>
<flow name="setPayload200" ><set-payload value='#[ "200" ]' doc:name="200" /></flow>
```

Each route in the Scatter-Gather sets the payload to the number shown in the label. What response is returned to a web client request to the HTTP Listener?

```
[
  {
    "attributes": ...,
    "payload": "100"
  },
  {
    "attributes": ...,
    "payload": "200"
  }
]
```

- A.

- ```

{
 "0": {
 "attributes": ...,
 "payload": "100"
 },
 "1": {
 "attributes": ...,
 "payload": "200"
 }
}

```
- B. 
  - C. 
  - D.

**Answer: B**

Explanation:

Correct answer is as below. After all processing routes have finished execution, the Scatter-Gather component creates a new Mule event that combines all resulting Mule events from each route, and then passes the new Mule event to the next component in the flow.

```

{
 "0": {
 "attributes": ...,
 "payload": "100"
 },
 "1": {
 "attributes": ...,
 "payload": "200"
 }
}

```

#### NEW QUESTION # 227

What is the object type returned by the File List operation?

- A. Array of String file names
- B. Array of Mule event objects
- C. Object of Mule event objects
- D. Object of String file names

**Answer: B**

The List operation returns an array of messages in which: Each message holds the file's content in its payload. The file's attributes section carries the file's metadata (such as name, creation time, and size). The payload is empty if the element is a folder.
